Traversals Stuart Moulthrop, Dene Grigar, 2017-03-31 An exercise in reclaiming electronic literary works on inaccessible platforms examining four works as both artifacts and operations Many pioneering works of electronic literature are now

largely inaccessible because of changes in hardware software and platforms The virtual disappearance of these works created on floppy disks in Apple's defunct HyperCard and on other early systems and platforms not only puts important electronic literary work out of reach but also signals the fragility of most works of culture in the digital age In response Dene Grigar and Stuart Moulthrop have been working to document and preserve electronic literature work that has culminated in the Pathfinders project and its series of Traversals video and audio recordings of demonstrations performed on historically appropriate platforms with participation and commentary by the authors of the works In Traversals Moulthrop and Grigar mine this material to examine four influential early works Judy Malloy's Uncle Roger 1986 John McDaid's Uncle Buddy's Phantom Funhouse 1993 Shelley Jackson's Patchwork Girl 1995 and Bill Bly's We Descend 1997 offering deep readings that consider the works as both literary artifacts and computational constructs For each work Moulthrop and Grigar explore the interplay between the text's material circumstances and the patterns of meaning it engages and creates paying attention both to specificities of media and purposes of expression

Electronic Literature Scott Rettberg, 2018-12-14 Electronic Literature considers new forms and genres of writing that exploit the capabilities of computers and networks literature that would not be possible without the contemporary digital context In this book Rettberg places the most significant genres of electronic literature in historical technological and cultural contexts These include combinatory poetics hypertext fiction interactive fiction and other game based digital literary work kinetic and interactive poetry and networked writing based on our collective experience of the Internet He argues that electronic literature demands to be read both through the lens of experimental literary practices dating back to the early twentieth century and through the specificities of the technology and software used to produce the work Considering electronic literature as a subject in totality this book provides a vital introduction to a dynamic field that both reacts to avant garde literary and art traditions and generates new forms of narrative and poetic work particular to the twenty first century It is essential reading for students and researchers in disciplines including literary studies media and communications art and creative writing

oral age and to show how such interactions however contrary to the dominant twentieth century view of literature as art for art s sake help to keep literature alive and speaking to us *Gaming for Classroom-Based Learning: Digital Role Playing as a Motivator of Study* Baek, Young Kyun,2010-05-31 As part of an international dialogue between researchers in educational technology this title investigates where games can motivate students to learn and improve their knowledge and skills

Kington,2016-02-29 The very best columns from a body of outstanding comic writing by the irreplaceable irrepressible Miles

Kington For decades the columns of Miles Kington were a refreshing spot of lunacy in the dull acres of the world's news. From the arguments between gods past and present as recorded in the minutes of United Deities meetings to unlikely agony aunts all purpose Shakespeare plays and interviews with sock psychologists nothing is too trivial or unlikely to attract Kington's attention and wit. Selected here are over a hundred pieces each a powerful antidote to doom and destruction with their irreverent absurd and sometimes surreal attitude to life. They are amongst the best journalism and humorous works of the past fifty years. Read on. Every single day over more than two decades his column was witty topical erudite acutely observed. Quite simply no one in modern journalism is capable of such an output at such high quality. Simon Kelner As with the very best in any sphere of endeavour Miles's trick was to make it look easy. His lightness of touch amounted to a kind of genius. But behind the conversational prose lay craftsmanship of the highest order. His standards never wavered. Simon O'Hagan

Literary Gaming Astrid Ensslin, 2023-08-15 A new analytical framework for understanding literary videogames the literary ludic spectrum illustrated by close readings of selected works. In this book Astrid Ensslin examines literary videogames hybrid digital artifacts that have elements of both games and literature combining the ludic and the literary. These works can be considered verbal art in the broadest sense in that language plays a significant part in their aesthetic appeal they draw on game mechanics and they are digital born dependent on a digital medium unlike for example conventional books read on e-readers. They employ narrative dramatic and poetic techniques in order to explore the affordances and limitations of ludic structures and processes and they are designed to make players reflect on conventional game characteristics. Ensslin approaches these hybrid works as a new form of experimental literary art that requires novel ways of playing and reading. She proposes a systematic method for analyzing literary ludic L/L texts that takes into account the analytic concerns of both literary stylistics and ludology. After establishing the theoretical underpinnings of her proposal Ensslin introduces the L/L spectrum as an analytical framework for literary games. Based on the phenomenological distinction between deep and hyper attention the L/L spectrum charts a work's relative emphases on reading and gameplay. Ensslin applies this analytical toolkit to close readings of selected works moving from the predominantly literary to the primarily ludic from online hypermedia fiction to Flash fiction to interactive fiction to poetry games to a highly designed literary auteur game. Finally she considers her innovative analytical methodology in the context of contemporary ludology media studies and literary discourse analysis.
