Knowledge Politics:

Knowledge Politics Nico Stehr, 2015-12-03 This book argues that new technologies and society's response to them have created a relatively new phenomenon knowledge politics Nico Stehr describes Western society's response to a host of new technologies developed only since the 1970s including genetic experiments test tube human conception recombinant DNA and embryonic stem cells genetically engineered foods neurogenetics and genetic engineering and reproductive cloning and the reconstruction of the human ancestral genome He looks also at the prospective fusion of nanotechnology biotechnology information technology transgenic human engineering and cognitive science whose products may as its boosters claim some day cure disease slow the aging process eliminate pollution and generally enhance human performance Knowledge Politics shows how human civilization has reached a new era of concern about the life altering potentials of new technologies Concerns about the societal consequences of an unfettered expansion of natural scientific knowledge are being raised more urgently and are moving to the center of disputes in society and thus to the top of the political agenda Stehr explains the ramifications of knowledge politics and the approaches society could take to resolve difficult questions and conflicts over present and future scientific innovation

Knowledge, Politics and the History of Education

Jesper Eckhardt Larsen, 2012 The humanities and social science disciplines are increasingly expected to prove their relevance faced with the politics of knowledge in the knowledge economy This tendency is investigated in this book regarding the discipline of the history of education in America and Europe

Locke on Knowledge, Politics and Religion

Kiyoshi Shimokawa, Peter R. Anstey, 2021-08-26 Locke scholarship has been flourishing in Japan for several decades but its output is largely unknown to the West This collection makes available in English for the first time the fruits of recent Japanese research opening up the possibility of advancing Locke studies on an international scale Covering three important areas of Locke's philosophical thought knowledge and experimental method law and politics and religion and toleration this volume criticizes established interpretations and replaces them with novel alternatives breaking away from standard narratives and providing fresh ways of looking at Locke's relationship with philosophers such as Boyle Berkeley and Hume The specific topics that have been selected are ones that continue to have important contemporary moral and political implications from constitutionalism and toleration to marriage and the death penalty Applying Locke's views to 21st century questions this collection presents provocative readings of the defining aspects of Locke's philosophical thought stimulating current debates and heralding a new era of collaborative work for Locke scholars around the world

Knowledge, Politics and Policymaking in

Indonesia Arnaldo Pellini, Budiati Prasetyamartati, Kharisma Priyo Nugroho, Elisabeth Jackson, Fred Carden, 2018-06-20 This edited volume examines key questions about evidence informed policymaking in Indonesia It draws on insights and evidence acquired through the implementation of the Knowledge Sector Initiative a donor funded programme that aims to increase the demand for and use of evidence in policymaking in Indonesia Featuring contributions from academics policy researchers

policymakers and development practitioners the volume will deepen readers understanding of how knowledge and politics shape the policymaking process in Indonesia As such it will be of interest to Indonesian and international researchers academics students practitioners and policymakers concerned with various aspects of evidence informed policymaking research and processes In particular regional and international development practitioners and development partners interested in learning from Indonesia s efforts to improve how evidence is used to address key development challenges will find this volume valuable

Who Owns Knowledge? Bernd Weiler, 2017-09-08 Who Owns Knowledge explores the emerging linkages between the extension of knowledge and the law It anticipates that the legal system will not only be called upon to adjudicate in matters of creative minds but will be expected to do so to an ever increasing degree Linkages between the legal system and knowledge are bound to multiply in modern societies Ironically while increasingly relying on knowledge we are simultaneously investing significant resources into controlling this same knowledge This includes developing a system of legal governance over how knowledge is extended or enlarged Such modes of governance may take the form of regulatory legal codes or legal challenges and judgments that shape the evolution of modern society and potentially transform knowledge itself as a productive force Who Owns Knowledge asks such questions as What is the appropriate balance of public and private interests involved in this process How can creative powers natural resources and indigenous knowledge be protected from either public or private exploitation Does the law have the power to prevent this exploitation or is adaptive technology needed Also in this identity theft conscious age how can the rights of the individual be protected against policies allowing access to any kind of information especially confidential information The editors and contributors demonstrate that the relationship between knowledge and the law needs to be further researched and discussed Who Owns Knowledge is a must read for those interested in the subjects of intellectual property the history and development of modern legal and economic systems and their entanglements and how judicial systems make choices between the legal and economic systems and especially between the public and private good and their often opposing interests

Politics and Policy Knowledge in Federal Education Steven Putansu, 2020-02-27 Policy knowledge derived from data information and evidence is a powerful tool for contributing to policy discussions and debates and for understanding and improving the effectiveness efficiency and equity of government action For decades politicians advocates reformers and researchers have simultaneously espoused this value while also paradoxically lamenting the lack of impact of policy knowledge on decision making and the failure of related reforms This text explores this paradox identifying the reliance on a proverb of using policy knowledge to supplant politics as a primary culprit for these perceived failures The evidence in this book suggests that any consideration of the role of policy knowledge in decision making must be considered alongside rather than in place of considerations of the ideologies interests and institutional factors that shape political decisions This contextually rich approach offers practical insights to understand the role of policy knowledge and to better leverage it to support good governance decisions

Knowledge and Democracy

Nico Stehr, 2011-12-31 The relationship of knowledge and liberties in modern societies presents a multitude of fascinating issues that deserve to be explored more systematically The production of knowledge is dynamic and the conditions and practice of freedom is undergoing transformation These changes ensure that the linkages between liberty and knowledge are always subject to changes In the past the connection between scientific knowledge democracy and emancipation seemed self evident More recently the close linkage between democracy and knowledge has been viewed with skepticism This volume explores the relationship between knowledge and democracy Do they support each other do they mutually depend on each other or are they perhaps even in conflict with each other Does knowledge increase the freedom to act If additional knowledge contributes to individual and social well being does it also enhance freedoms Knowledge and Democracy focuses on the interpenetration of knowledge freedom and democracy and does so from various perspectives theoretical as well as practical Modern societies are transforming themselves into knowledge societies This has a fundamental impact on political systems and the relationship of citizens to large social institutions The contributors to this book systemically explore whether and in what ways these modern day changes and developments are connected to expansion of the capacities of individual citizens to act They focus on the interrelation of democracy and knowledge and the role of democratic institutions as well as on the knowledge and social conduct of actors within democratic institutions In the process of investigation they arrive at a new platform for future research and theory one that is sensitive to present day societal conflicts cleavages and transformations generated by new knowledge In this way this volume will attract the interest of political scientists sociologists economists and students within various disciplines Nico Stehr is Karl Mannheim Professor of Cultural Studies at the Zeppelin University Friedrichshafen Germany and a fellow of the Center for the Advanced Study of the Humanities Essen Germany During the academic year 2002 2003 he was Paul F Lazarsfeld Professor at the University of Vienna Stehr is also a professor emeritus of the University of Alberta His research interests include sociology economics and labor globalization and ecology

Knowledge Politics Nico Stehr, 2005 Shows how new technologies and society's response to them have created a knowledge politics with wide ranging ramifications

Bureaucracy and the Policy Process Dennis D. Riley, Bryan E. Brophy-Baermann, 2006 The central role that bureaucracy plays in the policy process is played by individuals namely by subject matter experts and managers we call political executives These executives do not play their role in a vacuum of course but in a context defined by three key forces the organizational environment of bureaucracy itself our governing philosophy stressing responsiveness respect for individual rights and accountability and the demands of the people and the institutions those people have created to govern themselves This book explores how these three forces collide and how the resulting collision shapes the way in which bureaucracy makes policy as well as the final product of that policy making process It provides an in depth look at each of these forces with chapters specifically devoted to how bureaucrats interpret their role in the policy process how the organizational environment influences their ability to play that role and most of all to

the interactions between bureaucrats and the institutions of what we call the Constitutional government the President the Congress and the courts It does this all the while reminding us that fitting bureaucracy into a society that views itself as self governing is no easy task *Inequality Knowledge* Felix Römer,2023-11-06 Poverty and inequality have pervaded British society to this day but this has not always been self evident to contemporaries popular understandings have depended on existing knowledge *Inequality Knowledge* provides the first detailed history of the numbers about the gap between rich and poor It shows how they were produced used and suppressed at times and how activists scientists and journalists eventually wrestled control over the figures from the state The book traces the making and the politics of statistical knowledge about economic inequality in the United Kingdom from the post war era to the 1990s What kind of knowledge was available to contemporaries about socio economic disparities in Britain and how they evolved over time How was this knowledge produced and by whom What did policy makers and civil servants know about the extent of poverty and inequality in British society and to what extent did they take the distributional impact of their social and fiscal policies into account Far from just a technical matter inequality knowledge had far reaching implications for key debates and the wider political culture in contemporary Britain *Historicizing inequality knowledge* speaks to a long tradition of historical research about social class divisions and cultural representations of economic disparities in twentieth century Britain *Nico Stehr: Pioneer in the Theory of Society and Knowledge* Marian T. Adolf,2018-05-14 This unique volume brings together a selection of the most important texts of Nico Stehr for the first time and puts them in dialogue with original research that draws on his prolific work Covering five decades of pioneering sociological research on the theory of society and knowledge the book introduces the reader to Stehr s seminal inquiries into the economic political and social role of knowledge Original concepts such as his groundbreaking studies on the Knowledge Society are introduced as the volume traces Stehr s pursuit of social scientific research as a source of practical knowledge for modern society The book comprises three parts devoted to the many facets and the remarkable range of Nico Stehr s oeuvre Part 1 provides an introduction to the significance of his pioneering work and career Part 2 demonstrates the practical application of Nico Stehr s research as seen through the eyes of eminent scholars Part 3 presents a selection of the milestones of his publications **Globalizing Knowledge** Michael D. Kennedy,2014-12-10 Heralding a push for higher education to adopt a more global perspective the term globalizing knowledge is today a popular catchphrase among academics and their circles The complications and consequences of this desire for greater worldliness however are rarely considered critically In this groundbreaking cultural political sociology of knowledge and change Michael D Kennedy rearticulates questions approaches and case studies to clarify intellectuals and institutions responsibilities in a world defined by transformation and crisis *Globalizing Knowledge* introduces the stakes of globalizing knowledge before examining how intellectuals and their institutions and networks shape and are shaped by globalization and world historical events from 2001 through the uprisings of 2011 13 But Kennedy is not only concerned with

elaborating how wisdom is maintained and transmitted he also asks how we can recognize both interconnectedness and inequalities and possibilities for more knowledgeable change within and beyond academic circles Subsequent chapters are devoted to issues of public engagement the importance of recognizing difference and the local's implication in the global and the specific ways in which knowledge images and symbols are shared globally Kennedy considers numerous case studies from historical happenings in Poland Kosovo Ukraine and Afghanistan to today's energy crisis Pussy Riot the Occupy Movement and beyond to illuminate how knowledge functions and might be used to affect good in the world *Knowledge, Power and Dissent* Guy R. Neave, 2006-01-01 This publication is based on the discussions of the 2004 Global Colloquium on Research and Higher Education Policy of the UNESCO Forum for Higher Education Research and Knowledge held in Paris in December 2004 It contains contributions from 17 international experts in the field of higher education which explore the global rise of the knowledge society and its implications for higher education and for sustainable human development in the future

Philosophy, Rhetoric, and the End of Knowledge Steve Fuller, James H. Collier, 2003-12-08 In this second edition of Steve Fuller's original work *Philosophy Rhetoric and the End of Knowledge A New Beginning for Science and Technology Studies* James Collier joins Fuller in developing an updated and accessible version of Fuller's classic volume The new edition shifts focus slightly to balance the discussions of theory and practice and the writing style is oriented to advanced students It addresses the contemporary problems of knowledge to develop the basis for a more publicly accountable science The resources of social epistemology are deployed to provide a positive agenda of research teaching and political action designed to bring out the best in both the ancient discipline of rhetoric and the emerging field of science and technology studies STS The authors reclaim and integrate STS and rhetoric to explore the problems of knowledge as a social process problems of increasing public interest that extend beyond traditional disciplinary resources In so doing the differences among disciplines must be questioned the exercise of STS and the disciplinary boundaries must be renegotiated the exercise of rhetoric This book innovatively integrates a sophisticated theoretical approach to the social processes of creating knowledge with a developing pedagogical apparatus The thought questions at the end of each chapter the postscript and the appendix allow the reader to actively engage the text in order to discuss and apply its theoretical insights Creating new standards for interdisciplinary scholarship and communication the authors bring numerous disciplines into conversation in formulating a new kind of rhetoric geared toward greater democratic participation in the knowledge making process This volume is intended for students and scholars in rhetoric of science science studies philosophy and communication and will be of interest in English sociology and knowledge management arenas as well *Digital Geographies* James Ash, Rob Kitchin, Agnieszka Leszczynski, 2018-10-29 As digital technologies have become part of everyday life mediating tasks such as work travel consumption production and leisure they are having increasingly profound effects on phenomena that are of immediate concern to geographers These include the production of space spatiality and mobilities the processes practices

and forms of mapping the contours of spatial knowledge and imaginaries and the formation and enactment of spatial knowledge politics Similarly there are distinct geographies of digital media such as those of the internet games and social media that have become indispensable to geographic practice and scholarship across sub disciplines regardless of conceptual approach This textbook presents a fully up to date synoptic and critical overview of how digital devices logics methods etc are transforming geography It is divided into six inter related sections introduction to digital geographies digital spaces digital methods digital cultures digital economies digital politics With illustrious instructors and researchers contributing to every chapter Digital Geographies is the ideal textbook for courses concerning digital geographies digital and new media and Internet communications and the spatial knowledge of politics

Biotechnology Nico Stehr, 2017-09-08 While other books have addressed isolated aspects of recent developments in the biomedical sciences Biotechnology Between Commerce and Civil Society is the first book to engage with the full range of biotechnology's implications for social science and for society at large Professor Volker Meja New scientific knowledge is no longer merely the key to unlocking the secrets of nature and society It now represents the becoming of a new world Scientific developments affect the ways in which we conduct our affairs as well as how we comprehend the changes underway as the result of novel technical artefacts and scientific knowledge The practical fruits of biotechnology are a case in point they have grasped our imaginations and generated worldwide debate and concern Debates on biotechnology shift between images of utopia and dystopia The social sciences deserve a voice in the debate and can do so through sober examination of the economic social and cultural implications of biotechnology Some economists even predict that the importance of biotechnology as the technology of the future will far exceed that of the information technologies in particular the Internet The contributors to this volume are drawn from a broad spectrum of the social sciences and include Nico Stehr Gene Rosa Steve Fuller Steve Best and Douglas Kellner Nikolas Rose Fred Buttel Javier Lezaun Anne Kerr Susanna Hornig Priest and Toby Ten Eyck Martin Schulte Alexander Somek Steven P Vallas Daniel Lee Kleinman Abby Kinchy and Raul Necochea Herbert Gottweis J Rogers Hollingsworth Gysli Pálsson Elizabeth Ettore Richard Hindmarch and Reiner Grundmann The impact of science on society is destined to be a fundamental concern in the new century This volume illustrates the contributions anthropology law political science and sociology can make to the ongoing discussions about the role of biotechnology in modern societies Nico Stehr is senior research associate Institut für Technikfolgenabschätzung Forschungszentrum Karlsruhe and Institut für Kostenforschung GKSS Germany He also is a fellow in the Center for Advanced Cultural Studies in Essen Germany editor of the Canadian Journal of Sociology and a fellow of the Royal Society of Canada Among his recent books are Werner Sombart Economic Life in the Modern Age with Reiner Grundmann published by Transaction The Fragility of Modern Societies Knowledge and Risk in the Information Age Knowledge and Economic Conduct The Social Foundations of the Modern Economy and Wissenspolitik Die Bewachung des Wissens

Epistemology and Transformation of Knowledge in Global Age Zlatan Delic, 2017-07-26 This book consists

of seven chapters containing multiple questions of the global socially epistemological situation in science and higher education Despite the progress of techno sciences we are facing blind flaws in leading systems of knowledge and perception The global era in a paradox way connects the new knowledge of economics postpolitics postdemocracy and biopolitical regulation of live and unrepresentable forms of the global geo located violence Techno optimism and techno dictatorship in the twenty first century coincide with the ideology of market biopolitics of mandatory satisfaction religious revivalism and collapse of higher education In order for sciences to recover it is necessary to make a globally epistemological and moral turn toward the truth The book shows that when joint desires of the new economics of knowledge and technology erase epistemology in a way to assign definitions of knowledge and rules and practices of the public usage of the mind then the time for epistemology is on its way

The Governance of Knowledge Nico Stehr, 2017-07-05 Social surveillance and regulation of knowledge will be one of the most important issues in the near future one that will give rise to unending controversy In *The Governance of Knowledge* Nico Stehr predicts that such concerns will create a new political field namely knowledge policy which will entail regulating dissemination of the anticipated results of rapidly increasing knowledge The number and range of institutionalized standards for monitoring new knowledge has hitherto been relatively small Only in cases of technological applications has social control in the form of political regulation so far intervened All modern societies today have complex regulations and extensive concerns with the registration licensing testing and monitoring of pharmaceutical products The increasingly important and extensive area of intellectual property legislation and administration is an example of social control in which certain measures selectively determine the use of scientific finds and technical knowledge *The Governance of Knowledge* assembles a range of essays that attempt to explore the new field of knowledge politics for the first time It is divided into four parts The Emergence of Knowledge Politics Origins Context and Consequences Major Social Institutions and Knowledge Politics Case Studies on the Governance of Knowledge and Issues in Knowledge Politics as a New Political Field Individual chapters concern the emergence of knowledge policy the embeddedness of such regulations in major social institutions and offer case studies of the governance of knowledge and discuss controversial issues that are bound to accompany efforts to regulate new knowledge Professionals and graduate students in the fields of sociology political science social science and law including policymakers and natural scientists will find this book extremely informative
