## **Interdisciplinary Phenomenology:**

**Interdisciplinary Phenomenology** Don Ihde, Richard M. Zaner, 2014-03-14 Historically philosophy has been the point of origin of the various sciences. However, once developed, the sciences have increasingly become autonomous, although often taking some paradigm from leading philosophies of the era. As a result, in recent times, the relationship of philosophy to the sciences has been more by way of dialogue and critique than a matter of spawning new sciences. This volume of the *Selected Studies* brings together a series of essays which develop that dialogue and critique with special reference to the insights of phenomenological philosophy. Phenomenology in its own way has been interfaced with the sciences from its outset. Perhaps the most widely noted relation, due in part to Edmund Husserl's characterization of the beginning steps of phenomenology as a descriptive psychology, has been with the various psychologies. It is well known that the early Gestaltists were influenced by Husserl, and later the Existential psychologies acknowledged the impact of Martin Heidegger and Jean Paul Sartre to mention but two philosophers. And of course, Husserl's lifetime concern for the foundations of logic and mathematics, especially as these the former in particular were developed into a foundational theory of science, has figured prominently in these dialogues. 2 INTRODUCTION Less directly but more currently, the impact of phenomenology upon the disciplines has begun to be felt in a whole range of the sciences. Morality within the Life- and Social World Anna-Teresa

Tymieniecka, 2012-12-06 *Interdisciplinarity* Julie Thompson Klein, 1990 In this volume Julie Klein provides the first comprehensive study of the modern concept of interdisciplinarity, supplementing her discussion with the most complete bibliography yet compiled on the subject. In this volume Julie Klein provides the first comprehensive study of the modern concept of interdisciplinarity, supplementing her discussion with the most complete bibliography yet compiled on the subject. Spanning the social sciences, natural sciences, humanities, and professions, her study is a synthesis of existing scholarship on interdisciplinary research, education, and health care. Klein argues that any interdisciplinary activity embodies a complex network of historical, social, psychological, political, economic, philosophical, and intellectual factors. Whether the context is a short-ranged instrumentality or a long-range reconceptualization of the way we know and learn, the concept of interdisciplinarity is an important means of solving problems and answering questions that cannot be satisfactorily addressed using singular methods or approaches.

**Postphenomenology** Evan Selinger, 2012-02-01 Postphenomenology is the first book devoted exclusively to the interpretation and advancement of prominent phenomenologist Don Ihde's landmark contributions to history, philosophy, sociology, science, sound studies, and technology studies. Ihde has made a direct and lasting impact on the study of technological experience across the disciplines and acquired an international following of diverse scholars along the way, many of whom contribute to Postphenomenology, including Albert Borgmann, who characterizes Ihde as being among the most interesting and provocative contemporary American philosophers. The contributors situate, assess, and apply Ihde's philosophy with respect to the primary themes that his oeuvre emphasizes. They not only clarify Ihde's work

but also make significant contributions to the philosophy of technology phenomenology hermeneutics and the philosophy of science A comprehensive response from Ihde concludes the volume     **Experimental Phenomenology, Second Edition** Don Ihde,2012-02-01 Expanded new edition of the landmark book demonstrating the practice of phenomenology through visual illusions and ambiguous drawings     **Postphenomenology** Don Ihde,1995-06-21 Postphenomenology is a fascinating investigation of the relationships between global culture and technology The impressive range of subjects to which Don Ihde applies his skill as a phenomenologist is unified by what he describes as a concern which arises with respect to one of the now major trends of Euro American philosophy its textism He adds I show my worries to be less about the loss of subjects or authors than I do about there not being bodies or perceivers     **A Transdisciplinary, Engaged, Phenomenological Investigation of Dwelling and Landscape Language** Andrew Turk,2024-09-06 This book includes revised dissertation chapters from the author s second PhD which was awarded in 2020 by Murdoch University Australia It also includes three chapters summarising recent developments This was an innovative transdisciplinary research project using phenomenology as the over arching meta paradigm The investigation involved collaborations and literature reviews across numerous disciplines including philosophy geography ethnoecology sociology and cultural studies The book discusses three landscape language ethnophysiography case studies with Indigenous peoples in Australia and the USA It features a detailed discussion of transdisciplinarity and provides a comprehensive example of how this approach can be applied to complex dwelling relationships which people from different cultures have with specific topographic environments turning terrain into landscape It involves using phenomenology as a transdisciplinary meta paradigm and describes phenomenological methods for integrating physical and social sciences including an analysis of the worldviews of Indigenous peoples for example Manyjilyjarra Jukurrpa as Heideggerian topology     **The Phenomenology of Man and of the Human Condition** Anna-Teresa Tymieniecka,2012-12-06     **The Body and the Screen** Kate Ince,2017-01-12 Winner of the British Association of Film Television and Screen Studies Best Book Prize 2018 Since the 1980s the number of women regularly directing films has increased significantly in most Western countries in France Claire Denis and Catherine Breillat have joined Agn s Varda in gaining international renown while British directors Lynne Ramsay and Andrea Arnold have forged award winning careers in feature film This new volume in the Thinking Cinema series draws on feminist philosophers and theorists from Simone de Beauvoir on to offer readings of a range of the most important and memorable of these films from the 1990s and 2000s focusing as it does so on how the films convey women s lives and identities Mainstream entertainment cinema traditionally distorts the representation of women objectifying their bodies minimizing their agency and avoiding the most important questions about how cinema can do justice to female subjectivity Kate Ince suggests that the films of independent women directors are progressively redressing the balance reinvigorating both the narratives and the formal ambitions of European cinema Ince uses feminist philosophers to interpret such films as Sex Is Comedy Morvern Callar White Material and Fish

Tank anew suggesting that a philosophical understanding of female subjectivity as embodied and ethical should underpin future feminist film study

**Controversies and Interdisciplinarity** Jens Allwood, Olga Pombo, Clara Renna, Giovanni Scarafile, 2020-10-15 Nowadays the forms assumed by knowledge indicate an unhinging of traditional structures conceived on the model of discipline Consequently what was once strictly disciplinary becomes interdisciplinary what was homogeneous becomes heterogeneous and what was hierarchical becomes heterarchical When we look for a matrix of interdisciplinarity that is to say a primary basis or an essential dimension of all the complex phenomena we are surrounded by we see the need to break with the disciplinary self restraint in which often completely inadvertently many of us lock ourselves up remaining anchored to our own competences ignoring what goes beyond our own sphere of reference However interdisciplinarity is still a vague concept and a much demanding practice It presupposes the continuous search for convergent theoretical perspectives and methodologies and the definition of common spaces and languages as well as a true dialogical and open mind of several scholars From ethics to science from communication to medicine from climate change to human evolution the volume *Controversies and Interdisciplinarity* offers a series of original insights beyond disciplinary fragmentation for a new knowledge model
