increasingly difficult at the same time the call for culture is becoming more powerful This book explores the relationships between culture sustainability and regional change through the concept of territorialisation This new concept describes the dynamics and processes in the context of regional development driven by collective human agency that stretches beyond localities and marked off regional boundaries This book launches the concept of territorialisation by exploring how the natural environment and culture are constitutive of each other This concept allows us to study the characterisation of the natural assets of a place the means by which the natural environment and culture interact and how communities assign meaning to local assets add functions and ascribe rules of how to use space By highlighting the time space dimension in the use and consumption of resources territorialisation helps to frame the concept and grasp the meaning of sustainable regional development Drawing on an international range of case studies the book addresses both conceptual issues and practical applications of territorialisation in a range of contexts forms and scales The book will be of great interest to researchers and postgraduates in sustainable development environmental studies and regional development and planning *Wales*, 1913

Geographies Marko Krevs, 2021-10-21 This book defines and discusses the term hidden geographies in two ways

systematically and by presenting a variety of examples of the research fields and topics concerning hidden geographies with the aim of stimulating further basic and applied research in this area While the term is quite rarely used in the scientific literature more often as a figure of speech than to illustrate or problematize its deeper meaning we argue that hidden geographies are everywhere and many of them have significant impacts on other natural and social phenomena and processes subsequently triggering changes for example in landscape economy culture health or quality of life The introductory section of the book conceptualises hidden geographies and discusses cognitive geography symbolization of space and the hidden geographies in mystical literature Case studies of hidden environmental geographies address soils air pollution coastal pollution and the allocation of an astronomical tourism site Revealing hidden historical and sacred places is illustrated through examples of the visualisation of the subterranean mining landscape the analysis of the historical road network and trade border stones and historical spatial boundaries and the monastic Carthusian space Hidden urban geographies are discussed in terms of the urban development of an entire city presenting the role of geography in rescuing architecture revealing illegal urbanisation and the quality of habitation in Roma neighbourhoods Case studies of hidden population geographies shed light on the ageing of rural populations and the impact of spatial demographic disparities on fertility variations Discussions of hidden social and economic geographies problematize recent social changes and conflicts in

a country present the implementation of the fourth industrial revolution and borders as hidden obstacles in the organisation of public transport Hidden geographies are explicitly linked to perceptions and explanations in case studies that address local responses to perceived marginalisation in a city the solo women travellers perceived risk and safety and hidden geographical contexts of visible post war landscapes The book brings such a diversity of views ideas and examples related to hidden geographies that can serve both to deepen their understanding and their various impacts on our lives and environment and to attract further cross disciplinary interest in considering hidden geographies in research and in our every day lives

Welsh Gothic Jane Aaron, 2013-05-15 *Welsh Gothic* the first study of its kind introduces readers to the array of Welsh Gothic literature published from 1780 to the present day Informed by postcolonial and psychoanalytic theory it argues that many of the fears encoded in Welsh Gothic writing are specific to the history of Welsh people telling us much about the changing ways in which Welsh people have historically seen themselves and been perceived by others The first part of the book explores Welsh Gothic writing from its beginnings in the last decades of the eighteenth century to 1997 The second part focuses on figures specific to the Welsh Gothic genre who enter literature from folk lore and local superstition such as the sin eater c n Annwn hellhounds dark druids and Welsh witches

Welsh Dawn Gareth Thomas, 2014-07-01 A novel set in rural Wales explores the tensions within Welsh society in the 1950s tensions between Welsh and English speaking Wales between North and South between those who wanted to preserve their heritage and those who wanted prosperity at any cost between the generation who had experienced the war and the young people who see Wales within a wider European context

Railways and Industries in North East Wales & Deeside Rob Shorland-Ball, 2022-03-10 Rob Shorland Ball s researches for this book and several visits convinced him that he was putting together a jigsaw of facts No previously published account of the area have brought together these stories of iron industrial sites like Brymbo Iron and Steel Works and since 2003 the Airbus factory which makes 100ft long wings for Airbus 380s that are too long to be moved by rail A jigsaw indeed and this books puts together the pieces
