Housing Projects:

From the Puritans to the Projects Lawrence J. Vale, 2009-07-01 From the almshouses of seventeenth century Puritans to the massive housing projects of the mid twentieth century the struggle over housing assistance in the United States has exposed a deep seated ambivalence about the place of the urban poor Lawrence J Vale s groundbreaking book is both a comprehensive institutional history of public housing in Boston and a broader examination of the nature and extent of public obligation to house socially and economically marginal Americans during the past 350 years First Vale highlights startling continuities both in the way housing assistance has been delivered to the American poor and in the policies used to reward the nonpoor He traces the stormy history of the Boston Housing Authority a saga of entrenched patronage and virulent racism tempered and partially overcome by the efforts of unyielding reformers He explores the birth of public housing as a program intended to reward the upwardly mobile working poor details its painful transformation into a system designed to cope with society s least advantaged and questions current policy efforts aimed at returning to a system of rewards for responsible members of the working class The troubled story of Boston public housing exposes the mixed motives and ideological complexity that have long characterized housing in America from the Puritans to the projects *Public Housing That Worked* Nicholas Dagen Bloom, 2008 Public Housing That Worked offers a comprehensive history of America s largest and most successful housing authority The New York City Housing Authority pioneered and still maintains rigorous systems of public housing management that allowed it to avoid the downward spiral experienced by most American public housing authorities *Public Housing* United States. General Accounting Office, 1993 HUD's Troubled Housing Projects United States. Congress. House. Committee on Government Operations. Manpower and Housing Subcommittee, 1979 *Acquisition of Sites for Low Rent Housing Projects* United States Housing Authority, 1940 After the Projects Lawrence J. Vale, 2018-11-20 America is in the midst of a rental housing affordability crisis More than a quarter of those that rent their homes spend more than half of their income for housing even as city leaders across the United States have been busily dismantling the nation s urban public housing projects In *After the Projects* Lawrence Vale investigates the deeply rooted spatial politics of public housing development and redevelopment at a time when lower income Americans face a desperate struggle to find affordable rental housing in many cities Drawing on more than 200 interviews with public housing residents real estate developers and community leaders Vale analyzes the different ways in which four major American cities implemented the federal government s HOPE VI program for public housing transformation while also providing a national picture of this program Some cities attempted to minimize the presence of the poorest residents in their new mixed income communities but other cities tried to serve as many low income households as possible Through examining the social political and economic forces that underlie housing displacement Vale develops the novel concept of governance constellations He shows how the stars align differently in each city depending on community pressures that have evolved in response to each

city's past struggles with urban renewal. This allows disparate key players to gain prominence when implementing HOPE VI redevelopment. A much needed comparative approach to the existing research on public housing. After the Projects shines a light on the broad variety of attitudes towards public housing redevelopment in American cities and identifies ways to achieve more equitable processes and outcomes for low income Americans. *Problems Affecting Low-rent Public Housing Projects* Ronald Jones, David Kaminsky, Michael Roanhouse, 1979. Conducted by HUD's Office of Policy Development and Research, this policy study focuses on the condition of the Nation's public housing projects. The study was undertaken to answer three questions: 1. How many projects are troubled? 2. What problems do these projects face? While the projects defined as troubles constitute a relatively small proportion of the public housing inventory, their problems are severe and interrelated. The solution to or even the easing of these problems requires concentrated multi-purpose resources. Even then a solution to some of these problems appears to be beyond the direct control of either HUD or individual Public Housing Agencies.

Dahlan, 2011-01-01. Abandoned housing project is one of the housing problems in Peninsular Malaysia. Even though there are laws and policies provided by the Malaysian Government to control the housing industry, the abandoned housing project is still an unsettled issue for the Malaysian Government to tackle. The real victims are the purchasers themselves. There is virtually no standard common way to face the problems of abandoned housing projects. Likewise, there is no similar specific method to deal with the rehabilitation of abandoned housing projects. This is due to the fact that in every abandoned housing project and its rehabilitation, the problem and issues faced by the stakeholders vary. Thus, different methods are used to deal with the problems, especially to rehabilitate the projects. If the project is not viable for rehabilitation, the project will be stalled forever without any prospects for rehabilitation to the detriment of the purchasers. This book discusses the law and practice in rehabilitating abandoned housing projects in Peninsular Malaysia. Certain suggestions are also provided in this modest book for facing the problems of abandoned housing projects and their rehabilitation in Peninsular Malaysia and for the betterment of the housing industry in Peninsular Malaysia.
