Educating the "right" Way Michael W. Apple, 2001 As American schools undergo a dramatic shift to the right Michael W Apple internationally acclaimed author and educator uncovers the roots of this conservative swing and points the way to a more balanced approach Why have the needs of private business become top priorities in the public classroom How did school vouchers move from the conservative fringe to the political mainstream Why are scores on standardized tests falling even as teachers are forced to cram more facts into their curricula Apple argues that the interests of some strange bedfellows neo liberals neo conservatives authoritarian populists and the professional middle class have converged to threaten the egalitarian ideals on which American public education was built He dissects how this coalition has pushed educational policies toward a combination of weak state practices markets school choice and strong state practices state mandated curricula and testing A former classroom teacher himself Apple offers concrete common sense solutions that show what critical educators and parents can do to interrupt these trends and develop a more democratic educational system suited to the needs of all American children Michael W Apple is the Bascom Professor of Curriculum and Instruction and Educational Policy Studies at the University of Wisconsin Madison He has recently been awarded both a

Lifetime Achievement Award by the American Educational Research Association and a UCLA Medal for outstanding academic achievement in education Apple is a world renowned figure in educational and social policy He is the editor of Routledge's very successful series Critical Social Thought Apple's book *Ideology and Curriculum* was internationally voted as one of the top twenty books on education in the 20th century his books are published in fifteen languages Not merely a critique of the right but of the left as well addresses current critical problems in our schools *Knowledge, Power, and Education* Michael W. Apple, 2013 For more than three decades Michael Apple has sought to uncover and articulate the connections among knowledge teaching and power in education In this collection Michael brings together 13 of his key writings in one place providing an overview not just of his own career but the larger development of the field *Ideology, Culture & the Process of Schooling* Henry A. Giroux, 1984-10 This book lays bare the ideological and political character of the positivist rationality that has been the primary theoretical underpinning of educational research in the United States These assumptions have expressed themselves in the form and content of curriculum classroom social relations classroom cultural artifacts and the experiences and beliefs of teachers and students Have existing radical critiques provided the theoretical building blocks for a new theory of pedagogy The author attempts to move beyond the abstract negative characteristics of many radical critiques which are often based on false dualisms that fail to link structure and intentionality content and process ideology and hegemony etc He also is critical of the over determined models of socialization and the abstract celebration of subjectivity that underlies much of the false utopianism of many radical perspectives Professor Giroux begins to lay the theoretical groundwork for developing a radical pedagogy that connects critical theory with the need for social action in the interest of individual freedom and social reconstruction Author note Henry A Giroux is Assistant Professor of Education at Boston University He is the co editor of *Curriculum and Instruction Alternatives in Education* and *The Hidden Curriculum and Moral Education* **Schooling, Ideology, and the Curriculum** Len Barton, Roland Meighan, Stephen Walker, 2012 *The Critical Turn in Education* Isaac Gottesman, 2016-03-17 The Critical Turn in Education traces the historical emergence and development of critical theories in the field of education from the introduction of Marxist and other radical social theories in the 1960s to the contemporary critical landscape The book begins by tracing the first waves of critical scholarship in the field through a close contextual study of the intellectual and political projects of several core figures including Paulo Freire Samuel Bowles and Herbert Gintis Michael Apple and Henry Giroux Later chapters offer a discussion of feminist critiques the influx of postmodernist and poststructuralist ideas in education and critical theories of race While grounded in U S scholarship The Critical Turn in Education contextualizes the development of critical ideas and political projects within a larger international history and charts the ongoing theoretical debates that seek to explain the relationship between school and society Today much of the language of this critical turn has now become commonplace words such as hegemony ideology and the term critical itself but by providing a historical analysis The Critical Turn in Education illuminates the complexity and
