Alpert, 2013-05-13 Within the psychoanalytic framework there is a growing body of research and thinking about female development In addition there is ongoing research within other areas of psychology such as developmental psychology and social psychology which has important implications for an understanding of women's adult development Often these research findings are not readily available to the analytic community nor has much of the research been incorporated into a psychoanalytic framework Psychoanalysis and Women broadens analytic thinking by integrating contemporary literature from psychoanalysis with that of other areas both within and outside psychology which has implications for the understanding of women's development This literature is conceptualized within a psychoanalytic framework A basic premise underlying this book is that psychoanalysis needs continuing review and revision in terms of what women and men are about and a continuing focus on whether and how unfounded biases prevent analysts from understanding patients The present volume considers how sexism and feminism are affecting psychoanalysis and exemplifies how the emerging field of psychoanalysis of women and the issues its existence raises should be conceptualized It also exemplifies some of the positive contributions that a feminist outlook gives to the study of human behavior and should expand the range of hypotheses that we have about people

Women's Health in Africa Chimaraoke Izugbara, Eleanor Covan, Elizabeth Fugate-Whitlock, 2017-10-02 This edited book includes new policy

relevant research on women's health issues in Africa. Scholars explore critical topics from different disciplinary traditions using a variety of research methodologies and data sources. The contributors include African scholars with in-depth knowledge of their home contexts who can furnish nuanced interpretations of local health issues and trends; international researchers who bring vigorous comparative viewpoints; emerging scholars adding to scientific knowledge; and more established researchers with a deep global knowledge of women's health issues. The range of women's health issues is vast, including the HIV epidemic and its impacts, domestic violence, the persistence of homebirths and abortion. In addition, the book investigates emerging health concerns such as CVDs and cancers. Readers will learn that while old health issues have persisted and assumed new dimensions, newer concerns have materialized and are gaining momentum. The inability of health systems to tackle these issues complicates matters in Africa, creating a sense of desperation that can only be successfully confronted through strong political will and strategic planning grounded in further research. This book was originally published as several special issues of *Health Care for Women International*.

Reforming Education and Challenging Inequalities in Southern Contexts Pauline Rose, Madeleine Arnot, Roger Jeffery, Nidhi Singal, 2021-03-24. This book offers in-depth analyses of how education interacts with social inequality in Southern contexts. Drawing on a range of disciplinary frameworks, it presents new analyses of existing knowledge and new empirical data which define the challenges and possibilities of successful educational reform. It is a tribute to the work of the late Christopher Colclough, who as a leading figure in education and international development played a key role in the global fight for education for all children. The book critically engages with international evidence of educational access, retention, and outcomes, offering new understandings of how social inequalities currently facilitate, mediate, or restrict educational opportunities. It exposes the continuing influence of wealth and regional inequalities and caste and gendered social structures. Researchers in Ethiopia, Ghana, India, Pakistan, and Uganda highlight how the aspirations of families living in poverty remain unfilled by poor quality education and low economic opportunities, and how schools and teachers currently address issues of gender, disability, and diversity. The book highlights a range of new priorities for research and identifies some necessary strategies for education reform, policy approaches, and school practice if educational equality for all children is to be achieved. The book will be of great interest to researchers, scholars, educational practitioners, and policy makers in the fields of economics, politics, and sociology of education, international education, poverty research, and international development.
