**This World, Other Worlds** María Cátedra Tomás, 1992-11-15 The Vaqueiros de Alzada a cattle herding people in the Asturian mountains of Spain have one of the highest suicide rates in Europe and an attitude toward death that gives this statistic unusual meaning This World Other Worlds considers death among the Vaqueiros as a central cultural fact which reveals local ideas about the origin and destiny of humans the relations of humans and animals the configuration of the universe and the nature of society Interested chiefly in the conceptual and meaningful aspects of death Mar a C tedra focuses on the cultural resources with which the Vaqueiros confront their own mortality how they experience death and what this reveals about the way they see this world and other worlds Applying sensitive ethnographic insight to a rich body of oral testimony C tedra discloses an unsuspected symbolic universe native to the Vaqueiros Death is seen here in close coherent relation to pain age and suffering sickness and suicide one must understand the cultural valuation of different ways of dying and the conditions under which suicides take place To understand what it means to be a Vaqueiro is to understand how suicide can be perceived by a people as acceptable A groundbreaking work in European ethnography This World Other Worlds takes symbolic analysis to a new level In its illumination of local conceptions of death grace and sainthood the book also makes a substantial contribution to the anthropology of religion The Otherworld and Beyond Series III J R

*Monograph series* Statens etnografiska museum (Sweden), 1967 **Otherworld Journeys** Carol Zaleski, 1988-11-03 Dozens of books articles television shows and films relating near death experiences have appeared in the past decade People who have survived a close brush with death reveal their extraordinary visions and ecstatic feelings at the moment they died describing journeys through a tunnel to a realm of light visual reviews of their past deeds encounters with a benevolent spirit

and permanent transformation after returning to life Carol Zaleski's *Otherworld Journeys* offers the most comprehensive treatment to date of the evidence surrounding near death experiences The first to place researchers findings first person accounts and possible medical or psychological explanations in historical perspective she discusses how these materials reflect the influence of contemporary culture She demonstrates that modern near death reports belong to a vast family of otherworld journey tales with examples in nearly every religious heritage She identifies universal as well as culturally specific features by comparing near death narratives in two distinct periods of Western society medieval Christendom and twentieth century secular America This comparison reveals profound similarities such as the life review and the transforming after effects of the vision as well as striking contrasts such as the absence of hell or punishment scenes from modern accounts Mediating between the debunkers and the near death researchers Zaleski considers current efforts to explain near death experience scientifically She concludes by emphasizing the importance of the otherworld vision for understanding imaginative and religious experience in general
