Bondage of Boundaries and Identity Politics in Postcolonial Africa J. Ndlovu-Gatsheni, Brilliant Mhlanga, 2013 What has confounded African efforts to create cohesive prosperous and just states in postcolonial Africa What has been the long term impact of the Berlin Conference of 1884-5 on African unity and African statehood Why is postcolonial Africa haunted by various ethno national conflicts Is secession and irredentism the solution Can we talk of ethno futures for Africa These are the kinds of fundamental questions that this important book addresses Sabelo J Ndlovu Gatsheni and Brilliant Mhlanga's book introduces the metaphor of the northern problem to dramatise the fact that there is no major African postcolonial state that does not enclose within its borders a disgruntled minority that is complaining of marginalization domination and suppression The irony is that in 1963 at the formation of the OAU postcolonial African leaders embraced the boundaries arbitrarily drawn by European colonialists and institutionalised the principle of inviolability of bondage of boundaries thereby contributing to the problem of ethno national conflicts The successful struggle for independence of the Eritrean people and the secession of South Sudan in 2011 have encouraged other dominated and marginalised groups throughout Africa to view secession as an option Ndlovu Gatsheni and Mhlanga successfully assembled competent African scholars to deal exhaustively with various empirical cases of ethno national conflicts throughout the African continent as well as engaging with such pertinent issues as Pan Africanism as a panacea to these problems This important book delves deeper into complex issues of space languages conflict security nation building war on terror secession migration citizenship militias liberation violence and Pan Africanism

Criminal Justice Procedure Stacy Moak, Ronald L. Carlson, 2012-12-31 Criminal Justice Procedure gives clear guidance on the most common questions faced by today's law enforcement offering fresh look at 21st century pre trial protocol Unlike other case books this newly revised edition eschews legal theory in favor of the practical know how needed to not to parse but apply

criminal law Emphasis has been placed on just exactly how practitioners should conduct hot button procedures such as airport and border searches Moreover the book also addresses the often dire implications of deviating from proper practice how a false step can translate into a violation of individual rights or the inability to successfully prosecute the guilty This edition has been specifically designed for CJ undergraduate programs rather than higher level law schools and completely reorganized for a more logical flow of topics Moreover it is newly focused on the most crucial practical applications of the law in the CJ context There is also added emphasis on the Fourth Fifth and Sixth Amendments Renewed emphasis on information needed by CJ undergraduates and practitioners rather than law students Includes a completely reorganized more logical table of contents that supports the development of those reasoning and critical thinking skills needed to put the law in action Added pedagogy and a much richer set of accompanying online resources help students apply case law to other sets of facts

The Life of Isaac Ingalls Stevens Hazard Stevens,1900 [Sovereignty and Jurisdiction in Airspace and Outer Space](#) Gbenga Oduntan,2011-09-12 Sovereignty and jurisdiction are legal doctrines of a complex nature which have been subject to differing interpretations by scholars in legal literature The tridimensionality of state territory recognised under customary international law subsists until the present but there are other territories that do not or cannot belong to any state or political entity which also must be accounted for in legal theory The issues surrounding sovereignty and jurisdiction are likely to become ever more pressing as globalisation growing pressure on resources and the need for energy and national security become acute and the resolution of special delimitation disputes seems likely to become a vital question in the twenty first century As a result of the fast pace of technological developments in air and space activities and the massive increases in air transportation satellite communications and space exploration the need for scholars and practitioners to sharpen their appreciation of the legal and political issues becomes crucial This book will focus primarily on the issues of sovereignty jurisdiction and control in airspace and outer space and their effects on public and private activities but it will also look at related issues pertaining to the Seas and Antarctica Commercial exploitation resource control and the international regime regulating contractual obligations in relation to transportation of goods and services over all forms of territory will be examined to the extent that they are necessary to explain jurisdictional rights and duties over territory Older

problems of international law such as crimes in the air and airspace trespass are treated along with newer developments such as space tourism as well as growing demand for private ownership and involvement in outer space exploitation The book goes on to consider the distinction between airspace and outer space and puts forward legal criteria which would allow for the resolution of the spatial delimitation dispute These criteria would determine where in spatial terms the exclusive sovereignty of airspace ends and where outer space the province of all mankind begins and contribute to the jurisprudence of territorial sovereignty and jurisdiction

The Joint Chiefs of Staff and the War in Vietnam, 1960-1968: 1960-1968 (pt. 2) Graham A. Cosmas, 2009 Pt 1 This volume describes those JCS activities related to developments in Vietnam during the period 1960-1963 when the United States expanded its initial military commitment to Southeast Asia In 1960 the United States increased its military advisory strength in South Vietnam in response to increased Communist infiltration and to more sustained guerrilla attacks in the south and its contingency planning effort to deploy regular US forces to both Laos and South Vietnam to counter any threat by Communist Army units from the north or from China President Kennedy's called for a new emphasis upon guerrilla warfare at first received only lukewarm support from the Joint Chiefs of Staff After the failed Bay of Pigs episode very early in the Kennedy administration the President lost faith in the advice of the Joint Chiefs of Staff and appointed General Maxwell Taylor to serve as his intermediary with the Joint Chiefs until he assumed the Chairman responsibilities in October 1962 The Kennedy administration's policy was marked by clashes between factions in the Defense Department including the Joint Chiefs of Staff the State Department and the White House By 1963 these differences involved the support the US should provide for the Republic of Vietnam under its President Ngo Dinh Diem The history ends with the killing of Diem by a coup followed by the coincidental murder of President Kennedy a short time later
