## **Hospital Restructuring Why When How:**

Hospital Restructuring Lawrence Gerber, 1983      The Innovation Imperative in Health Care Organisations Peter Spurgeon, Cary L. Cooper, Ronald J. Burke, 2012-01-01

Healthy organisations are twice as likely to get better results than unhealthy ones and this could be a matter of life and death if your business is healthcare. Whatever way you look at it, HR has a key role to play and the authors once again point the way. Clare Chapman, Group People Director, BT British Telecoms.

If healthcare systems around the world are to respond to the growing demands of an ageing population and advances in technology, then healthcare workforces will need to be managed with imagination, agility and innovation. This important book sets out some of these challenges in a thoughtful and accessible way, allowing the reader to tap into the research pedigree of its authors and to draw out lessons and evidence which will inform both strategy and practice.

Stephen Bevan, Director, Centre for Workforce Effectiveness, The Work Foundation.

This insightful book discusses vital concepts of system sustainability in terms of productivity, quality improvement, innovation and cost control in the context of maximising the potential of staff in the health care sector through effective human resource management.

Health systems in the western world face increasingly intense pressure to contain or reduce costs, while countries such as China and India move towards universal coverage. The contributors illustrate that radical gains in efficiency and innovative practice are required internationally in health care systems. They argue that the high proportion of health care system costs invested in staffing places the human resource function at the forefront of meeting this challenge.

Sustained system change and productivity gains, more effective management of staff and work climate are essential elements of reform and are all covered in this book. The book provides practical examples as to how health service managers can rise to the challenge of sustaining services against greater pressures than ever before. It will strongly appeal to academics and students of health service management and public sector management.

Health service managers, HR professionals in health as well as clinical staff will also find plenty of informative information in this enriching compendium.

*Nursing Staff in Hospitals and Nursing Homes* Institute of Medicine, Committee on the Adequacy of Nursing Staff in Hospitals and Nursing Homes, 1996-04-27

Hospitals and nursing homes are responding to changes in the health care system by modifying staffing levels and the mix of nursing personnel. But do these changes endanger the quality of patient care? Do nursing staff suffer increased rates of injury, illness or stress because of changing workplace demands? These questions are addressed in *Nursing Staff in Hospitals and Nursing Homes*, a thorough and authoritative look at today's health care system that also takes a long term view of staffing needs for nursing as the nation moves into the next century.

The committee draws fundamental conclusions about the evolving role of nurses in hospitals and nursing homes and presents recommendations about staffing decisions, nursing training, measurement of quality, reimbursement and other areas. The volume also discusses work-related injuries, violence toward and abuse of nursing staffs and stress among nursing personnel and examines whether these problems are related to staffing levels. Included is a
