Knowing Being Doing And Then Some:

The Making of Americans - Gertrude Stein, 2025-03-03 The Making of Americans by Gertrude Stein is an experimental modernist novel that explores themes of identity history and the nature of American culture The novel presents a detailed and repetitive narrative about the lives of the Dehning and Hersland families using an unconventional stream of consciousness style that reflects Stein's interest in linguistic rhythm and psychological depth Through this fragmented and abstract approach Stein examines the ways in which individuals and families evolve over generations capturing the essence of human behavior and societal change Since its publication The Making of Americans has been recognized as a groundbreaking work in modernist literature challenging traditional narrative structures and redefining the novel's form Its emphasis on repetition variation and observation creates a unique reading experience that mirrors the process of memory and perception Though complex and demanding the novel has been influential in literary circles inspiring later experimental writers The novel's enduring significance lies in its ambitious attempt to chronicle the American experience through language and structure rather than conventional plot The Making of Americans remains a landmark of literary innovation offering readers a profound meditation on identity transformation and the fluidity of personal and collective history

Professional Uncertainty, Knowledge and Relationship in the Classroom Joseph Mintz, 2014-06-27 The extent to which teachers should make use of theoretical and expert knowledge as opposed to tacit experiential knowledge and how these might be combined is a perennial issue in discussions on pedagogy This book addresses these debates through a creative development of the concept of productive uncertainty Using case studies focusing on teachers working with children

with autism a particularly fertile crucible for considering uncertainty the book explores how the radical 20th century psychoanalyst Wilfred Bion's epistemological approach to uncertainty can be used to re frame Donald Schon's concept of reflection in action offering a new perspective on the practice of teachers and other caring professionals Several areas of potential uncertainty are identified including uncertainty relating to areas of practice including diagnosis the relationship between expert knowledge and practice the implications of autism for autonomy and agency and uncertainties in relation to the understanding of and use of new technologies A strong argument is made based on both theoretical and empirical grounds that in juggling between theoretical and tacit knowledge in the classroom there is more to be gained by staying with the struggle with uncertainty than by fleeing from it too early into the promise of expert solutions Consideration is also given to the relative importance of specific theoretical training for teachers both in general and in relation to working with children with special educational needs in the context of international and UK policy developments in this area This book will be of key value to researchers and postgraduates in the fields of education studies teacher thinking and research psychoanalytically informed psychosocial studies as well as to practitioners working in special educational needs autism education

The Critique of Theological Reason James P. Mackey,2000-10-12 Far from merely reinvigorating relativism

postmodernism has detected and expressed in our time a powerful nihilating process of which truth and reality itself are the final casualties and with these morality and religion Beginning from the theological reaches of philosophy this book argues that gods played a crucial part in modern philosophy even when it was most critical of them that the dominant nihilism of Derrida is really an excessive and misleading outcome of a contemporary philosophy which could otherwise resonate with all that is best in our evolutionary image of the universe that moralists who turn to art in order to overcome the fact value version of this deadly dualism do not thereby rule out religion and that a Christian theology which recognises the evolutionary and historical conditions of faith and revelation is once again producing a theology that builds upon the best of contemporary philosophy and science **All the Year Round** ,1894
