Crime Modeling and Mapping Using Geospatial Technologies Michael Leitner, 2013-01-19 Recent years in North America have seen a rapid development in the area of crime analysis and mapping using Geographic Information Systems GIS technology In 1996 the US National Institute of Justice NIJ established the crime mapping research center CMRC to promote research evaluation development and dissemination of GIS technology The long term goal is to develop a fully functional Crime Analysis System CAS with standardized data collection and reporting mechanisms tools for spatial and temporal analysis visualization of data and much more Among the drawbacks of current crime analysis systems is their lack of tools for spatial analysis For this reason spatial analysts should research which current analysis techniques or variations of such techniques that have been already

successfully applied to other areas e.g. epidemiology, location allocation analysis etc. can also be employed to the spatial analysis of crime data. This book presents a few of those cases.

Streets Reconsidered Daniel Iacofano, Mukul Malhotra, 2018-10-26 Streets Reconsidered is a fundamental rethinking of America's streets. It explores the future of streets and what America's roadways could be if they were designed for living instead of just driving. The book includes detailed design guidelines, fully illustrated four-color case studies of successful streets from around the world, a new paradigm of streets designed to promote human functions, turning new design ideas into a series of best practices that can be applied to any community. What would streets look like if they accommodated people of all ages and abilities, promoted healthy urban living, social interaction, and business, the movement of people and goods, and regeneration of the environment? Streets Reconsidered pushes beyond the current standards, focusing on the planning, design, and construction of streets as a method for improving our built environment for everyone. The book is organized by the functions of a street: mobility, way finding, commerce, social gathering, events, and programming, play, and recreation, urban agriculture, green infrastructure, and image and identity. Streets Reconsidered is the essential resource for city planners, urban designers, developers, architects, landscape architects, policymakers, and community members who share a passion for great urban human spaces.

London Labour and the London Poor Henry Mayhew, 1851

London Labour and the London Poor Henry Mayhew, 2009-01-01 Assembled from a series of newspaper articles first published in the newspaper Morning Chronicle throughout the 1840s, this exhaustively researched, richly detailed survey of the teeming street denizens of London is a work both of groundbreaking sociology and salacious voyeurism. In an 1850 review of the survey just prior to its initial book publication, William Makepeace Thackeray called it "tale of terror and wonder, offering a picture of human life so wonderful, so awful, so piteous and pathetic, so exciting and terrible that readers of romances own they never read anything like to it." Delving into the world of the London street folk, the buyers and sellers of goods, performers, artisans, laborers, and others, this extraordinary work inspired the socially conscious fiction of Charles Dickens in the 19th century as well as the urban fantasy of Neil Gaiman in the late 20th. Volume I explores the lives of the wandering tribes, costermongers, sellers of fish, fruits, and vegetables, sellers of books and stationery, sellers of manufactured goods, women, and children on the streets, and more.
