Intelligent Technologies For Information Analysis:

Intelligent Technologies for Information Analysis Ning Zhong, Jiming Liu, 2004-08-12 Today we live in an information age information has become a commodity and every second thousands of new records are created This explosion of massive data sets created by businesses science and governments necessitates intelligent and more powerful computing paradigms so that users can benefit from this data This information needs to be summarized and synthesized to support effective problem solving and decision making The papers in this book assume an interdisciplinary approach based on three major methodologies first hybridization i e combining methods in order to harness their strengths and avoid their shortcomings second multiphase processing i e the step wise preparation evaluation and refinement of data and third multi agent and distributed processing i e using intelligent agents as well as Web or grid architectures The final vision of the authors is an intelligent information technology encompassing theories and applications from for example artificial intelligence data mining grid computing and statistical learning This monograph presents the current state of research and development in both theoretical and application aspects of intelligent information analysis It is a source of reference and includes numerous examples for researchers graduate students and advanced professionals working in areas such as electronic commerce business intelligence and knowledge grids Advanced Intelligent Technologies for Information and Communication Kazumi Nakamatsu, Roumen Kountchev, Srikanta Patnaik, Jair M. Abe, 2023-10-28 The book includes new research results of scholars from the Third International Conference on Advanced Intelligent Technologies ICAIT 2022 organized by IRNet International Academic Communication Center held during October 28 30 2022 The book covers research work from active researchers who are working on collaboration of industry and various intelligent technologies such as intelligent technologies applicable applied to manufacturing and distribution of industrial products factory automation and business The topics included are all computational intelligence techniques applicable applied to industry intelligent techniques in data science applicable applied to business and management intelligent network systems applicable applied to industrial production intelligent technologies applicable to smart agriculture and intelligent information systems for agriculture The 2021 International Conference on Smart Technologies and Systems for Internet of Things Ishfaq Ahmad, Jun Ye, Weidong Liu, 2022-07-02 This book contains papers presented at the 2021 International Conference on Smart Technologies and Systems for Internet of Things held on November 26 27 2021 in Shanghai China It covers topics like distributed processing for sensor data in CPS networks approximate reasoning and pattern recognition for CPS networks distributed processing in mobile networking data analytics for social media sensor data integration data platforms for efficient integration with CPS networks virtualized and cloud oriented resources for data processing for CPS networks machine learning algorithms for CPS networks data security and privacy in CPS networks sensor fusion algorithms sensor signal processing data acquisition and preprocessing technology intelligent computing data mining methods and algorithms big data system solutions and tools platform intelligent control

and intelligent management and operational situation awareness utilizing big data driven intelligence It caters to postgraduate students researchers and practitioners specializing and working in related areas *Intelligent Technologies* Himansu Das,Arup Abhinna Acharya,Kuan-Ching Li,2024-09-02 This book discusses automated computing systems which are mostly powered by intelligent technologies like artificial intelligence machine learning image recognition speech processing cloud computing etc to perform complex automated tasks which are not possible by traditional computing systems The chapters are extended version of research works presented at third PhD Research Symposium in various advanced technologies used in the field of computer science This book provides an opportunity for the researchers to get ideas regarding the ongoing works that help them in formulating problems of their interest The academicians can also be benefited to know about the current research trends that smooth the way to guide their students to carry out research work in the proper direction The industry people will be also facilitated to know about the current advances in research work and materialize the research work into industrial applications Proceedings of the 2024 3rd International Conference on Engineering Management and Information Science (EMIS 2024) Tang Yao,Shouchang Chen,Zelin Zhang,Yingchen Yan,2024-07-13 This is an open access book 2022 International Conference on Engineering Management and Information Science EMIS 2022 was held in Xiamen on February 26 2022 2023 2nd International Conference on Engineering Management and Information Science EMIS 2023 was held in Chengdu on February 24 2023 2024 3rd International Conference on Engineering Management and Information Science EMIS2024 will be held from April 12 14 2024 in Beijing China Engineering management and information science is a comprehensive activity based on management science and engineering using modern information technology and methods to collect process transmit and utilize information with the aim of improving the efficiency and effectiveness of the organization and enhancing the overall operating effect of the organization Current situation and problems However in the process of information engineering management there have also been some problems such as inaccurate data imperfect system functions system security issues and communication and collaboration issues The previous two sessions have had heated discussions on this This conference will focus more on the construction of information management platforms to improve management efficiency and economic efficiency Aim and scope EMIS2024 aims to gather professors experts scholars and industrial pioneers from all over the world to exchange past experiences new advances and research results in the field of Engineering Management and information Science We sincerely hope that the conference will help advance knowledge in relevant scientific and academic fields Researchers from Engineering Management and Information Science are invited to participate and submit their work to the program Additionally any work related to EMIS that has potential for usage in any of the fields is welcome *Intelligent Technologies for Sensors* S. Kannadhasan,R. Nagarajan,Alagar Karthick,2023-06-23 Sensor devices that are flexible and printable have received a lot of interest in recent years New techniques such as printing and additive manufacturing are being developed to

realize a wide range of readily deployable systems such as displays sensors and RFID tags This informative book provides an overview of the smart real time application of sensors in a variety of intelligent systems and machines It looks at their diverse applications and uses their design and architecture and optimization technologies Bringing together leading academics architects and scientists from across the globe who are experts in this area the volume looks at new research on sensors in several fields such as health care education smart home technology security agriculture transportation systems and others

Advanced Intelligent Technologies and Sustainable Society Kazumi Nakamatsu, Srikanta Patnaik, Roumiana Kountcheva, 2024-08-10 This book includes new research results of scholars from the Fourth International Conference on Advanced Intelligent Technologies ICAIT 2023 organized by IRNet International Academic Communication Center held during November 3-5 2023 The book covers research work from active researchers who are working on collaboration of industry and various intelligent technologies such as intelligent technologies applicable applied to manufacturing and distribution of industrial products factory automation business etc The topics included are all computational intelligence techniques applicable applied to industry intelligent techniques in data science applicable applied to business and management intelligent network systems applicable applied to industrial production intelligent technologies applicable to smart agriculture and intelligent information systems for agriculture

Frontier Computing: Volume 2 Jason C. Hung, Neil Yen, Jia-Wei Chang, 2025-02-21 This book covers issues of computer science application on cloud computing information security and describes applications of frontier computing Frontier Computing conference aims at providing an open forum to reach a comprehensive understanding to the recent advances and emergence in information technology science and engineering with the themes in the scope of Communication Network Business Intelligence and Knowledge Management Web Intelligence and any related fields that prompt the development of information technology Articles cover a wide spectrum of topics database and data mining networking and communications web and internet of things embedded system soft computing social network analysis security and privacy optics communication and ubiquitous pervasive computing Many papers have shown their great academic potential and value and in addition indicate promising directions of research in the focused realm of this conference series Readers who will benefit from this comprehensive overview of the latest in information technology include students researchers and industry professionals in the fields of cloud computing internet of things machine learning information security multimedia systems information technology and so on The book also serves as a comprehensive overview for young investigators looking to start a new research program

Information Processing and Network Provisioning Michel Kadoch, Mohamed Cheriet, Xuesong Qiu, 2025-07-21 The four volume set CCIS 2416 2417 2418 and 2419 constitutes the refereed post conference proceedings of the Third International Conference on Information Processing and Network Provisioning ICIPNP 2024 Spring held in Beijing China during June 14-16 2024 The 152 revised full papers presented in these proceedings were carefully reviewed and selected from 347 submissions They
