Joseph Fruscione, Kelly J. Baker, 2018-10-17 Not every PhD becomes a professor Some never want to but others discover too late and ill prepared to look elsewhere that there s precious little room in today s ivory tower and what s there might not be a good fit For those leaving academia or wanting out or finding themselves adrift this book offers hope advice and a bracing look at how others facing the same quandary have made careers outside of the academy work All of the authors in this volume as well as the editors have built successful careers beyond the groves of academia as freelance editors and writers consultants and lecturers librarians realtors and entrepreneurs and each has a compelling story to tell Their accounts afford readers a firsthand view of what it takes to transition from professor to professional They also give plenty of practical advice along with hard won insights into what making a move beyond the academy might entail emotionally intellectually and not least financially Imparting what they wish they d known during their PhDs these writers aim to spare those who follow in their uncertain footsteps Together their essays point the way out of the tenure track or bust mindset and toward a world of different but no less rewarding possibilities Learning Outside the Academy Richard Edwards, Jim Gallacher, Susan

Whittaker, 2006-11-22 This book weaves together different strands of research in the area of lifelong learning that concentrates particularly on learning in alternative settings and ways such experiential learning and informal and community learning Drawing upon international research the book examines how these strands of research can contribute to each other The contributions to this book are based on material presented at a conference at the Centre for Research in Lifelong Learning UK and they focus on research into key issues of policy and practice in lifelong learning Establishing a wider framework for debate about the meaning and significance of lifelong learning this timely and thought provoking book provides practitioners in the field with a relevant and current discussion on some very important ideas about non formal education

Qualitative Inquiry Outside the Academy Norman K Denzin, Michael D Giardina, 2016-06-16 This volume of plenary addresses and other key presentations from the 2013 International Congress of Qualitative Inquiry shows how scholars convert inquiry into spaces of advocacy in the outside world The original chapters engage in debate on how qualitative research can be best used to advance the causes of social justice while addressing racial ethnic gender and environmental disparities in education welfare and health care Twenty contributors from six countries and multiple academic disciplines present models cases and experiences to show how qualitative research can be used as an effective instrument for social change Sponsored by the International Congress of Qualitative Inquiry **Global Challenges, Local Responses in**

Higher Education Branković Jelena, Manja Klemenčić, Predrag Lažetić, Pavel Zgaga, 2014-05-05 The volume offers state of the art contributions in the intersection of academic profession research training and institutional governance They reflect the profound interest of contemporary researchers in the questions of how the contemporary higher education reforms across Europe affect university governance and especially the roles and functions of academics The volume includes several contributions from the peripheral and developing higher education systems of Central and South East Europe hence attempting to rebalance the European profile of higher education research and at the same time contribute to the most salient debates in the field This book confirms once again that the higher education research landscape is a diverse and rich one At the same time these diverse cases have at least one commonality the fact that even though they are located in different higher education systems they address issues that albeit as a rule context specific can be found in all parts of Europe and beyond Certainly the local responses to the hereby addressed global challenges represent a mere snapshot of a broader landscape the European higher education dynamics is Temporary higher education reforms across Europe affect university governance and especially the roles and functions of academics The volume includes several contributions from the peripheral and developing higher education systems of Central and South East Europe hence attempting to rebalance the European profile of higher education research and at the same time contribute to the most salient debates in the field This book confirms once again that the higher education research landscape is a diverse and rich one At the same time these diverse cases have at least one commonality the fact that even though they are located in different higher education systems they address issues that albeit as a rule context specific can be found in all parts of Europe and beyond Certainly the local responses to the hereby addressed global challenges represent a mere snapshot of a broader landscape the European higher education dynamics is

The Still Divided Academy Stanley Rothman, April Kelly-Woessner, Matthew Woessner, 2010-12-16 The Still Divided Academy is a wonderful examination of the academic community that shows their inner workings by addressing a broad range of issues including academic politics tenure perceived and real political imbalance academic freedom and diversity Administrators professors and students have very different priorities values and expectations and therefore often have conflicting opinions on these issues Drawing on data collected in a specially commissioned public opinion survey as well as other recent research on higher education Rothman Kelly Woessner and Woessner create an incredibly readable presentation of both the similarities and differences between those running our universities and those attending them The authors manage to remain impressively neutral instead they give us a fuller perspective of the people on our college campuses

The Future of American Higher Education Joseph L. DeVitis, 2023-07-03 This impressive anthology presents the reader with an introduction to a gallery of public intellectuals through the critical eyes of a wide array of contributing writers from various academic fields Both the latter and the public intellectuals themselves are responding to the state of American higher education Importantly most of them there are a few public intellectuals in the book who cling closer to the status quo do not separate colleges and universities from the political economic and social currents of American society They attack the realities of growing social inequality the intractable presence of institutional racism and the recurrent reliance on the free market as the arbiter of value Public intellectuals assess the impact of these social factors on the organization and practices of contemporary American higher education They force the reader to consider serious challenges to the current arrangement of higher learning and as such they ask us to assess the efficacy of their respective perspectives Do they present the reader with insight or idealism pathways or dead ends This compendium provides an abundance of ideas for higher education leaders policy makers faculty members trustees and governmental officials as well as social theorists and graduate students interested in higher education careers Richard Guarasci President Emeritus of Wagner College Just as our society is polarized higher education is no less divided as to its mission and purpose whether it should be preparing students for employment or for engagement as citizens whether it should be corporatist and profit driven or promote intellectual curiosity and independent thinking and whether it should pursue a neoliberal agenda or promote a liberal education Whose scholarship culture and epistemologies should be validated Should it be a private or a public good Preserve tenure or erode it What role should colleges and universities play in addressing economic inequality and systemic racism The answers to these questions are critical for the future of our society as our universities and colleges are the nurseries of the values and philosophies that shape it The chapters in this book

review the contributions of seventeen public intellectuals who have been at the forefront of these issues and significantly contributed to these debates Each describes the genesis of each scholar's ideas and presents and critiques his or her core insights and arguments The seventeen public intellectuals represent a spectrum of opinion from the conservative to the progressive At this pivotal moment when much of higher education is in economic crisis and public trust in it has been eroded this book offers a robust entry point for considering the options and directions ahead for anyone in a leadership position The book will also be valuable for higher education courses to stimulate debate about these critical issues and introduce readers to the seminal thinkers in the field Public Intellectuals Presented Stanley Aronowitz Michael B. Academic Leadership and Governance of Higher Education James T. Harris, Jason E. Lane, Jeffrey C. Sun, Gail F. Baker, 2023-07-03 Winner of the 2012 ASHE CAHEP Barbara Townsend Lecture Award To prosper and thrive in an increasingly unpredictable national and global environment U.S. higher education will need to adapt innovate and evolve once again as it has during every major societal change over the past four centuries The purpose of this new edition published a turbulent decade after the first is to provide institutional leaders from department chairs to trustees with a broad understanding of the academic enterprise strategic guidance and key principles to assist them in navigating the future and drive the success of their institutions as they confront the unimaginable Recognizing that the hallmark of higher education in the U.S. is the diversity of institution types each of which is affected differently by external and internal influences the authors provide examples and ideas drawn from the spectrum of colleges and universities in the not-for-profit sector This book covers the major functions and constituent departments and units within institutions the stakeholders from students and faculty through the echelons of administration the external environment of elected officials foundations philanthropists and the new changing media and innovations in teaching technology data analytics legal frameworks as well as economic demographic and political pressures The book is informed by the proposition that adhering to four principles which the authors identify as having enabled institutions of higher education to successfully navigate ever-changing and volatile pasts will enable them to flourish in the coming decades The four principles are 1 Be mission-centric by making all key decisions based on a core mission and set of values 2 Be able to adapt to environmental change in alignment with the mission and core values 3 Be committed to democratic ideals by seeking to promote them and modeling democratic practices on and off campus 4 Be models for inclusion equity and positive social change *Deepening Community Engagement in Higher Education* A. Hoy, M. Johnson, 2013-09-18 This volume argues for reexamination of the field of community engagement suggests that the most effective way forward requires rethinking the structures of traditional higher education and points to the growing emergence of evidence-based best practices that can catalyze a renaissance in community engagement and in

higher education **The Gig Academy** Adrianna Kezar, Tom DePaola, Daniel T. Scott, 2019-10-29 Why the Gig Academy is the dominant organizational form within the higher education economy and its troubling implications for faculty students and the future of college education Over the past two decades higher education employment has undergone a radical transformation with faculty becoming contingent staff being outsourced and postdocs and graduate students becoming a larger share of the workforce For example the faculty has shifted from one composed mostly of tenure track full time employees to one made up of contingent part time teachers Non tenure track instructors now make up 70 percent of college faculty Their pay for teaching eight courses averages 22 400 a year less than the annual salary of most fast food workers In *The Gig Academy* Adrianna Kezar Tom DePaola and Daniel T Scott assess the impact of this disturbing workforce development Providing an overarching framework that takes the concept of the gig economy and applies it to the university workforce this book scrutinizes labor restructuring across both academic and nonacademic spheres By synthesizing these employment trends the book reveals the magnitude of the problem for individual workers across all institutional types and job categories while illustrating the damaging effects of these changes on student outcomes campus community and institutional effectiveness A pointed critique of contemporary neoliberalism the book also includes an analysis of the growing divide between employees and administrators The authors conclude by examining the strengthening state of unionization among university workers Advocating a collectivist action oriented vision for reversing the tide of exploitation Kezar DePaola and Scott urge readers to use the book as a tool to interrogate the state of working relations on their own campuses and fight for a system that is run democratically for the benefit of all Ultimately *The Gig Academy* is a call to arms one that encourages non tenure track faculty staff postdocs graduate students and administrative and tenure track allies to unite in a common struggle against the neoliberal Gig Academy **Council of Organization and Others for Education About Parochialism, Inc. v. Governor, 455 MICH 557 (1997)** ,1997 106092 106094 106106 106111 *Doing Feminisms in the Academy* Fiona Mackay, Krishna Menon, Radhika Govinda, Rukmini Sen, (eds.), 2020-11-02 This collection of essays brings together auto ethnographic critical and comparative reflections on doing feminisms in the academy in contemporary India and the UK Written by emergent and seasoned academics from a range of disciplinary social and geo political locations these essays explore the transformative potential dilemmas and challenges of teaching learning researching and working as feminist academics By engaging with questions of identity and difference institutional and classroom pedagogies reflexivity and accountability and the production and circulation of feminist and non feminist knowledge the essays in this collection also provide the frame and the lens through which to view the wider landscape of contemporary higher education Anchored in feminist scholarship and written in an accessible style the collection will be useful to those interested in feminist women s and gender studies and more broadly those keen to pursue equality in higher education and decentring of knowledge production globally *Making the World Global* Isaac A. Kamola, 2019-06-07 Following World War II the American

government and philanthropic foundations fundamentally remade American universities into sites for producing knowledge about the world as a collection of distinct nation states As neoliberal reforms took hold in the 1980s visions of the world made popular within area studies and international studies found themselves challenged by ideas and educational policies that originated in business schools and international financial institutions Academics within these institutions reimagined the world instead as a single global market and higher education as a commodity to be bought and sold By the 1990s American universities embraced this language of globalization and globalization eventually became the organizing logic of higher education In *Making the World Global* Isaac A Kamola examines how the relationships among universities the American state philanthropic organizations and international financial institutions created the conditions that made it possible to imagine the world as global Examining the Center for International Studies Harvard Business School the World Bank the Social Science Research Council and NYU Kamola demonstrates that how we imagine the world is always symptomatic of the material relations within which knowledge is produced *Surviving the Academy* Danusia Malina, Sian Maslin-Prothero, 2003-09-02 This text brings together writing and research on feminist experience in academia It covers issues such as provision of care maternalism in the academy and dynamics of interaction between women in higher education There are challenging and provocative analyses of many questions how large is the gap between rhetoric and reality in HE institutions how do institutions behave towards disabled staff how far is stereotyping still affecting the roles which women play in academia what do women face when they combine motherhood with teaching or studying coping mechanisms and survival tactics are brought under scrutiny and the effect these have on the behaviour of female academics and their interactions with the institution of each other This text should provide insight and evidence for researchers to further develop their own theories and also many starting points for those wishing to undertake their own research Written in collaboration with the Women in Higher Education Network [Accredited Higher Institutions](#), 1956 **The Rise of Women in Higher Education** Gary A. Berg, 2019-11-28 The story of the American university in the past half century is about the rise of women in participation as students faculty members college athletes and in subsequently changing the overall university culture for the better Now almost sixty percent of the overall college student population in America is female and still growing By the year 2000 women surpassed men worldwide in attendance at higher education institutions At the same time after years of a disproportionate dominant male professoriate female faculty members are now becoming the majority of university professors While top university presidents are still largely male women have achieved real gains in the overall administrative ranks and trustee positions In all areas of the university disparities still exist in terms of compensation and balance in key areas of the academy but the overall positive trend is clear Few to this date have recognized and chronicled this extraordinary change in college education one of society's fundamental and influential institutions For universities the test for the future is to make the changes needed in broad areas within higher education from financial aid to curriculum student activities and overall campus

culture in order to better foster a newly empowered majority of women students

The Internationalization of the

Academy Futao Huang, Martin Finkelstein, Michele Rostan, 2013-10-25 This volume provides a nuanced empirical assessment of the extent to which the academic profession is internationalized at the beginning of the 21st century It indicates which are the most internationalized academic activities and focuses on specific topics such as physical mobility for study or professional purposes teaching abroad or in another language research collaboration with foreign colleagues and publication and dissemination outside one's native country or in another language It places the main theme in the wider context of the history of higher education's internationalization It provides explanations on what drives and deters academics from international activity and documents some of the consequences that internationalization has on academic work and productivity This study is based on a survey of 25 000 academics working at higher education institutions in 18 countries and Hong Kong on five continents Comparing data from the 1992 Carnegie International study to the 2007 CAP survey relying on respondents' perceptions of change and comparing different academic generations it offers valuable insights on changes in the internationalization of the academy
