Encountering American Faultlines Jose Itzigsohn, 2009-06-18 The descendants of twentieth century southern and

central European immigrants successfully assimilated into mainstream American culture and generally achieved economic parity with other Americans within several generations So far that is not the case with recent immigrants from Latin America and the Caribbean A compelling case study of first and second generation Dominicans in Providence Rhode Island Encountering American Faultlines suggests that even as immigrants and their children increasingly participate in American life and culture racialization and social polarization remain key obstacles to further progress Encountering American Faultlines uses occupational and socioeconomic data and in depth interviews to address key questions about the challenges Dominicans encounter in American society What is their position in the American socioeconomic structure What occupations do first and second generation Dominicans hold as they enter the workforce How do Dominican families fare economically How do Dominicans identify themselves in the American racial and ethnic landscape The first generation works largely in what is left of Providence's declining manufacturing industry Second generation Dominicans do better than their parents economically but even as some are able to enter middle class occupations the majority remains in the service sector working class Jos Itzigsohn suggests that the third generation will likely continue this pattern of stratification and he worries that the chances for further economic advancement in the next generation may be seriously in doubt While transnational involvement

is important to first generation Dominicans the second generation concentrates more on life in the United States and empowering their local communities Itzigsohn ties this to the second generation's tendency to embrace panethnic identities Panethnic identity provides Dominicans with choices that defy strict American racial categories and enables them to build political coalitions across multiple ethnicities This intimate study of the Dominican immigrant experience proposes an innovative theoretical approach to look at the contemporary forms and meanings of becoming American Jos Itzigsohn acknowledges the social exclusion and racialization encountered by the Dominican population but he observes that by developing their own group identities and engaging in collective action and institution building at the local level Dominicans can distinguish themselves and make inroads into American society But Encountering American Faultlines also finds that hard work and hope have less to do with their social mobility than the existing economic and racial structures of U S society

The Constitution of Selves Marya Schechtman, 1996 An amnesia victim asking Who am I means something different from a confused adolescent asking the same question Marya Schechtman takes issue with analytic philosophy's emphasis on the first sort of question to the exclusion of the second The problem of personal identity she suggests is usually understood to be a question about historical life What she calls the reidentification question is taken to be the real metaphysical question of personal identity whereas questions about beliefs or values and the actions they prompt the characterization question are often presented as merely metaphorical Failure to recognize the philosophical importance of both these questions Schechtman argues has undermined analytic philosophy's attempts at offering a satisfying account of personal identity Considerations related to the characterization question creep unrecognized into discussions of reidentification with the result that neither question is adequately addressed Schechtman shows how separating the two questions allows for a more fruitful approach to the reidentification question and she develops her own narrative account of characterization She suggests that persons constitute their identities by developing autobiographical narratives that bear the right relation to facts about the environment the general concept of a person and other people's concepts of who they are

The German Question Dirk Verheyen, 2018-05-04 The German Question long a subject of debate is considered here at the close of a turbulent century after Germany's defeat in two world wars the Weimar failure and Nazi disaster Cold War division and the nation's unexpected recent reunification This book systematically explores the issue in terms of its four central dimensions Germany's identity national unity power and role in world politics Ambitious in conception and meticulous in execution Dirk Verheyen's wide ranging analysis incorporates historical and geopolitical considerations in an intellectually rigorous yet accessible discussion

Constructing Identity in Contemporary Architecture Peter Herrle, Stephanus Schmitz, 2009 The global spread of uniform modes of production and cultural values has been accompanied by a dissemination of stereotypes of modern architecture styles almost everywhere around the globe Paradoxically the reverse process has also emerged In some countries the elites feel the necessity to counterbalance the loss of identity and defend their own cultures against the

intruding forces of globalization What started as a defensive notion has developed into a more progressive attempt to re create what has allegedly been lost This trend is being strongly expressed in discourses about architecture in countries of the South Who are the actors feeling compelled to construct new identities How are these new identities in architecture created in various parts of the world And which are the ingredients borrowed from various historical and ethnic traditions and other sources These and other questions are discussed in five case studies from different parts of the world written by renowned scholars from Brazil Mexico Egypt India and Singapore

in defence of key democratic principles and governance Enabling Students' Voices and Identities Arie Kizel, 2024-05-15

One of the challenges that educational systems are facing worldwide is enabling the voices of children from silenced marginalized and excluded groups to be heard in communities of philosophical inquiry. Children from unprivileged socioeconomic sectors or minorities and whose narrative is not in accord with that of the dominant mainstream narrative often feel uncomfortable expressing their feelings, experiences and mostly their authentic philosophical questions during communities of philosophical inquiry. They prefer not to raise the questions from their identity perspective. Even if they are friendly, such communities of inquiry are governed even if implicitly by the hegemonic meta narrative. This book addresses the challenges of authentic inclusion of these children and their identities narratives. Arie Kizel analyzes both how discourse about multiple identities and narratives can enrich the theoretical foundations of philosophy for and with children as opposed to the sterile banking and normalizing education and the challenge of various identities and their uniqueness within childhood in order to offer theoretical and pedagogical educational solutions within philosophy for and with children. This book furthers our understanding of dialogical inquiry particularly within a pluralistic environment that explicitly promotes democratic culture.
