Performing Authorship Cecilia Sayad, 2013-09-17 The figure of the auteur continues to haunt the study of film resisting both the poststructuralist charges that pointed to its absence and the histories of production that have described its pitfalls In an era defined by the instability of identities and the recycling of works *Performing Authorship* offers a refreshingly new take on the cinematic auteur proposing that the challenges that once accelerated this figure's critical demise should instead pump new life into it This book is about the drama of creative processes in essay documentary and fiction films with particular emphasis on the effects that the filmmaker's body exerts on our sense of an authorial presence It is an illuminating analysis of films by Jean Luc Godard Woody Allen Agnes Varda Orson Welles Jean Rouch Eduardo Coutinho and Sarah Turner that shows directors shifting between opposite movements towards exposure and masking oscillating between the assertion and divestiture of their authorial control In the process Cecilia Sayad argues the film author is not necessarily at the work's origin nor does it constitute the end product What this new concept of performing authorship describes is the making and unmaking of a subject

known 78 Cards 22 images which could be said to describe a journey through life and a further 56 which add people and textures to the main chapters of that adventure As someone who has been exploring the Tarot for several decades I can honestly say that it one of the most visually poetic embodiments of esoteric teachings available to the student of the arcane It is frequently misrepresented as simply an oracle and given an esoteric history which is firmly in the realms of the fairy tale but when understood it is a symbolic initiatory system which opens a doorway to spiritual exploration This book represents a way of taking a journey of self discovery and in the process developing intuition and genuine insight

Masculinities in Literature of the American West Lydia R. Cooper, 2016-11-15 The Western genre provides the most widely recognized iconic images of masculinity in the United States: gun-slinging, laconic white male heroes who emphasize individualism, violence, and an idiosyncratic form of justice. This idealized masculinity has been fused with ideas of national identity and character. *Masculinities in Literature of the American West* examines how contemporary literary Westerns push back against the coded image of the Western hero, exposing pervasive anxieties about what it means to act like a man. Contemporary Westerns critique assumptions about innate connections between power, masculinity, and American character that influence public rhetoric even in the late 20th and early 21st centuries. These novels struggle with the monumental challenge of all Westerns: the challenge of being human in a place where being a man is so strictly coded, so unachievable, so complicit in atrocity, and so desirable that it is worth dying for, worth killing for, or perhaps worth nothing at all.
