**Organisation in the European Union** Michelle Hollman, 2018-06-14 The investigation of the internal workings of interest groups opens the view on the behavioural dynamics within these organisations By analysing their intraorganisational structures this book explains how groups prepare to become active in the European Union and why we observe contact conflict and cooperation of interest groups and other political actors in the European arena The book presents four causal mechanisms which explain on the one hand why interest groups engage with contacts across a diverse set of political actors and on the other hand why some interest organisations are more actionable at the European level than others It furthermore elaborates a typology of interest groups along intraorganisational criteria The analysis of twelve differing case studies provides a rich empirical ground to explain how and why certain intraorganisational processes unfold within interest groups It thereby sheds light on the behavioural organisational patterns which drive interest group agency in European multi level politics This book will be of key interest to students and scholars of interest groups lobbying European Union politics and more broadly to public policy administration and comparative politics Democracy and Lobbying in the European Union

*Political Representation in the European Union* Sandra Kröger, 2014-04-03 In recent years the financial and economic crisis of 2008-9 has progressed into an equally important political and democratic crisis of the EU These troubled times have set the framework to re-assess a number of important questions in regard to representative democracy in the EU such as the normative foundation of political representation the institutional relationship between representatives and represented the link between democracy and representation and new arenas and actors This book examines the diverse avenues through which different sorts of actors have expressed their voices during the Euro crisis and how their various interests are translated into the decision making process It offers a state of the art assessment of what political representation means in this context as well as a contribution to the representative turn in democratic theory The authors address three key themes The main actors and channels of political representation in the EU Interlocking levels of representation in the EU and the way in which national and supranational representation works How the European institutional system represents EU citizens through law and administration Focusing on the importance of representation in the legitimization of democracy this book will be of interest to students and scholars of European Union politics European studies democratic theory representation studies civil society and transnational democracy **Interest Group Politics in Europe** Jan Beyers, Rainer Eising, William A.

Maloney, 2013-09-13 Interest organizations have always assumed a prominent place in European politics because they link

states with citizens institutionalize the resolution of social conflicts regulate important sectors of the economy and society contribute to workable policy outcomes and socialize members into democratic politics However the plethora of interest group studies that exist have not consolidated our understanding of these actors These analyses have been subject to the vagaries of different theoretical perspectives and vary greatly in their conceptual and methodological frameworks Consequently a not always complementary and fragmented series of findings has emerged This book is a systematic and comprehensive effort at investigating and integrating the state of the art in European interest group research Combining the analysis of interest group politics in the EU with the comparative study of interest organizations the book seeks to identify the areas about which there is consolidated knowledge that are marked by controversies in which considerable uncertainty exists that have been omitted from research programs and that ought to be part of future studies Thereby it provides a general reflection on how the study of interest group politics can be improved by linking it to the comparative study of governance This book was published as a special issue of West European Politics

**The European Union** Ingeborg Toemmel, 2017-08-24 The European Union affects the lives of Europeans in many and varied ways yet in spite of its reach it often appears a constrained political system struggling for internal consensus reliant on the agreement of national governments and hampered by the scepticism of electorates These issues have become even more acute in the wake of the global economic and eurozone crises This new text provides a concise and up to date introduction to the nature of the European Union giving an account of its evolution and structure that makes sense of its current challenges The text analyses the EU's institutional structure and decision making procedures and highlights the manifold conflicts as well as the sophisticated mechanisms for consensus building among the core institutions It explains the ways in which the EU differs from other forms of political order and how this leads to political processes that are characterized by cooperation and conflict In providing this context the author invites readers to a critical assessment of the functioning of the European Union and of the implications of this for its democratic legitimacy and future prospects

**Britain and the European Union** Andrew Geddes, 2013-01-15 Britain's relationship with the EU has always been riddled with doubt scepticism and awkwardness This much needed new book examines why how and with what effect the EU has become such a contentious issue in UK politics It places the debate in historical context by

starting with an overview of debates about membership in the 1950s and 1960s and then goes on to examine the impact of Britain's membership since 1973 across core policy areas including economic and monetary union agriculture and foreign and security policy Andrew Geddes outlines major changes in the scope of the European project and assesses how central devolved and local governments have responded to the EU The book also assesses the EU's impact on domestic policies assessing debates within and between the main parties and charting the rise of Euroscepticism as a key trend in contemporary British politics Engagingly written this text provides a comprehensive and up to date analysis both of the EU's impact on Britain and of Britain's contribution to the EU The Political Influence of Business in the European Union

Andreas Dur,David Marshall,Patrick Bernhagen,2019-02-28 Many citizens politicians and political activists voice concern about the political influence of business in the European Union But do business interests really pull the strings in Brussels Contrary to expectations this book shows that business interests are no more influential than other interests in shaping contemporary EU policies Andreas D r David Marshall and Patrick Bernhagen present an original argument that stresses the role of public actors in facilitating or impeding interest groups lobbying success Novel data on a large number of legislative proposals on the EU's agenda and three case studies present strong support for this argument The Political Influence of Business in the European Union offers new insights into how lobbying success depends on the demand and supply of information as well as new ideas on how to measure lobbying success The book advances a fresh perspective on the question of business power and shows why business interests often lose in the policy struggle **The State of the European**

**Union, 6** Tanja A. Börzel,Rachel A. Cichowski,2005-08-04 Law Politics and Society is the sixth and latest addition to the European Union Studies Association series State of the European Union The contributors of this volume take the dynamic interaction between law politics and society as a starting point to think critically about recent developments and future innovations in European integration and EU studies The book provides an overview of key events between 2000 and 2002 in the European Union while illuminating how these institutional formal legal developments impact ordinary individuals and EU politics For example the European Convention with the possibility of an EU constitution is viewed not only as a new institutional development but we examine what impact the creation of judicially enforceable rights has for Europeans and European integration How does the opportunity for new rights claims alter the balance of power between individuals and EU organizations such as the European Court of Justice vis vis national governments in EU policy expansion Importantly the volume also seeks to provide a unique and interdisciplinary approach to studying the European Union by bringing together both legal scholars and political scientists Chapter contributors offer readers both sophisticated theoretical and empirical accounts of these new developments Issues such as enlargement immigration reform and monetary union require not only a precise understanding of an increasingly complex set of formal legal rules the domain of legal scholars but equally important are the effects on ordinary citizens and political participation the very power struggles that concern political scientists This

volume seeks to integrate these two approaches not only by including the scholarship in a single volume but by asking individual contributors to think outside their respective disciplines The division between the legal and political as many would argue is often both artificial and unproductive Our volume seeks to bridge this divide *European Union Politics* Michelle Cini, Nieves Pérez-Solórzano Borragán, 2019 Subject This sixth edition of *European Union Politics* builds on the success of the previous five editions by retaining and updating the chapters published in the previous version of the book Innovations in this edition include a new chapter on Brexit and a section on the migration crisis in Chapter 22 Preface
