Identity And Affect:

Festivals, Affect and Identity Lita Crociani-Windland, 2011-10-15 Via an ethnographic study of the community festivals of Siena Province in central Italy *Festivals Affect and Identity* investigates the affective and fluid aspects of reality to establish an integrated perspective on issues of continuity and rupture tradition and modernity and nature and culture Offering an illustration of the explanatory power of continental philosophy this text demonstrates the accessibility of highly abstract critical theory when examined in relation to specific events and their detailed analysis Does identity affect aspirations in rural India? An examination from the lens of caste and gender Alvi, Muzna Fatima, Ward, Patrick S., Makhija,

Simrin, Spielman, David J., We use priming a concept popular in social psychology to study the effect of identity salience on aspirations for self and children as part of an impact evaluation in Odisha India We measure the effect of an individual's gender and caste identity salience on improving aspirations for themselves and for their children's future profession and education We find that when women are primed on gender they exhibit higher aspirations for their daughters Similarly low caste women primed on caste are more aspirational for their daughters We do not find similar results for men The effect of caste priming is more apparent in areas where significant ethnic heterogeneity exists and muted in ethnically homogenous areas We find that aspirations for boys are already very high thus priming has no effect on aspirations for sons **Symbolic**

develop during ongoing intergroup interactions thus enabling the empirical investigation of the fundamental biological bases of prejudice However several very promising strands of research have largely developed independently of each other By bringing together the work of leading prejudice researchers from across the world who have begun to study this field with different neuroscientific tools this volume provides the first integrated view on the specific drawbacks and benefits of each type of measure illuminates how standard paradigms in research on prejudice and intergroup relations can be adapted for the use of neuroscientific methods and illustrates how different methodologies can complement each other and be combined to advance current insights into the nature of prejudice This cutting edge volume will be of interest to advanced undergraduates graduates and researchers students who study prejudice intergroup relations and social neuroscience
