Heiko Balzter,2010-07-20 The Siberian environment is a unique region of the world that is both very strongly affected by global climate change and at the same time particularly vulnerable to its consequences The news about the melting of sea ice in the Arctic Ocean and the prospect of an ice free shipping passage from Scandinavia to Alaska along the Russian north coast has sparked an international debate about natural resource exploitation national boundaries and the impacts of the rapid changes on people animals and plants Over the last decades Siberia has also witnessed severe forest fires to an extent that is hard to imagine in other parts of the world where the population density is higher the fire prone ecosystems cover much smaller areas and the systems of fire control are better resourced The acceleration of the fire regime poses the question of the future of the boreal forest in the taiga region Vegetation models have already predicted a shift of vegetation zones to the north under scenarios of global climate change The implications of a large scale expansion of the grassland steppe ecosystems in the south of Siberia and a retreat of the taiga forest into the tundra systems that expand towards the Arctic Ocean would be very significant for the local population and the economy I have studied Russian forests from remote sensing and modelling for about 11 years now and still find it a fascinating subject to investigate **Portraits at the Zoo** Ellen Velvin,1915

Siberia To-day Frederick Ferdinand Moore,1919 **The Diamond Triangle** Leonard,2012-04-12 A team of geologists comes to Siberia 5 000 km east of Moscow in search of the diamonds called in Russian almaz or brilliants Together with the wealthy patriot sponsors they are on the mission to save the economically wracked country from the embezzlement and

robbery of valuable resources And they find it the Diamond Triangle with 50 carat crystals At the beginning the explorers do not suspect that it will be hunted down by other adverse forces The people in the taiga realize their almost unbearable task in time when it is too late to skip off and run away They come upon many perilous snares among the snowy terrains and mountains and venture into the wilderness of that remote land which lies east of the Ural Mountains They are entrapped all around by all kind of bounty hunters who viciously compete for the premium prize for their heads appraised in million dollars The group of faithful committed people turns into the fugitives in the Siberian taiga because they possess so rare in the present human world qualities patriotism and belief Then in a remote corner of Siberia encircled from all sides by the bounty hunters and very close to a tragic finale the fugitives hear the battle sounds help comes from their real friends and brother the pomors from the White Sea shores and aboriginal Nenets people historical owners of the tundra The sea people pomors called in the past Ice Vikings successfully get through that secret century old route north of the Arctic Circle across the Kara Sea and Yamal Peninsula The route their ancestors once upon a time had traced in deviation of the ruthless tsar guards and Moscows rulers And now almost four centuries later they rediscover the route to freedom and escape from other merciless rulers Once again as in the past the northern people of this enormous country come to help and protect against the dominance of brutal power
