County Janet C. Pittard,2019-04-18 When Ashe County Memorial Hospital opened in November 1941 it was the realization of
a dream for the poor sparsely populated county in the mountains of northwestern North Carolina Building a hospital is a
major undertaking for any community at any time Accomplishing this in the waning days of the Great Depression and on the
brink of World War II while scant local resources were taxed by catastrophic floods and severe snows was a remarkable feat
of community organization This is the story of the generations of supporters doctors nurses emergency personnel and others
whose lives are interwoven with regional health care and the planning building and operation of the new Ashe Memorial
Hospital This legacy brought to life through 114 photographs and personal interviews with 97 individuals traces the
development of health care in a remote Appalachian community from the days of folk remedies and midwives to horseback
doctors and early infirmaries to the technological advances and outreach efforts of today s Ashe Memorial Hospital

Morreim,2001-08-16 Health care in the US and elsewhere has been rocked by economic upheaval Cost cuts care cuts and
confusion abound Traditional tort and contract law have not kept pace Physicians are still expected to deliver the same
standard of care including costly resources to everyone regardless whether it is paid for Health plans can now face litigation
for virtually any unfortunate outcome even those stemming from society s mandate to keep costs down while improving
population health This book cuts through the chaos and offers a clear persuasive resolution Part I explains why new
economic realities have rendered prevailing malpractice and contract law largely anachronistic Part II argues that pointing
the legal finger of blame blindly or hastily can hinder good medical care Instead of whom do we want to hold liable we should
focus first on who should be doing what for the best delivery of health care When things go wrong each should be liable only
for those aspects of care they could and should have controlled Once a good division of labor is identified what kind of
liability should be imposed depends on what kind of mistake was made Failures to exercise adequate expertise knowledge

skill care effort should be addressed as torts while failures to provide promised resources should be resolved under contract Part III shows that this approach though novel fits remarkably well with basic common law doctrines and can even enlighten ERISA issues With extensive documentation from current case law commentary and empirical literature the book will also serve as a comprehensive reference for attorneys law professors physicians administrators bioethicists and students **The U.S. Healthcare Certificate of Need Sourcebook** Robert James Cimasi,2005 A state by state analysis of the certificate of need statutes regulations case law and key state health department personnel *Reports Made to the Senate and House of Representatives of the State of Illinois* Illinois,1888 **Health Care Industry Consolidation** United States.
