1939 Roy Douglas,1983-06-18 *British Intelligence in the Second World War* Francis Harry Hinsley,1979 *Intercept* Józef Garliński,1979 *The Rise and Fall of the Japanese Imperial Naval Air Service* Peter J. Edwards,2020-01-31 This book describes in considerable detail the people events ships and aircraft that shaped the Air Service from its origins in the late 19th century to its demise in 1945 The formative years began when a British Naval Mission was established in Japan in 1867 to advise on the development of balloons for naval purposes After the first successful flights of fixed wing aircraft in the USA and Europe the Japanese navy sent several officers to train in Europe as pilots and imported a steady stream of new models to evaluate During World War One Japan became allied with the UK and played a significant part in keeping the German fleets of ships and submarines at bay in the Pacific and Indian Oceans However in the international naval treaties that followed they felt betrayed since the number of capital

ships battleships and cruisers that they were allowed was below those of the USA and the UK Aircraft carriers were not included so a program of carrier building was started and continued until World War Two At the same time they developed an aircraft industry and at the beginning of war their airplanes were comparable and in some instances superior to those of the British and Americans Much prewar experience was gained during Japans invasion of China but their continued anger with America festered and resulted in their becoming allied with Germany Italy and the Vichy France during World War Two There followed massive successful attacks on Pearl Harbor the Philippines the Southern Islands Port Darwin and New Guinea The British were decimated and the USA recoiled at the onslaught taking over a year to regroup and take the war to the Imperial Japanese forces Throughout the conflict many sea battles were fought and the name Zero became legendary When Japan eventually capitulated after the Atomic bombs were dropped the Japanese Imperial Air Service was disbanded

*Interception* Bernard Keenan,2025-05-27 A media history of how the UK and US governments have surveilled citizens by intercepting their private communications It may not be Big Brother yet but the state is watching you watching all of us in fact systematically intercepting our private communications and putting them to work in its own interests In *Interception* a media genealogy of the surveillance state at its most intimate Bernard Keenan investigates the emergence of this practice as a governmental power and the secret role it has played in the development of communication systems and law His book exposes the complex largely obscure history of a covert and fundamental connection between the secret powers of the state and the means by which we communicate our everyday lives Keenan analyzes key moments in this history from the formation of the postal system to cable networks satellites and the internet with particular attention to the role that media play in determining the political and legal conditions of the power of interception in governmental affairs While chiefly focused on Britain the Empire and the post 1945 UKUSA signal intelligence alliance the book s analysis has international reach across networks and jurisdictions connecting Edward Snowden s disclosures and post 2013 developments to a longer media history foregrounding the technical dimensions of an inherently secret practice and well guarded political power Ultimately Keenan

s work reveals how law and information systems have been interpolated over time linking communication governmental power law and information science often to dark antidemocratic ends
