Transplant John A. Elefteriades, MD, 2014-08-26 What do you do when you have to choose between saving a life or saving yourself Renowned cardiac surgeon Dr Athan Carras's first concern has always been the welfare of his patients Then he is approached by the very wealthy and even more powerful Terry Flynn a man who is used to getting what he wants no matter what Flynn's son is dying and his only chance of survival is to receive a donor heart one that Terry intends to obtain by whatever means necessary Athan is immediately opposed to performing an illegal and immoral operation but Flynn is not about to let that stop him Now caught in the crosshairs of a man with unlimited means and influence Athan finds his own life and the lives of those he loves being torn apart And he will have to decide how far he is willing to go and what he is willing to sacrifice Families in the Intensive Care Unit Ashlee J. Vance, Deena Kelly Costa, Giora Netzer, 2025-05-09 This first edition of this text was the first book to comprehensively survey the challenges in understanding and working with families whose loved ones are critically ill The comprehensive nature of that book served as a state of the art reference in this sphere for a

broad spectrum of researchers and clinicians All chapters were authored by established experts in the respective fields providing an overview that has been used both in theory and practice Since the first edition s publication the public recognition of the importance of families has increased dramatically as a consequence of the COVID 19 pandemic Most major decisions in the intensive care unit ICU are shared by clinicians and someone other than the patient Improving communication between clinicians and these surrogate decision makers has proven hard in multiple clinical trials Families suffer too when their loved ones are critically ill Anxiety stress and depression are common and post traumatic stress disorder may occur while their loved ones are still in the ICU Families struggle to understand prognoses and conflicts with the care team occur frequently These conflicts not only injure families but also contribute to health care provider burnout Now in its fully revised and expanded second edition Families in the Intensive Care Unit reflects lessons learned during the COVID pandemic response as well as knowledge gained about family support when families cannot be at the bedside The chapter subjects again reflect a combination of breadth and depth Physical and psychological morbidity are explored as barriers to effective decision making as are cognitive challenges The full array of the interdisciplinary and interprofessional team is represented emphasizing the multimodal approach This edition includes administrative considerations for health care management and approaches for training members of the health care team Similarly family voices are also represented The complete trajectory of needs of care are addressed including survivorship and end of life care
