This text addresses the need for a book specifically aimed at obstetric anesthesia and covers topics such as pulmonary
cardiac renal hepatic hematologic neurologic endocrine and other diseases The real anesthetic challenge arises when
patients present to Labor and Delivery with unusual or complicated medical problems and in recent years a few of the larger

institutions have developed an Obstetric Anesthesiology Consultation Service to prepare for the management of these patients While most pregnant women who present to Labor and Delivery require anesthetic intervention they typically meet the anesthesiologist for the first time in labor Since the majority of laboring women are healthy without significant comorbidities this does not present much of a challenge to the anesthesiologist and the anesthetic management tends to be straight forward with favorable outcomes However using this new model the anesthesiologist has the opportunity to discuss the various treatment modalities and potentially suggest diagnostic testing to be performed prior to delivery similar to the pre operative testing that is done in other surgical environments *Navy Medicine* ,1987-03 Salmonella spp.-
