Singer, 2012-04-27 Teaching Global History challenges prospective and beginning social studies teachers to formulate their own views about what is important to know in global history and why It explains how to organize the curriculum around broad social studies concepts and themes and student questions about humanity history and the contemporary world All chapters include lesson ideas a sample lesson plan with activity sheets primary source documents and helpful charts graphs photographs and maps High school students responses are woven in throughout Additional material corresponding to each chapter is posted online at http://people.hofstra.edu/alan_j_singer The traditional curriculum tends to highlight the Western heritage and to race through epochs and regions leaving little time for an in depth exploration of concepts and historical themes for the evaluation of primary and secondary sources and for students to draw their own historical conclusions Offering an alternative to such pre packaged textbook outlines and materials this text is a powerful resource for promoting thoughtful reflection and debate about what the global history curriculum should be and how to teach it Historical Outlook ,1925 Normal Instructor and Primary Plans ,1926

Bolton and the Historiography of the Americas** Russell Magnaghi,1998-08-20 The comparative approach to the understanding of history is increasingly popular today This study details the evolution of comparative history by examining the career of a pioneer in this area Herbert E Bolton who popularized the notion that hemispheric history should be considered from pole to pole Bolton traced the study of the history of the Americas back to 16th century European accounts of efforts to bring civilization to the New World and he argued that only within this larger context could the histories of individual nations be understood After American entry into the Spanish American War in 1898 historians such as Bolton promoted the idea of comparative history and it remains to this day a significant historiographical approach Consideration of the history of the Americas as a whole dates back to 16th century European treatises on the New World Chapter one of this study provides an overview of pre Bolton formulations of such history In chapter two one sees the forces that shaped Bolton s thinking and brought about the development of the concept Chapters three and four focus upon the evolution of the approach through Bolton s history course at the University of California at Berkeley and the reception of the concept among Bolton s contemporaries Unfortunately Bolton never fully developed the theoretical side of his argument thus chapter five chronicles the decline of his ideas after his death The final chapter reveals the survival of the concept which is now embraced by a new generation of historians who are largely unfamiliar with Bolton s instrumental role in the promotion of comparative history
