With chapters written by renowned experts in the field, the book addresses the dynamics of language language learning and language teaching from a usage based perspective. The book contains both theory and empirical work; the initial theoretical chapters present cutting edge thinking in relation to both the scope of DUB theory and its applications, providing conceptual perspectives from cognitive grammar and linguistics thinking for speaking TFS and Complex Dynamic Systems Theory CDST approaches united by their shared underpinnings of language as a dynamic system of conventionalized routines. The second half of the volume showcases state of the art methodologies to study dynamic trajectories of language learning, empirical investigations into the above mentioned theoretical concepts and innovative classroom implementations of DUB language pedagogy.

As such, the innovative ideas it provides can be applied in practising teachers' classrooms to promote more effective and efficient student learning. Beyond pedagogical innovations, the book also includes papers on the assessment of Chinese Language learning and teacher literacy, two areas that have been largely neglected by the Chinese Language research and teaching communities not only here in Singapore but also around the world.
