Evil Serial Killers Charlotte Greig, 2006-04-01 Our fascination with serial killers is at once disturbing and understandable disturbing because according to society's mores we should condemn the killers crimes and avoid all thought of their horrific actions but understandable because we are so fascinated by their motives What leads them to behave in such perverted ways And what makes them become killers who strike again and again Charlotte Greig has selected fifty of the world's most infamous serial killers ranging from Jack the Ripper to Ted Bundy When

compared it is easy to see similar themes emerging the loners David Berkowitz and Anatoly Onoprienko who both wrought revenge on a society which they felt had rejected them those who kill purely for sexual thrills like Albert Fish or John Christie and occult practitioners like the Chicago Rippers and Richard Ramirez who were inspired by macabre rituals to take their dark fantasies into even darker realities Whatever the personal stories that emerge from this lineup of twisted individuals Evil Serial Killers is a compelling testament and warning of the potential of human behaviour for true horror and pure evil Featuring Ted Bundy Harold Shipman Ed Gein Jack the Ripper Aileen Wuornos John Muhammad Charles Cullen Belle Gunness Joseph Paul Franklin **The World's Most Evil Serial Killers** Al Cimino, Jo Durden Smith, Paul Roland, John Marlowe, Victor McQueen, Charlotte Greig, 2021-07-01 There are few people alive who are so cruel so heartless and so undeniably evil that they will kill again and again Yet at any one time there are between 25 and 50 active serial killers in the USA and their chilling crimes have fascinated us since the days of Jack the Ripper Here you will discover how these heartless killers committed their gruesome deeds what motivated them to kill and how eventually they were caught This collection features more than 50 compelling stories including Ed Kemper who dismembered the bodies of his victims once he had finished with them Ted Bundy who abducted raped and brutally killed more than 30 women Charles Manson who led a cult of mayhem and murder Jeffrey Dahmer who stored a human head in his freezer Randy Kraft who was pulled over for drunk driving with a body in the trunk of his car Alexander Pichushkin who aimed to kill a person for every square on the chessboard **1973 Highway Legislation, Hearings ..., 93-1** United States. Space in America ,2005-01-01 America's sense of space has always been tied to what Hayden White called the narrativization of real events If the awe inspiring manifestations of nature in America Niagara Falls Virginia's Natural Bridge the Grand Canyon etc were often used as a foil for projecting utopian visions and idealizations of the nation's exceptional place among the nations of the world the rapid technological progress and its concomitant appropriation of natural spaces served equally well as David Nye argues to promote the dominant cultural idiom of exploration and conquest From the beginning American attitudes towards space were thus utterly contradictory if not paradoxical a paradox that scholars tried to capture in such hybrid concepts as the middle landscape Leo Marx an engineered New Earth Cecelia Tichi or the technological sublime David Nye Not only was America's concept of space paradoxical it has always also been a contested terrain a site of continuous social and cultural conflict Many foundational issues in American history the dislocation of Native and African Americans the geo political implications of nation building immigration and transmigration the increasing division and clustering of contemporary American society etc involve differing ideals and notions of space Quite literally space and its various ideological appropriations formed the arena where America's search for identity national political cultural has been staged If American democracy as Frederick Jackson Turner claimed is born of free land then its history may well be defined as the history of the fierce struggles to gain and maintain power over both the geographical social and political spaces of America and its concomitant narratives The number and range of topics interests and critical approaches of the essays gathered here open up exciting new avenues of inquiry into the tangled contentious relations of space in America Topics include Theories of Space Landscape Nature Technoscape Architecture Urban Utopia Literature Performance Film Visual Arts
