Leviathan Undone? Roger Keil,Rianne Mahon,2010-01-01 Caught in the trap of the nation state and frozen in postwar bloc logic critical political economy has been found wanting when it comes to problematizing space and scale Globalization and the rise of world cities and regions have shaken the discipline s foundations and fostered new interest in the concept of scale Leviathan Undone brings together leading theorists and scholars from a variety of disciplines to develop a new language to understand the spatial restructuring that has accompanied globalization By treating scale as the core concept of our time these innovative groundbreaking essays bring a new sensibility to classical and contemporary concerns in Canadian and international political economy *The Human Mosaic* Mona Domosh,Roderick P. Neumann,Patricia L. Price,2011-11-15 The classic text originated by Terry Jordan remains a bestselling classroom favorite continually offering students a cohesive framework for exploring both the defining core topics of human geography and the most important emerging issues in the field In the new edition authors Mona Domosh Roderick Neumann and Patricia Price offer their take on Terry Jordan s unique approach organizing each chapter around five essential themes Region Mobility Globalization Nature Culture Cultural Landscape Within this thematic approach the new edition offers fully updated coverage new features and pedagogy and new media options **Methods for Multilevel Analysis and Visualisation of Geographical Networks** Céline Rozenblat,Guy Melancon,2013-06-03 This leading edge study focuses on the latest techniques in analysing and representing the complex multi layered data now available to geographers studying urban zones and their populations The volume tracks the successful results of the SPANGEO Project which was set up in 2005 to standardize and share the syncretic multinational mapping techniques already developed by geographers and computer scientists SPANGEO sought new and responsive ways of visualising urban geographical and social data that reflected the fine grained detail of the inputs It allowed for visual representation of the large and complex networks and flows which are such an integral feature of the dynamism of urban

geography SPANGEO developed through the visual analytics loop in which geographers collaborated with computer scientists by feeding data into the design of visualisations that in turn spawned the urge to incorporate more varied data into the visualisation This volume covers all the relevant aspects from conceptual principles to the tools of network analysis and the actual results flowing from their deployment Detailed case studies set out in this volume include spatial multi level analyses of flows in airports and sea ports as well as the fascinating scientific networks in European cities The volume shows how the primary concern of geography the interaction of society with physical space has been revived by the complexities of new cartographical and statistical methodologies which allow for highly detailed mapping and far more powerful computer analysis of spatial relationships **Warfare Ecology** Gary E. Machlis, Thor Hanson, Zdravko Špirić, Jean E.

McKendry, 2011-06-06 The purpose of this book is specific and ambitious to outline the distinctive elements scope and usefulness of a new and emerging field of applied ecology named warfare ecology Based on a NATO Advanced Research Workshop held on the island of Vieques Puerto Rico the book provides both a theoretical overview of this new field and case studies that range from mercury contamination during World War I in Slovenia to the ecosystem impacts of the Palestinian occupation and from the bombing of coral reefs of Vieques to biodiversity loss due to violent conflicts in Africa Warfare Ecology also includes reprints of several classical papers that set the stage for the new synthesis described by the authors Written for environmental scientists military and humanitarian relief professionals conservation managers and graduate students in a wide range of fields Warfare Ecology is a major step forward in understanding the relationship between war and ecological systems *Hierarchical Organization in Society* James A.
