Japan Works:

Japan Works John Price, 2018-09-05 The postwar miracle says John Price made Japan and its corporations the toast of the global village with scholars across the United States pointing to Japan as the model for future enterprise The economic bubble burst however in 1989 and Price documents difficulties that have surfaced since that time In Japan itself the common self assessment is rich country poor people and government reports regularly criticize society for being too enterprising In emulating Japan Price asks are we choosing a path Japan itself is rejecting Price probes the paradoxes in postwar labor management relations particularly in the years between 1945 and 1975 Basing his analysis on the history of labor in Mitsui s Miike mine in Kyushu Suzuki Motors in Hamamatsu and Moriguchi City Hall the author questions the common interpretation that industrial relations are based on lifetime jobs seniority based wages and enterprise unions He also asks whether Japanese workers have been genuinely empowered by the developments in recent years In his description of the rough and tumble world of postwar Japanese industrial relations Price pays particular attention to the Occupation period the rise of Shunto the increased industrial conflict prior to 1975 and the transition to generalized labor management cooperation Relying on French regulation theory and on Michael Burawoy s concept of production regimes Price suggests a revisionist interpretation of the transformation of Japan s political economy offering new insights into the rise of lean production and the quality movement in Japan

How Weak Regionalism in East Asia Works Well Luna Ge Lai, 2024-10-31 This book investigates the reasons why regionalism in East Asia has been much weaker than in Western Europe and North America It focuses particularly on economic factors examining the regional and global linkages of production networks Through a focused exploration of regional and global production networks it argues that East Asia was not as regionally concentrated as was Western Europe or North America lacking a regionally oriented productional basis to support the institutional arrangement of East Asia as a stand alone economic community Moreover the regional production networks of each national economy in the region are influenced by a different set of value added components from different global and regional origins This divergence in their positions accounts for the mushrooming of divergent initiatives and projects for regional institutional arrangement Finally the institutional choices of the states to join Comprehensive and Progressive Agreement for Trans Pacific Partnership CP TPP and or Regional Comprehensive Economic Partnership RCEP are found to be strongly influenced by the sectoral focuses and priorities of their economies Demonstrating how the unique economic factors of each nation override other considerations for greater regional integration this book will be a valuable resource to students and scholars of international trade Asian politics and economics
