Housing Policy Analysis British Housing In Culture And Comparative Context:

Housing Policy Analysis Stuart J. Lowe, 2017-03-14 By virtue of a quiet revolution over nearly a hundred years Britain has evolved into a home owning society The impact of this on British society has been barely understood but it has helped to shape the Blair workfare state and to draw Britain firmly towards the English speaking world while distancing the country from other European nations Taking a policy analysis approach and drawing from the burgeoning comparative literature this textbook explores what has happened to British housing since 1900 Providing more than an account of British housing the book reinterprets the housing system in a way that is sensitive to the historical and cultural contexts of British policy and society Examining the nature of housing and how it helps to shape society Lowe sets British housing in its global context Written in an accessible style *Housing Policy Analysis* leads the reader through the basic concepts to more challenging themes It will be important reading for students of housing studies social policy public policy and applied social studies

Housing Policy Analysis Stuart Lowe, 2004 Taking a policy analysis approach to housing and drawing from the burgeoning comparative literature this textbook provides a systematic re evaluation of the nature of British housing that challenges the orthodox home owning society view whereby Britain is seen as marking a norm Building up from basic concepts in policy analysis the book reinterprets the UK housing system in a manner which is sensitive to the specific historical and cultural origins and development of British policy and society As such the text offers both an important and cutting edge evaluation of British housing and a case study in applied social policy analysis

Meaning and Measurement in Comparative Housing Research Mark Stephens, 2017-07-05 The last two decades have seen a marked growth in comparative research within the field of housing studies This reflects the increasing globalisation of housing finance and therefore the interconnectedness of housing markets growing interest among researchers and policy makers in learning from developments in other countries and the availability of more funding and better comparative data to support their endeavours Concurrently comparative housing research has become more sophisticated as research training has improved the number of journals publishing this research has increased and researchers have become what one might call more methodologically aware However despite these developments there is no single volume book that deals with the distinct challenges that arise from comparative housing research compared to other fields of comparative policy analysis These challenges relate to spatial fixity of housing its dual role as a consumption and investment good and as the wobbly pillar of the welfare state which is delivered using a complex mix of government and market supports This volume reflects on the significant methodological strides made in the comparative housing research field during this period The book also considers the considerable challenges that remain if comparative housing research is to match the methodological and theoretical sophistication evident in other comparative social science fields and maps a route for this journey This book was published as a special issue of the *International Journal of Housing Policy*

The housing debate Stuart Lowe, 2011-09-21 The

emergence of Britain as a fully fledged home owning society at the end of the 20th century has major implications for how houses are used not just as a home but as an asset The key debate in this important and timely book is whether social policy and people s homes should be so closely connected especially when housing markets are so volatile It will be essential reading for all students and practitioners of housing and those concerned with how social and public policy is being shaped in the 21st century *The SAGE Handbook of Housing Studies* David F Clapham,William A V Clark,Kenneth Gibb,2012-04-20 Cross disciplinary and critical in its approach The SAGE Handbook of Housing Studies is an elucidating look at the key issues within the field It covers the study of housing retrospectively but also analyses the future directions of research and theory demonstrating how it can contribute to wider debates in the social sciences A comprehensive introductory chapter is followed by four parts offering complete coverage of the area Markets examines the perception of housing markets how they function in different contexts and the importance of housing behaviour and neighbourhoods Approaches looks at how other disciplines economics geography and sociology have informed the direction of housing studies Context traces the interactions between housing studies and other aspects of society providing context to debate housing through issues of space social welfare and the environment Policy is a multi disciplinary and comprehensive take on the major policy issues and the causes and possible solutions of housing problems such as regeneration and homelessness Edited by leading names in the field and including international contributions the book is a stimulating wide ranging read that will be an invaluable resource for academics and researchers in geography urban studies sociology social policy economics and politics **The Routledge Handbook of Housing and Welfare** Martin Grander,Mark Stephens,2023-12-22 This handbook takes on one of the most pressing issues of today s society the question of housing It is a cutting edge edited volume about the disputed interrelationship between housing and the wider welfare state Although housing scholars generally agree that housing should be regarded as part of such a wider welfare system it has proven hard to pinpoint and operationalize its position within it Moreover the relationship became considerably more complex as a result of the period of intense globalization and the integration of national housing finance systems into world finance markets Furthermore welfare systems reflect economic as well as social models and these too have changed as countries have responded to globalization and traditional ideological frameworks have become less distinct Thus there is a need to redefine the connection between housing and welfare in light of changes in both welfare and housing systems By investigating the current situation and historical development of housing provision and welfare distribution in different contexts worldwide this book aims to contribute to an expanded understanding of housing and welfare The book brings together 25 international housing researchers covering 15 countries worldwide With such a global approach the book aims to provide an updated empirical picture and analysis of different housing systems and their connection to the welfare regime in different national contexts The book moves beyond the usual focus on affordable housing provision in the context of well developed welfare regimes and

includes countries from the global south incorporating regions where it is debatable whether there are welfare systems present at all. Thus the book aims to provide the reader with an insight into the large differences in housing provision in international contexts with large differences regarding how the welfare state is comprised. From these insights we reflect on whether regime approaches continue to provide a suitable theoretical framework for understanding the relationship between housing and the wider welfare state. This handbook is essential reading for researchers, students, policymakers and other professionals in the fields of housing studies, welfare studies, economics, urban studies, social work, social and public policy and sociology.

Housing Policy Reforms in Post-Socialist Europe Sasha Tsenkova, 2008-12-29 The book explores both theoretically and empirically the impacts of housing reforms on housing provision in the context of the transition from a centrally planned to a market based economy Fifteen years after the overthrow of state socialism housing policy has lost its privileged status of a political priority as most politically embedded systems had favoured market based solutions to housing problems This departure from state controlled housing policies with the aim of providing a dwelling for every family is significant particularly in some post socialist countries where no new housing policy has emerged The transition process embedded in the paradigm shift from central planning to markets has triggered off turbulence and adjustments with tangible outcomes in post socialist housing systems What has changed and what new housing systems have emerged during this dramatic transition to markets and democracy Are these systems more efficient and equitable These questions are the main focus of the book with an emphasis on diversity and change in housing reforms The book supports the hypothesis that notions of convergence are not really appropriate to the conceptualisation of post socialist housing systems It argues that different housing policy choices are going to map out increasingly divergent scenarios for future development
