Local Area High Speed Networks Sidnie Feit, 2000 There is a great deal of change happening in the technology being used for local networks As Web intranets have driven bandwidth needs through the ceiling inexpensive Ethernet NICs and switches have come into the market As a result many network professionals are interested in evaluating these new technologies for implementation consideration If you are looking for advice from experts who can help you realistically compare and decide how to use the options before you Often books on this subject are too varied in subject matter attempting to cover too many subjects in the book This book addresses

the topic of Ethernet Networking from a planning perspective to a bit analysis of the Ethernet packets It explains in detail information in the new network administrator would find it necessary to know

Architecture and Protocols for High-Speed Networks Otto Spaniol, André Danthine, Wolfgang Effelsberg, 2013-06-29 Multimedia data streams will form a major part of the new generation of applications in high speed networks Continuous media streams however require transmission with guaranteed performance In addition many multimedia applications will require peer to multipeer communication Guaranteed performance can only be provided with resource reservation in the network and efficient multipeer communication must be based on multicast support in the lower layers of the network Architecture and Protocols for High Speed Networks focuses on techniques for building the networks that will meet the needs of these multimedia applications In particular two areas of current research interest in such communication systems are covered in depth These are the protocol related aspects such as switched networks ATM MAC layer network and transport layer and the services and applications Architecture and Protocols for High Speed Networks contains contributions from leading world experts giving the most up to date research available It is an essential reference for all professionals engineers and researchers working in the area of high speed networks

Protocols for High Speed Networks Georg Carle, Martina Zitterbart, 2003-08-01 This workshop on Protocols for High Speed Networks is the seventh in a successful series of international workshops well known for their small and focused target audience that provide a sound basis for intensive discussions of high quality and timely research work The location of the workshop has alternated between Europe and the United States at venues not only worth visiting for the workshop but also for the distinct impressions they leave on the participants The first workshop was held in 1989 in Zurich Subsequently the workshop was moved to Palo Alto 1990 Stockholm 1993 Vancouver 1994 Sophia Antipolis Nice 1996 and Salem 1999 In 2002 the workshop was hosted in Berlin the capital of Germany PfHSN is a workshop providing an international forum that focuses on issues related to high speed networking such as protocols implementation techniques router design network processors and the like Although the topics have shifted during the last couple of years for example from parallel protocol implementations to network processors it could be observed that high speed remains a very important issue with respect to future networking Traditionally PfHSN is a relatively focused and small workshop with an audience of about 60 participants

Protocols for High-Speed Networks VI Joseph D. Touch, James P.G. Sterbenz, 2013-03-14 1 This year marks the 10th anniversary of the IFIP International Workshop on Protocols for High Speed Networks PfHSN It began in May 1989 on a hillside overlooking Lake Zurich in Switzerland and arrives now in Salem Massachusetts 6 000 kilometers away and 10 years later in its sixth incarnation but still with a waterfront view the Atlantic Ocean In between it has visited some picturesque views of other lakes and bays of the world Palo Alto 1990 San Francisco Bay Stockholm 1993 Baltic Sea Vancouver 1994 the Strait of Georgia and the Pacific Ocean and Sophia Antipolis I Nice 1996 the Mediterranean Sea PfHSN is a workshop providing an international forum for the exchange of information on high speed

networks It is a relatively small workshop limited to 80 participants or less to encourage lively discussion and the active participation of all attendees A significant component of the workshop is interactive in nature with a long history of significant time reserved for discussions This was enhanced in 1996 by Christophe Diot and Walid Dabbous with the institution of Working Sessions chaired by an animator who is a distinguished researcher focusing on topical issues of the day These sessions are an audience participation event and are one of the things that makes PfHSN a true working conference

High Speed Networks and Multimedia Communications Zoubir Mammeri, Pascal Lorenz, 2004-09-21 Nowadays networks and telecommunications are two of the most active fields Research and development in these areas have been going on for some time reaching the stage of products The objectives of HSNMC 2004 International Conference on High Speed Networks and Multimedia Communications were to promote research and development activities and to encourage communication between academic researchers and engineers throughout the world in the areas related to high speed networks and multimedia communications The seventh edition of HSNMC was held in Toulouse France on June 30 July 2 2004 There were 266 submissions to HSNMC this year from 34 countries which were evaluated by program committee members assisted by external reviewers Each paper was reviewed by several reviewers One hundred and one papers were selected to be included in these proceedings The quality of submissions was high and the committee had to decline some papers worthy for publication The papers selected in this book illustrate the state of the art current discussions and development trends in the areas of networks telecommunication and multimedia applications The contributions published in this book underline the international importance of the related field of research They cover a variety of topics such as QoS in Diff-Serv networks QoS analysis and measurement performance modelling TCP modelling and analysis MPLS for QoS provision scheduling and resource allocation routing multicast security and privacy issues peer to peer applications video applications software and middleware for networks mobile networks mobility satellite mobile IP wireless networks WLAN ad hoc networks 3G UMTS IEEE 802

High-speed Networks William Stallings, 1998 Bestselling author William Stallings presents comprehensive up to date coverage of TCP performance design issues A high level overview of cutting edge network and Intranet design this book focuses on high speed technologies like routing for multimedia how to manage traffic flow and compression techniques for maximizing throughput

Performance of Distributed Systems and Integrated Communication Networks T. Hasegawa, H. Takagi, Y. Takahashi, 2014-06-28 This book explores new analytical techniques and tools for the performance evaluation of distributed and integrated computer communication systems The systems considered are those arising in LAN MAN WAN broadband ISDN and ATM switching These systems are mathematically modelled and analysed Analytical results are presented on the basic queueing models such as multi queue priority queue queueing network queue with bursty input and superposed input and multi server queue These results can be usefully applied for the performance evaluation of all the above systems

Asynchronous Transfer Mode Networks Yannis Viniotis, Raif O. Onvural, 2012-12-06 Broadband Integrated Services Digital Network B ISDN is conceived as an all purpose digital network supporting interactive and distributive services bursty and continuous traffic connection oriented and connectionless services all in the same network The concepts of ISDN in general and B ISDN in particular have been evolving since CCIIT adopted the rrst set of ISDN recommendations in 1984 Thirteen recommendations outlining the fundamental principles and initial specifications for B ISDN were approved in 1990 with Asynchronous Transfer Mode ATM being the transfer mode of choice for B ISDN It seems fair to say that B ISDN concepts have changed the face of networking The expertise we have developed for a century on telephone systems and over a number of decades on packet networks is proving to be insufficient to deploy and operate the envisioned B ISDNs Much more needs to be understood and satisfactorily addressed before ATM networks can become a reality Tricomm 93 is dedicated to ATM networks The technical program consists of invited papers addressing a large subset of issues of practical importance in the deployment of ATM networks This is the sixth in a series of Research Triangle Conferences on Computer Communications which emerged through the efforts of the local chapter of IEEE Communications Society
