Mathematical Methods in Computer Science Jacques Calmet, Willi Geiselmann, Jörn Müller-Quade, 2008-12-09 This Festschrift volume contains the proceedings of the conference Mathematical Methods in Computer Science MMICS 2008 which was held during December 17 19 2008 in Karlsruhe Germany in memory of Thomas Beth The themes of the conference reflected the many interests of Thomas Beth Although these interests might seem diverse mathematical methods and especially algebra as a language constituted the common denominator of all of his scientific achievements The 12 contributed talks presented were carefully selected from 30 submissions and cover the topics cryptography designs quantum computing algorithms and coding theory Furthermore this volume contains two invited talks

held at the conference One focuses on the area of coding theory and symbolic computation an area especially appreciated by Thomas Beth because it combines algebra and algorithmics The other one discusses quantum information which again was a focus of Thomas Beth s research
