Paul-Alan Johnson, 1994-04-18 The Theory of Architecture Concepts Themes Practices Paul Alan Johnson Although it has long been thought that theory directs architectural practice no one has explained precisely how the connection between theory and practice is supposed to work This guide asserts that architectural theory does not direct practice but is itself a form of reflective practice Paul Alan Johnson cuts through the jargon and mystery of architectural theory to clarify how it relates to actual applications in the field He also reveals the connections between new and old ideas to enhance the reader's powers of critical evaluation Nearly 100 major concepts themes and practices of architecture as well as the rhetoric of architects and designers are presented in an easily accessible format Throughout Johnson attempts to reduce each architectural notion into its essential concept By doing so he makes theory accessible for everyday professional discussion Topics are arranged under ten headings identification definition power attitudes ethics order authority governance relationship and expression Areas covered under these headings include Utopic thought in theories of architecture Advocacy and citizen participation in architecture The basis of architectural quality and excellence The roles of the architect as artist poet scientist and technologist Ethical obligations of architecture Rationales for models and methods of design How authority is determined in architecture How architects structure their concepts Conventions of communication within the architectural profession Each section begins by showing the etymology of key terms of the topic discussed along with a summary history of the topic's use in architecture Discussions probe the conceptual and philosophical difficulties of different theories as well as their potential and limitations in past and present usage Among the provocative issues discussed in terms of their relationship to architecture are chaos theory feminism service to the community and the use of metaphor Johnson points out with stunning clarity the intentions as well as the contradictions and inconsistencies of all notions and concepts All architects and designers as well as students and teachers in these disciplines will gain many insights about architectural thought in this groundbreaking text Wright Studies, 1992 **Una historia universal de la arquitectura. Un análisis cronológico comparado a través de las culturas**

Francis D. K. Ching, Vikramaditya Prakash, Mark M. Jarzombek, 2013-05-09 Este libro ofrece un excepcional recorrido cronológico por más de 500 obras paradigmáticas de la historia universal de la arquitectura Lejos de centrarse en países y regiones específicos el manual se organiza en estricto orden cronológico para que todas las culturas y civilizaciones converjan a través de sus legados arquitectónicos Gracias a este enfoque innovador el lector dispondrá de una lectura transversal comparada que permite comprender las conexiones contrastes e influencias mutuas de las diferentes culturas arquitectónicas Cada obra cuenta con una descripción completa del contexto en que se edificó y de sus

características más relevantes y viene acompañada de un rico material gráfico que puede incluir mapas, fotografías y por supuesto las ilustraciones elaboradas por el célebre maestro del dibujo arquitectónico Francis D K Ching. Este segundo volumen abarca desde el siglo xv hasta nuestros días y presenta coincidencias temporales reveladoras como las del período del Renacimiento europeo cuyo desarrollo coincide en el tiempo con la construcción del Machu Picchu en Perú y la Ciudad Prohibida de Pekín o como el esplendor de la arquitectura mogol en la ciudad de Fatehpur Sikri coincide con la construcción de las primeras haciendas españolas en América y las villas de Andrea Palladio. A su vez, el libro muestra cómo la colonización europea supuso la expansión mundial de la arquitectura del Viejo Continente, un recorrido que llega hasta la era actual de la arquitectura globalizada.
