## **House Spiders Life:**

*House Spiders - Worldwide* Wolfgang Nentwig, Jutta Ansorg, Paula E. Cushing, Yvonne Kranz-Baltensperger, Christian Kropf, 2025-01-03 To avoid any misunderstandings this book is not about spiders as pets but about those spiders that live in our houses and apartments as lodgers Mostly ignored and sometimes wrongly feared there is hardly a building in the world that does not harbour some species of spider What is fascinating is that we always find the same species These spiders must have special adaptations because the humidity in our homes is far too low they are too clean and the food supply is usually scarce However those spiders that have made the leap into our four walls are rewarded with a worldwide right to stay This in turn is due to people's eagerness to trade and migrate worldwide Humans tirelessly transport their belongings and an endless stream of goods around the world in sacks parcels and containers And our domestic spiders as stowaways travel just as tirelessly and unrecognized It is therefore possible to present domestic spiders found throughout the world in a single book as they are essentially the same everywhere The 50 or so most important species and species groups are presented here in a generally understandable way with a detailed profile photos and distribution maps The authors of this book are experts who work at museums universities and in administration in Europe and North America They are not only recognized scientists but have also been avowed spider fans for decades

journey both animal and deeply human We meet cows living relaxed lives in an animal sanctuary and cows with plastic portals in their sides at a university research station We observe bison free roaming at Yellowstone National Park and chimpanzees confined to zoos We learn with King how to negotiate vegetarian preferences in omnivore restaurants We experience the touch of a giant Pacific octopus tasting King s skin with one of his long neuron rich arms We reflect on animal testing as King shares her own experience as the survivor of a particularly nasty cancer And in a moment all too familiar to many of us we recover from a close encounter with two spiders in the home This is a book not of shaming and limitation but of uplift and expansion Throughout this journey King makes no claims of personal perfection Though an animal expert she is just like the rest of us on a journey still learning each day how to be better and do better for animals But as Animals Best Friends makes clear challenging choices can bring deep rewards By turning compassion into action on behalf of animals we not only improve animals lives we also immeasurably enrich our own
