information processing data mining retrieval and management bioinformatics and bio inspired models agents and hybrid systems financial engineering as well as a special session on nature inspired date technologies <u>Intelligent Data Mining</u> Da Ruan,Guoqing Chen,Etienne E. Kerre,Geert Wets,2005-08-24 Intelligent Data Mining Techniques and Applications is an organized edited collection of contributed chapters covering basic knowledge for intelligent systems and data mining applications in economic and management industrial engineering and other related industrial applications The main objective of this book is to gather a number of peer reviewed high quality contributions in the relevant topic areas The focus is especially on those chapters that provide theoretical analytical solutions to the problems of real interest in intelligent techniques possibly combined with other traditional tools for data mining and the corresponding applications to engineers and managers of different industrial sectors Academic and applied researchers and research students working on data mining can also directly benefit from this book **Support Vector Machines for Pattern Classification** Shigeo Abe,2010-07-23 A guide on the use of SVMs in pattern classification including a rigorous performance comparison of classifiers and regressors The book presents architectures for multiclass classification and function approximation problems as well as evaluation criteria for classifiers and regressors Features Clarifies the characteristics of two class SVMs Discusses kernel methods for improving the generalization ability of neural networks and fuzzy systems Contains ample illustrations and examples Includes performance evaluation using publicly available data sets Examines Mahalanobis kernels empirical feature space and the effect of model selection by cross validation Covers sparse SVMs learning using privileged information semi supervised learning multiple classifier systems and multiple kernel learning Explores incremental training based batch training and active set training methods and decomposition techniques for linear programming SVMs Discusses variable selection for support vector regressors *Applied Quantitative Methods for Trading and Investment* Christian L. Dunis,Jason Laws,Patrick Naïm,2004-01-09 This book provides a manual on quantitative financial analysis Focusing on advanced methods for modelling financial markets in the context of practical financial applications it will cover data software and techniques that will enable the reader to implement and interpret quantitative methodologies specifically for trading and investment Includes contributions from an international team of academics and quantitative asset managers from Morgan Stanley Barclays Global Investors ABN AMRO and Credit Suisse First Boston Fills the gap for a book on applied quantitative investment trading models Provides details of how to combine various models to manage and trade a portfolio

Large-Scale Scientific Computing Ivan Lirkov,Svetozar D. Margenov,Jerzy Wasniewski,2006-02-15 This book constitutes the thoroughly refereed post proceedings of the 5th International Conference on Large Scale Scientific Computations LSSC 2005 held in Sozopol Bulgaria in June 2005 The 75 revised full papers presented together with five invited papers were carefully reviewed and selected for inclusion in the book The papers are organized in topical sections

Ordinary Shares, Exotic Methods Francis Eng-Hock Tay,Lixiang Shen,Lijuan Cao,2003 Exotic methods refer to a

particular function within a general soft computing method such as genetic algorithms neural networks and rough sets theory They are applied to ordinary shares for a variety of financial purposes such as portfolio selection and optimization classification of market states forecasting of market states and data mining This is in contrast to the wide spectrum of work done on exotic financial instruments wherein advanced mathematics is used to construct financial instruments for hedging risks and for investment In this book particular aspects of the general method are used to create interesting applications For instance genetic niching produces a family of portfolios for the trader to choose from Support vector machines a special form of neural networks forecast the financial markets such a forecast is on market states of which there are three uptrending mean reverting and downtrending A self organizing map displays in a vivid manner the states of the market Rough sets with a new discretization method extract information from stock prices **Artificial Economics and Self Organization** Stephan Leitner,Friederike Wall,2013-08-16 This volume presents recent advances in the dynamic field of Artificial Economics and its various applications Artificial Economics provides a structured approach to model and investigate economic and social systems In particular this approach is based on the use of agent based simulations and further computational techniques The main aim is to analyze the outcomes at the overall systems level as results from the agents behavior at the micro level These emergent characteristics of complex economic and social systems can neither be foreseen nor are they intended The emergence rather makes these systems function Artificial Economics especially facilitates the investigation of this emergent systems behavior **Innovations in Applied Artificial Intelligence** Bob Orchard,Chunsheng Yang,2004-05-07 This book constitutes the refereed proceedings of the 17th International Conference on Industrial and Engineering Applications of Artificial Intelligence and Expert Systems IEA AIE 2004 held in Ottawa Canada in May 2004 The 129 revised full papers presented were carefully reviewed and selected from 208 submissions The papers are organized in topical sections on neural networks bioinformatics data mining general applications autonomous agents intelligent systems knowledge processing and NLP intelligent user interfaces evolutionary computing fuzzy logic human roboter interaction computer vision and image processing machine learning and case based reasoning heuristic search security Internet applications planning and scheduling constraint satisfaction e learning expert systems applications to design machine learning and image processing **Database and Expert Systems Applications** Abdelkader Hameurlain,Rosine Cicchetti,Roland Traunmüller,2003-08-02 th 2002 DEXA the 13 International Conference on Database and Expert Systems Applications was held on September 2 6 2002 at the Universit Aix Marseille II France The quickly growing field of information systems required the establishment of more specialized discussion platforms the DaWaK conference EC Web conference eGOV conference and DEXA workshops and there were held in parallel with DEXA also in Aix en Provence The resulting book was prepared with great effort Starting with the preparation of submitted papers the papers went through the reviewing process The accepted papers were revised to final versions by their authors and arranged to the

conference program This year 241 papers were submitted and our thanks go to all who have contributed The program committee and the supporting reviewers produced altogether about 730 referee reports on average three reports per paper and selected 89 papers for presentation The papers presented here encompass the extensive domain of databases together with the other conferences and workshops of the DEXA event cluster a vast part of applied computer science was covered In this way DEXA has blazed the trail At this point we would like to acknowledge to all institutions which actively supported this conference and made it possible These are IUT Universit Aix Marseille II FAW DEXA Association the Austrian Computer Society and Microsoft Research   **Nature Inspired Cooperative Strategies for Optimization (NICSO 2007)** Natalio Krasnogor,Vincenzo Nicosia,Mario Pavone,David Alejandro Pelta,2008-05-14 Biological and natural processes have been a continuous source of inspiration for the sciences and engineering For instance the work of Wiener in cybernetics was influenced by feedback control processes observable in biological systems McCulloch and Pitts description of the artificial neuron was instigated by biological observations of neural mechanisms the idea of survival of the fittest inspired the field of evolutionary algorithms and similarly artificial immune systems ant colony optimisation automated self assembling programming membrane computing etc also have their roots in natural phenomena The second International Workshop on Nature Inspired Cooperative Strategies for Optimization NICSO was held in Acireale Italy during November 8 10 2007 The aim for NICSO 2007 was to provide a forum were the latest ideas and state of the art research related to cooperative strategies for problem solving arising from Nature could be discussed The contributions collected in this book were strictly peer reviewed by at least three members of the international programme committee to whom we are indebted for their support and assistance The topics covered by the contributions include several well established nature inspired techniques like Genetic Algorithms Ant Colonies Artificial Immune Systems Evolutionary Robotics Evolvable Systems Membrane Computing Quantum Computing Software Self Assembly Swarm Intelligence etc   *Intelligent Data Engineering and Automated Learning – IDEAL 2018* Hujun Yin,David Camacho,Paulo Novais,Antonio J. Tallón-Ballesteros,2018-11-08 This two volume set LNCS 11314 and 11315 constitutes the thoroughly refereed conference proceedings of the 19th International Conference on Intelligent Data Engineering and Automated Learning IDEAL 2018 held in Madrid Spain in November 2018 The 125 full papers presented were carefully reviewed and selected from 204 submissions These papers provided a timely sample of the latest advances in data engineering and automated learning from methodologies frameworks and techniques to applications In addition to various topics such as evolutionary algorithms deep learning neural networks probabilistic modelling particle swarm intelligence big data analytics and applications in image recognition regression classification clustering medical and biological modelling and prediction text processing and social media analysis   **Intelligent Data Engineering and Automated Learning – IDEAL 2024** Vicente Julian,David Camacho,Hujun Yin,Juan M. Alberola,Vitor Beires Nogueira,Paulo Novais,Antonio Tallón-Ballesteros,2024-11-19 This two volume set LNCS 15346 and LNCS 15347

constitutes the proceedings of the 25th International Conference on Intelligent Data Engineering and Automated Learning IDEAL 2024 held in Valencia Spain during November 20 22 2024 The 86 full papers and 6 short papers presented in this book were carefully reviewed and selected from 130 submissions IDEAL 2024 is focusing on Big Data Analytics and Privacy Machine Learning Deep Learning for Real World Applications Data Mining and Pattern Recognition Information Retrieval and Management Bio and Neuro Informatics and Hybrid Intelligent Systems and Agents
