Bortz, 2016-04-29 The growing levels of income inequality an explosion of global financial flows and a worldwide decline of economic growth have

combined to challenge accepted economic wisdom Utilizing a heterodox approach Pablo G Bortz provides a fresh look for understanding the interaction between these three factors while identifying challenges and possible alternatives for an expansionary and progressive economic policy Reviewing several schools of thought Inequality Growth and Hot Money explores the risks generated by capital flows and the limitations they impose on progressive economic policies Professor Bortz then provides instruments and alternatives to pursue an expansionary and equalitarian program including theoretical contributions to enrich heterodox and progressive economics Standout features of this book include a review of the challenges that financial flows pose for developing countries a redefinition of the role of capital controls a policy approach that separates interest rate policies from a broader credit policy and a rejection of the negative relationship between a more egalitarian income distribution and sustained economic expansion Expanding the Kaleckian approach to include financial flows this accessible introduction to heterodox growth models will be appreciated by graduate students and committed heterodox economists Research departments at official institutions such as central banks may also be interested specifically in the book s models and policy prescription
