The Thee Generation

Tom Regan, 1991 The revolution examined in this collection of essays is a revolution of the human spirit In this revolution Tom Regan passionately contends that the expansive ethic of service is replacing the suffocating ethic of greed Unlike previous generations The Thee Generation asks What do I have to give rather than What can I get to Keep Regan defines Thee as those to be served the handicapped the poor the illiterate the homeless the starving and the abused those newly born and those soon to die This generation is generous enough to include the animal kingdom and even the earth itself for the world of The Thee Generation is a place where a shared sense of community replaces the void of individual estrangement Each of these provocative readable essays most of which have not been previously published offers answers to important moral questions and attempts to identify the right reasons for those answers Regan addresses such topics as child pornography feminism deep ecology vivisection

Christian theology and career choice The questions he raises force us to consider the boundaries of the moral community and what it means to be human in our own generation The human is but one life form among many and what distinguishes us from the larger community of life is not our power to subdue but our responsibility to protect Author note Tom Regan Professor of Philosophy at North Carolina State University has published numerous books including Bloomsbury's Prophet Temple and The Case for Animal Rights

Animals and Women Carol J. Adams, Josephine Donovan, 1995-11-14 Animals and Women is a collection of pioneering essays that explores the theoretical connections between feminism and animal defense Offering a feminist perspective on the status of animals this unique volume argues persuasively that both the social construction and oppressions of women are inextricably connected to the ways in which we comprehend and abuse other species Furthermore it demonstrates that such a focus does not distract from the struggle for women's rights but rather contributes to it This wide ranging multidisciplinary anthology presents original material from scholars in a variety of fields as well as a rare early article by Virginia Woolf Exploring the leading edge of the species gender boundary it addresses such issues as the relationship between abortion rights and animal rights the connection between woman battering and animal abuse and the speciesist basis for much sexist language Also considered are the ways in which animals have been regarded by science literature and the environmentalist movement A striking meditation on women and wolves is presented as is an examination of sexual harassment and the taxonomy of hunters and hunting Finally this compelling collection suggests that the subordination and degradation of women is a prototype for other forms of abuse and that to deny this connection is to participate in the continued mistreatment of animals and women

Intervention or Protest Gabriel Garmendia da Trindade, Andrew Woodhall, 2020-10-06 Within current political social and ethical debates both in academia and society activism and how individuals should approach issues facing nonhuman animals have become increasingly important hot issues Individuals groups advocacy agencies and governments have all espoused competing ideas for how we should approach nonhuman use and exploitation Ought we proceed through liberation Abolition Segregation Integration As nonhuman liberation welfare and rights groups increasingly interconnect and identify with other social justice movements resolutions to these questions have become increasingly entangled with questions of what justice and our ethical commitments demand on this issue and the topic has become increasingly significant and divisive The book considers how this question and contemporary issues facing nonhumans such as experimentation hunting and factory farming should be answered by drawing on both theory and practice in order to provide grounded yet actionable ways forward Indicatively the book covers topics such as The intersection between nonhuman ethics and the ethics of war and self defence Nonhuman animals as political subjects and acting agents Whether we should intervene for nonhuman animals in cases of natural disaster Various explorations of why the nonhuman movement may not be succeeding as well as it could be Comparisons between the nonhuman movement and other social movement Arguments for and against intervening to help or save nonhumans and how far we may go What intervention could ultimately mean for nonhumans The book is therefore intended not only to provide new and interesting insight into the area and important contemporary discussions but also to constructively aid the nonhuman movement and unite theory and practice on the crucial issues With the nonhuman movement and its past approaches currently being questioned as a success more nonhumans than ever being harmed and exploited and a growing gulf between activists and scholars this book will not only be a timely addition to the literature but an attempt to bridge these gaps and move both theory and practice and thus the movement and field forward

Beyond Prejudice Evelyn B. Pluhar, 1995 In *Beyond Prejudice* Evelyn B Pluhar defends the view that any sentient conative being one capable of caring about what happens to him or herself is morally significant a view that supports the moral status and rights of many nonhuman animals Confronting traditional and contemporary philosophical arguments she offers in clear and accessible fashion a thorough examination of theories of moral significance while decisively demonstrating the flaws in the arguments of those who would avoid attributing moral rights to nonhumans Exposing the traditional view which restricts the moral realm to autonomous fully fledged persons as having horrific implications for the treatment of many humans Pluhar goes on to argue positively that sentient individuals of any species are no less morally significant than the most automomous human Her position provides the ultimate justification that is missing from previous defenses of the moral status of nonhuman animals In the process of

advancing her position Pluhar discusses the implications of determining moral significance for children and abnormal humans as well as its relevance to population policies the raising of animals for food or product testing decisions on hunting and euthanasia and the treatment of companion animals In addition the author scrutinizes recent assertions by environmental ethicists that all living things or that natural objects and ecosystems be considered highly morally significant This powerful book of moral theory challenges all defenders of the moral status quo which decrees that animals decidedly do not count to reevaluate their convictions

Ethical and Moral Issues Relating to Animals Janice C. Swanson, 1992

Considering Animals Dr Carol Freeman, Dr Elizabeth Leane, Ms Yvette Watt, 2013-07-28 Considering Animals draws on the expertise of scholars trained in the biological sciences humanities and social sciences to investigate the complex and contradictory relationships humans have with nonhuman animals Taking their cue from the specific animal moments that punctuate these interactions the essays engage with contemporary issues and debates central to human animal studies the representation of animals the practical and ethical issues inseparable from human interactions with other species and perhaps most challengingly the compelling evidence that animals are themselves considering beings Case studies focus on issues such as animal emotion and human sentimentality the representation of animals in contemporary art and in recent films such as March of the Penguins Happy Feet and Grizzly Man animals experiences in catastrophic events such as Hurricane Katrina and the SARS outbreak and the danger of overvaluing the role humans play in the earth's ecosystems From Marc Bekoff's moving preface through to the last essay Considering Animals foregrounds the frequent sometimes uncanny exchanges with other species that disturb our self-contained existences and bring into focus our troubled relationships with them Written in an accessible and jargon-free style this collection demonstrates that in the face of species extinction and environmental destruction the roles and fates of animals are too important to be left to any one academic discipline
