Isaac Watts,1811 Astrotopia Mary-Jane Rubenstein,2022-11-25 A revealing look at the parallel mythologies behind the colonization of Earth and space and a bold vision for a more equitable responsible future both on and beyond our planet As environmental political and public health crises multiply on Earth we are also at the dawn of a new space race in which governments team up with celebrity billionaires to exploit the cosmos for human gain The best known of these pioneers are selling different visions of the future while Elon Musk and SpaceX seek to establish a human presence on Mars Jeff Bezos and Blue Origin work toward moving millions of earthlings into rotating near Earth habitats Despite these distinctions these two billionaires share a core utopian project the salvation of humanity through the exploitation of space In Astrotopia philosopher of science and religion Mary Jane Rubenstein pulls back the curtain on the not so new myths these space barons are peddling like growth without limit energy without guilt and salvation in a brand new world As Rubenstein reveals we have already seen the destructive effects of this frontier zealotry in the centuries long

history of European colonialism Much like the imperial project on Earth this renewed effort to conquer space is presented as a religious calling in the face of a coming apocalypse some very wealthy messiahs are offering an other worldly escape to a chosen few But Rubenstein does more than expose the values of capitalist technoscience as the product of bad mythologies She offers a vision of exploring space without reproducing the atrocities of earthly colonialism encouraging us to find and even make stories that put cosmic caretaking over profiteering
