## **If One Were To Write A History:**

**A History of African Societies to 1870** Elizabeth Isichei, 1997-04-13 This comprehensive and detailed exploration of the African past from prehistory to approximately 1870 is intended to provide a fully up to date complement to the Cambridge History of Africa Reflecting several emphases in recent scholarship it focusses on the changing modes of production on gender relations and on ecology laying particular stress on viewing history from below A distinctive theme is to be found in its analyses of cognitive history The work falls into three sections The first comprises a historiographic analysis and covers the period from the dawn of prehistory to the end of the Early Iron Age The second and third sections are for the most part organised on regional lines the second section ends in the sixteenth century the third carries the story on to 1870 A second volume now in preparation will cover the period from 1870 to 1995 This book attempts a more rounded view of African history than most of the other textbooks on the subject addressed to a largely undergraduate level student Earlier histories have tended to ignore some of the current foci in the scholarly literature on Africa generally not reflected in the textbooks these include discussions of topical issues like ecology and gender Isichei's book is also more radical

**Relativism, Alternate History, and the Forgetful Reader** Derek Thiess, 2014-11-25 The writer of alternate history asks what if What if one historical event were different what would the world look like today In a similar way the postmodern philosopher of history suggests that history is literature or that if we read certain historical details differently we would get a distinctly different interpretation of past events While the science fiction alternate history means to illuminate the past to increase our understanding of past events however the postmodern approach to history typically suggests that such understanding is impossible To the postmodern philosopher history is like literature in that it does not offer the reader access to the past but only an interesting story Building on criticism that suggests personal psychological reasons for this obscuring the past and using a literary theory of readership this book challenges the postmodern approach to history It channels the speculative power of science fiction to read the works of postmodern philosophy of history as alternate histories themselves and to map the limits and pathology of their forgetful reading of the past
