Higher Surgical Training In General Surgery:

Essential Surgical Practice Alfred Cuschieri, George B. Hanna, 2013-01-25 *Essential Surgical Practice Higher Surgical Training in General Surgery* is an indispensable source of reference for the surgical trainee. This fifth volume is fully updated and caters for the needs of the senior trainee surgeon undertaking higher surgical training in general surgery providing detailed information on those specialties which the general surgeon is required to have a working knowledge of with a special emphasis on trauma and vascular surgery. Significant changes in surgical training have occurred over the past decade and *Essential Surgical Practice* reflects this by dividing the chapters into three distinct parts: general patient care, trauma, and general surgical care. The text is structured to be highly patient oriented in line with current thought and practice with a firm underpinning of pathophysiology. *Essential Surgical Practice Higher Surgical Training in General Surgery* will be an indispensable source of reference for all surgical trainees and can be used with confidence in association with local studies and distance learning courses. The content is consistent with the scope and level of information required for international postgraduate examinations.

Essential Surgical Practice, 4Ed Alfred Cuschieri, A. R. Moossa, 2002-05-31 Significant changes in surgical training have occurred as a result of the recommendations published in the Calman Report. The period of surgical training is now shorter and has two distinct phases: first basic training and then higher surgical training within a recognized surgical specialty with an exit examination towards the end of the training period. These changes are reflected in the decision to initiate a radical revision in the presentation and format of the fourth edition of *Essential Surgical Practice* including a division into two parts that reflects the above phases. This second volume caters for the needs of the senior trainee surgeon undertaking higher surgical training in general surgery giving detailed information on those specialties about which the general surgeon is required to have a working knowledge with a special emphasis on gastrointestinal and vascular surgery. It is structured to be highly patient oriented in line with current thought and practice with a firm underpinning of pathophysiology. *Essential Surgical Practice Higher Surgical Training in General Surgery* will be an indispensable source of reference for all surgical trainees and can be used with confidence in association with local studies and distance learning courses. The content is consistent with the scope and level of information required for international postgraduate examinations. A companion volume covers in detail the necessary material for Basic Surgical Training Module based on it emphasizes the management of patients with a variety of more common surgical disorders.

Essential Surgical Practice Alfred Cuschieri, George Hanna, 2015-01-20 Significant changes in surgical training have occurred over the past decade with the inevitable progress towards specialization in the various surgical specialties. The current edition of *Essential Surgical Practice Higher Surgical Training in General Surgery* reflects these latest developments with a new structure that accurately mirrors current practice.
