**Edges of Global Justice** Janet M. Conway, 2013. This book explores how the World Social Forum has developed in response to the current period of profound crisis and transition in the history of Western capitalist modernity. **Expose, Oppose, Propose** William K. Carroll, 2016-07-15. Neoliberal capitalism positions us all as consumers in a hypermarket where money talks. For the majority of people around the globe, this translates as precarity and immiseration. But how can we break from this dominant ideological framework? *Expose, Oppose, Propose* details how, since the mid-1970s, transnational alternative policy groups (TAPGs) have functioned as think tanks of a different sort, generating resources for a globalization from below in dialogue with the critical social movements that are protagonists for global justice. Based on two years of intensive research, William Carroll not only provides a detailed examination of a variety of TAPGs, showing how each group is distinctive and autonomous in its vision, practical priorities and ways of producing and mobilizing alternative knowledge, but also reveals how TAPGs form a master frame that advocates and envisages global justice and ecological wellbeing.

**Impulse to Act** Othon Alexandrakis, 2016-10-03. What drives people to take to the streets in protest? What is their connection to other activists and how does that change over time? How do seemingly spontaneous activist movements emerge, endure and evolve, especially when they lack a leader and concrete agenda? How does one analyze a changing political movement immersed in contingency? *Impulse to Act* addresses these questions incisively, examining a wide range of activist movements from the December 2008 protests in Greece to the recent *chto delat* in Russia. Contributors in the first section of this volume highlight the affective dimensions of political movements, charting the various ways in which participants coalesce around and belong to collectives of resistance. The potent agency of movements is highlighted in the second section, where scholars show how the emerging actions and critiques of protesters help disrupt authoritative political structures. Responding to the demands of the field today

the novel approaches to protest movements in *Impulse to Act* offer new ways to reengage with the traditional cornerstones of political anthropology

**Global Democracy and the World Social Forums** Jackie Smith, Marina Karides, Marc Becker, Dorval Brunelle, Christopher Chase-Dunn, Donatella Della Porta, 2015-11-17 The World Social Forum quickly became the largest political gathering in human history and continues to offer a direct challenge to the extreme inequities of corporate led globalisation It has expanded its presence and continues to be an exciting experiment in global and participatory democracy The book's contributors have participated in World Social Forums around the globe Recounting dozens of dramatic firsthand experiences they draw on their knowledge of global politics to introduce the process its foundations and relevance to ongoing transnational efforts toward democracy This second edition of *Global Democracy* shows how the Forums have developed since their inception in 2001 and how they are now connected with other global movements including Occupy the Arab Spring and beyond

Research Ethics and Social Movements Kevin Gillan, Jenny Pickerill, 2016-04-14 What ethical challenges are faced by researchers studying social and political movements Should scholars integrate their personal politics and identities into their research What role should activists have in shaping the purposes or processes of social scientific research How do changing political contexts affect the ethical integrity of a research project over time These are some of the live issues of research ethics that face students and scholars whose

research subjects are located in contentious political terrain The contributors to this volume expose their own ethical thinking as they have met such challenges head on Each explores real dilemmas of ethical practice on the ground as they carry out research on social movements across the globe Authors examining pro democracy activists in Malaysia sanctions breakers in the Gaza Freedom Flotilla environmental health organisations in North America and much else find that the narrow confines of Research Ethics Committees and Institutional Review Boards offer little guidance on the questions that really matter They offer instead a demonstration of continual reflexivity that is both personal and political in its approach This book opens up debate on research ethics delineating key challenges and offering hopeful and practical ways forward for real world ethical social science This book was published as a special issue of Social Movement Studies **The Radical**

**Imagination** Doctor Alex Khasnabish, Max Haiven, 2014-06-12 The idea of the imagination is as evocative as it is elusive Not only does the imagination allow us to project ourselves beyond our own immediate space and time it also allows us to envision the future as individuals and as collectives The radical imagination then is that spark of difference desire and discontent that can be fanned into the flames of social change Yet what precisely is the imagination and what might make it radical How can it be fostered and cultivated How can it be studied and what are the possibilities and risks of doing so This book seeks to answer these questions at a crucial time As we enter into a new cycle of struggles marked by a worldwide crisis of social reproduction scholar activists Max Haiven and Alex Khasnabish explore the processes and possibilities for cultivating the radical imagination in dark times A lively and crucial intervention in radical politics social research and social change and the collective visions and cultures that inspire them **Global Capitalism and Transnational Class**

**Formation** Jason Struna, 2016-03-17 The global capitalism perspective is a unique research program focused on understanding relatively recent developments in worldwide social economic and political practices related to globalization At its core it seeks to contextualize the rearticulation of nation states and broad geographic regions into highly interdependent networks of production and distribution and in so doing explain consequent changes in social relations within and between countries in the contemporary era The present volume contributes to this effort by focusing on social class formation across borders via the processes and actors that make globalized capitalism possible The essays presented here offer a wide range of emphases in terms of the particular lenses and evidence they use They cover such topics as the emergence of a transnational capitalist class based fascist regime responding to the structural crises of global capitalism as well as the links between global class formation and the US racial project as it relates to electoral politics and demographic changes in the US South This book was published as a special issue of Globalizations *An Empire of Indifference* Randy Martin, 2007-03-14 In this significant Marxist critique of contemporary American imperialism the cultural theorist Randy Martin argues that a finance based logic of risk control has come to dominate Americans everyday lives as well as U S foreign and domestic policy Risk management the ability to adjust for risk and to leverage it for financial gain is the key to personal finance as well as the

defining element of the massive global market in financial derivatives The United States wages its amorphous war on terror by leveraging particular interventions such as Iraq to much larger ends winning the war on terror and by deploying small numbers of troops and targeted weaponry to achieve broad effects Both in global financial markets and on far flung battlegrounds the multiplier effects are difficult to foresee or control Drawing on theorists including Michel Foucault Giorgio Agamben Michael Hardt Antonio Negri and Achille Mbembe Martin illuminates a frightening financial logic that must be understood in order to be countered Martin maintains that finance divides the world between those able to avail themselves of wealth opportunities through risk taking investors and those who cannot do so who are considered at risk He contends that modern day American imperialism differs from previous models of imperialism in which the occupiers engaged with the occupied to civilize them siphon off wealth or both American imperialism by contrast is an empire of indifference a massive flight from engagement The United States urges an embrace of risk and self management on the occupied and then ignores or dispossesses those who cannot make the grade
