High Technology Industry Developments 1993:

The Rise, Decline and Renewal of Silicon Valley's High Technology Industry Dan Khanna, 2018-03-26 Originally published in 1997 this book examines the unique nature and characteristics of Silicon Valley and looks at the factors that led to the economic and competitiveness problems of the 1980s The research concluded that the information revolution caused a complex set of events that had global ramifications Silicon Valley was no longer operating as a driver of this revolution but it was facing the onslaught of the global competitiveness it had unleashed *Industrial Development, Technology Transfer, and Global Competition* Pierre-Yves Donze, 2016-10-14 The phenomena of Japan emerging as one of the most competitive industrial nations in the twentieth century and the general shift of competitiveness to East Asia since the 1980s have been widely studied by many scholars from different fields of the social sciences Drawing on sources from Japanese Swiss and American archives the historical analysis of this book tackles a wide range of actors and sheds light on the various processes that enabled Japanese watch companies to transfer technology and expand commercially starting in the second half of the nineteenth century By exploring the case of the watch industry this book serves to establish a better understanding of the origins of the competitiveness of Japanese manufacturing and its evolution until its decline in the post bubble economy in the 1990s and 2000s High-Technology Development in Regional Economic Growth Byung-Rok Choi, 2019-06-04 This title was first published in 2003 Korea has had considerable success in developing its high technology industries and these have become significant employers in this region By analysing the situation in Korea this book explores the effects of dynamic externalities on the growth of regional employment in the high technology industries It puts forward innovative simultaneous equation models to test three sets of hypotheses related to so called Jacobs and MAR effects differentiated by firm size organizational type and product Clear evidence is found for endogenous technological progress marked by positive feedback especially for small firms in diversified high technology enclaves There are technological externalities associated with knowledge spillovers and local employment has indirect effects on employment growth via dynamic externalities The implications for local economic development policy are outlined in a concluding section **Technological Change, Economic Development and Space** Cristoforo S. Bertuglia, Manfred M. Fischer, Giorgio Preto, 2012-12-06 The pressures of global competition are affecting regions throughout the world and making it increasingly necessary to understand the complex underlying mechanisms and the potential for innovation offered by new technology Success in economic restructuring depends not only on the technology itself but the professional and entrepreneurial skills available and the support of provided by institutions and information networks The very local nature these phenomena which are critical to the innovative propensity of firms operating within the region introduces an inevitable spatial dimension The time therefore seems ripe to bring together contributions from scholars working in different but related disciplines with the aim of investigating the triangular relationship between technological change economic development and space The present volume

offers a compact review of current theoretical developments and valuable insights deriving from recent empirical studies carried out both within Europe and elsewhere All those contributing to this volume are actively involved in research in the field Without their intellectual contribution and willingness to participate in this joint project the book would not have been possible We should like in addition to thank Angela Spence for her capable assistance in coordinating the various stages of preparation of the book as well as her translation work and careful linguistic editing Thanks also go to Paola Stasi for her meticulous copy editing and help in preparing the indices Their work has been invaluable in moulding together in a single volume contributions from so many different sources
