

# HUMAN BODY CHART 25 THE HUMAN BODY

## ALL IN ONE

The human body is everything that makes up, well, you. Made up of hundreds of bones, the skeletal system provides structure, support and movement to the human body. Veins carry blood to the heart and enter the heart through vena cava.

**BRAIN:** The control centre of the body regulates other organ system, control sensory and motor functions.

**TEETH:** Cut, crush and tear food.

**LUNGS:** Supplies oxygen to the blood and removes CO<sub>2</sub> from blood.

**HEART:** Pumps blood throughout the body.

**EYES:** Helps you see the world around you.

**NOSE:** Passage way for air that lets you smell things around you and helps in breathing.

**EARS:** Helps you hear the world around you.

**TONGUE:** Help detect and transmit taste signals to the brain. The tongue is vital for chewing and swallowing food, as well as for speech.

**THYROID:** Controls appetite and metabolism.

**BLOOD:** Transports oxygen and nutrients around the body and removes cellular waste, among a range of vital functions.

**SPLEEN:** Helps to filter out toxins in the blood.

**STOMACH:** Helps in breakage of food.

**INTESTINE:** Helps to digest the food.

**URINARY SYSTEM:** Removes wastes from blood, regulates concentration of body fluids.

**LIVER:** Removes toxins from the blood, produces bile that help in digestion.

**GALL BLADDER:** Collects bile from the liver, and discharges it into the small intestines, where it helps digest fat.

**SKIN:** Protects against injury, infection, and fluid loss; helps regulate body temperature and excretes water, as sweat.

**MUSCLES:** Work with the skeletal and nervous system to produce movement also helps to circulate blood through the human body.

**PANCREAS:** It has two main functions: an exocrine function that helps in digestion and an endocrine function that regulates blood sugar.

**REPRODUCTIVE SYSTEM:** Functions to make new individuals by producing, storing and releasing specialized sex cells known as gametes.

Siva's Brainchild Brian Capleton,2024-02-22 Hinduism is ancient Considered as one religion it is the oldest religion on Earth Modern scientific understanding in contrast is relatively very recent It is only in this very recent mode of understanding that we have come to understand the basic material structure of the human brain is that of a supremely complex network We don t find anything in the Hindu corpus that refers to this or to the modern scientific fact that our experience of self and world as human beings is a construct of the functioning of this supremely complex network And yet Hinduism itself contains expressed through a cultural fabric the representation of a supreme understanding through which the most fundamental fact of modern brain science comes into focus The point of Hinduism like that of any of the great religions is the discovery of God whether as Brahman or Krishna and not merely the provision of entertaining stories about our origins With this in mind this book contains a steep but fast shortcut into the core content behind the cultural fabric in such a way that is compatible with Western inquiry whilst giving full due regard to the profound and spiritual nature of the corpus It is all too easy to regard the pantheon of Hinduism as proof of its estrangement and disconnection from a religion such as Christianity which amongst the religions predominates in the West But such a judgement would be to overlook the one thing that all cultures and all religions have in common and on which they depend for their expression in the first place Which is none other than human brain function In these pages the deeper content of the Hindu corpus and the single most fundamental fact of modern neuroscience come together They are exposed together for anyone who is interested to show how in a very 21st century way as well as in an ancient Hindu way we are what Hinduism may might regard as iva s brainchild *The Art of Exile* Andrea Max,2025-05-13 To prove her worth to her family seventeen year old Ada infiltrates a school for descendants of exiled Renaissance masters to steal their innovations *Allergic to Life* Frank Lichtenberger,2023-11-28 This easy to read title provides a comprehensive discussion of the major changes in daily life that

have led to states of increased bodily inflammation Indeed today there is an epidemic of allergic and autoimmune disease in the first and developing world While outdoor climate change is now considered common knowledge the impact of longer work hours artificial lighting increased food shelf life and changes to the microbiome all have made a large impact in increasing allergies worldwide An allergy best defined as a damaging response from the Immune system due to a substance in the environment starts with warning signals or generalized symptoms that are caused by something in the environment Itching aches pains swelling coughing and fatigue are all immune responses Written in an engaging and often humorous style by an allergist immunologist the first three chapters outline how the humanbody is in an unquestionably harmful environment and that in general the immune system is just doing its job In subsequent chapters the specific topics contributing to allergies are covered in detail starting with microorganisms and a focus on indoor living Dust mites for example are addressed in one full chapter and for good reason The past few decades have seen an explosion of climate controlled humidified indoor airspace that is ideally suited for more mass production of mites In the end emphasizes the author all roads of inflammation from the environment lead to the mast cell compartment The stress responses of the body summarily drive up this compartment and have led to a world wide prevalence of between 14% to 17% of mast cell activation syndrome While genetics and comorbid conditions are important in any symptom or disease process the mast cell compartment feeds and grows off all the major environmental changes of the past 50 or so years This is why the human body in the 21st century is in a low level state of rejection of the world says the author Most of these changes are irreversible but the situation is not hopeless Understanding how the body changes itself in response to its environment will allow controlled desensitization to the environment Allergic to Life How the Human Body Rejects the Modern World serves as a concise and lively text for clinicians and general readers interested in a deep expert dive into the world of allergy and immunology

**Between Philosophy and Religion, Vol. II** Brayton Polka,2007-02-01 In Between Philosophy and Religion Volumes I and II Brayton Polka examines Spinoza s three major works on religion politics and ethics in order to show that his thought is at once biblical and modern Indeed Polka argues that Spinoza is biblical only insofar as he is understood to be one of the great philosophers of modernity and that he is modern only when it is understood that he is unique in making the interpretation of the Bible central to philosophy and philosophy central to the interpretation of the Bible This book and its companion volume are essential reading for any scholar of Spinoza Islamic Theological Themes John Renard,2014-05-31 Comprised of primary sources assembled from a broad chronological and geographic spectrum Islamic Theological Themes is a comprehensive anthology of primary Islamic sacred texts in translation The volume includes rare and never before translated selections all freshly situated and introduced with a view to opening doors into the larger world of Islamic life belief and culture From pre theological material on the scriptural end of the spectrum to the more practical material at the other John Renard broadens our concepts of what counts as Islamic theology situating Islamic theological literature within

the context of the emerging sub discipline of Relational Comparative Theology Divided into five parts students and scholars will find this collection to be an indispensable tool
