## **Knowledge And Determination The Transition From Hegel To Marx:**

Knowledge and Determination Kyriakos M. Kontopoulos, 1980-01-01      *Western Political Thought* Robert Eccleshall, Michael Kenny, 1995 This is a guide to the vast amount of literature on the history of political thought which has appeared in English since 1945 The editors provide an annotation of the content of many entries and where appropriate indicate their significance controversial nature and readability      **Subject Catalog, 1980** Library of Congress, 1980

**Library of Congress Catalogs** Library of Congress, 1981      The Philosopher's Index , 1995 Vols for 1969 include a section of abstracts      *Divergent Paths: The Hegelian foundations of Marx's method* Norman Levine, 2006-01-01 *Divergent Paths* is the first in a series of three volumes that explores the historiography of the relationship between Hegel and Marx it sets the terms of the relationship between Marx and Engels and explores the genesis of the theories of Marxism and Engelsism from the late 19th century to the present day Given the vast pool of contemporary post Marxist theoretical work a study like this is sorely needed This is the most thorough exploration of Marx s ideas from Hegel through to the present day and is absolutely essential reading      **Subject Catalog** Library of Congress,      **Choice** , 1981      **On Knowing** Richard P. McKeon, 2017-02-09 As a philosopher Richard McKeon spent his career developing Pragmatism in a new key specifically by tracing the ways in which philosophic problems arise in fields other than philosophy across the natural and social sciences and aesthetics and showed the ways in which any problem pushed back to its beginning or taken to its end is a philosophic problem The roots of this book *On Knowing The Social Sciences* are traced to McKeon s classes where he blended philosophy with physics ethics politics history and aesthetics This volume the second in a series leaves behind natural science themes to embrace freedom power and history which McKeon argues lay out the whole field of human action The authors McKeon considers Hobbes Machiavelli Spinoza Kant and J S Mill show brilliantly how philosophic methods work in action via analyses that do not merely reduce or deconstruct meaning but enhance those texts by reconnecting them to the active history of philosophy and to problems of ethics politics and history The waves of modernism and post modernism are receding Philosophic pluralism is now available fully formulated in McKeon s work spreading from the humanities to the social sciences      From Marx to Kant Dick Howard, 1992-12-09 Analyzes the relation of philosophy and politics and illustrates this by a reinterpretation of Kant Hegel and Marx On the basis of a retrospective reading of Kant s theory of reflective judgement a concept of a system beyond philosophy is developed to study modern democratic policies      *Library of Congress Catalog* Library of Congress, 1970      The Marxism of Manuel Sacristán Manuel Sacristán, 2014-07-31 *The Marxism of Manuel Sacristán* From Communism to the New Social Movements offers a substantial selection of some the most significant writings on Marx Marxism and radical social theory by Manuel Sacristán Spain s most important Marxist philosopher Whether discussing Marx s intellectual development and philosophical views exploring central issues in Marxist theory or analysing the challenge to contemporary Marxism from feminism pacifism and environmentalism Sacristán emerges in these pages as both a major

Marx scholar and a formidable social theorist in his own right The Marxism of Manuel Sacristán makes available in English for the first time many of the key texts by a brilliant yet neglected Marxist thinker Hegel's Philosophy of Right, with Marx's Commentary H.P. Kainz, 1974-09-30 GEORG WILHELM FRIEDRICH HEGEL 1770 1831 THE PLACE OF HEGEL IN THE HISTORY OF PHILOSOPHY In order to gain a proper perspective of Hegel's place in the history of philosophy it might be useful to focus on one key concept which has evolved significantly in meaning from the time of Aristotle to Hegel I am speaking of the philosophical concept of the category In Aristotle's system there were ten categories or predicaments of reality or being These included substantiality time place quantity quality and other aspects of knowable beings The most notable thing about these categories is that they all have to do with what we would call objective realities That is none of them purport to describe subjective or mental states or conditions In modern philosophy i.e. philosophy since the time of Descartes there was a swing of the pendulum in the opposite direction from objectivity to subjectivity culminating in the twelve new categories of Kant All of Kant's categories were subjective ways of looking at reality We can organize objective phenomena into universal unities therefore the first Kantian category is unity We can separate objective phenomena into particular divisions therefore the second category is plurality And so forth With Hegel the modern trend to subjectivism is arrested and we have not surprisingly a new type of category the category of the unity of thought and being of self and other of subject and object

**From Aristotle to Marx** Jonathan E. Pike, 2019-05-20 First published in 1999 this volume from Dr Jonathan E Pike is original and provocative and integrates sources from the history of ideas analytical philosophy and contemporary social theory Pike has produced an overall account of Marx which focuses on the concept of human potential and clearly explains its ontological basis Anyone interested in Marx studies will be

indebted to this incisive discussion of the philosophical foundations of Marx's work      **Marx's Capital and Hegel's Logic**, 2014-04-17 This book provides a wide ranging and in depth reappraisal of the relation between Marx's economic theory in Capital and Hegel's Logic by leading Marxian economists and philosophers from around the world The subjects dealt with include systematic dialectics the New Dialectics materialism vs idealism Marx's inversion of Hegel Hegel's Concept logic universality particularity singularity Hegel's Essence logic essence appearance Marx's levels of abstraction of capital in general and competition and capital as Hegelian Subject The papers in this volume were originally presented at the 22nd annual meeting of the International Symposium on Marxian Theory at Mount Holyoke College in August 2011 The twelve authors are divided between seven economists and five philosophers as is fitting for the interdisciplinary subject of the relation between Marx's economic theory and Hegel's logic Contributors are Chris Arthur Riccardo Bellofiore Roberto Fineschi Gast n Caligaris Igor Hanzel Juan I igo Carrera Mark Meaney Fred Moseley Patrick Murray Geert Reuten Mario Robles Tony Smith and Guido Starosta      **The Theory of Social Change** John McLeish, 2013-11-05 This is Volume XIX of twenty two in the Social Theory and Methodology series First published in 1969 this study looks at four views of the theory of social change and is intended for students in social studies education and social psychology at university level      Georg Lukacs Reconsidered Michael Thompson, 2011-04-07 An international team of contributors explore contemporary insights into the work of Georg Lukacs in political theory aesthetics ethics and social and cultural theory      *Marx's Capital, Method and Revolutionary Subjectivity* Guido Starosta, 2015-11-24 In Marx's Capital Method and Revolutionary Subjectivity Guido Starosta develops a materialist inquiry into the social and historical determinations of revolutionary subjectivity Through a methodologically minded critical reconstruction of the Marxian critique of political economy from the early writings up to the Grundrisse and Capital this study shows that the outcome of the historical movement of the objectified form of social mediation which has turned into the very alienated subject of social life i e capital is to develop as its own immanent determination the constitution of the self abolishing working class as a revolutionary subject A crucial element in this intellectual endeavour is the focus on the intrinsic connection between the specifically dialectical form of social science and its radical transformative content      **Transcending Postmodernism** M. Kaplan, I. Hamati-Ataya, 2013-11-26 Contemporary philosophy is torn between a reliance on the pragmatic meanings of designated objects and a foundation based on formal theory This book shows that philosophical knowledge which no more has a terminal state than an infinite set has a last term advances when the dialectical relationship between the two approaches is synthesized The choice of designations is intimately related to theory and the form of theory is intimately related to the character of designated objects The intimate dialectical relationship between theory and meaning is explored in detail in the area of international theory The recent emphasis on realism rests on a regressive misunderstanding of the dialectical relationship between theory and practice that loses Newton's acute understanding of it an understanding that underlies the great advances of physics and that is lost in the

contemporary social sciences
