Foundations Of Databases The Logical Level:

Foundations of Databases Serge Abiteboul,Richard Hull,Victor Vianu,1995 This product is a complete reference to both classical material and advanced topics that are otherwise scattered in sometimes hard to find papers A major effort in writing the book was made to highlight the intuitions behind the theoretical development **Foundations of IT** Dhiraj Sharma,2009 Today every member of a business entity at all the levels of management has to deal with technology while performing his or her job responsibilities As a result from entry level executive to the level of CEO all the members of an organization encounter technology on a daily basis Today s students and tomorrow s executives have to take the advantage of technology they must know how to use technology efficiently and effectively Appropriate application of IT is one of the primary keys to efficient and effective business operation as we are into the 21st century The present book attempts to provide the required foundation in the area of Information Technology Foundations of I T is designed for computer and management students with no particular background in Computers or Information Technology The book not only covers the basic and fundamentals of IT but also deals with advance concepts and structures comprehensively The present book will be useful in understanding the fundamentals applications and major roles IT play in various walks of life daily The present text also focuses on the technological changes and trends that are revolutionizing the various knowledge areas under business management The role and applications of information technology in business have been extensively discussed in the present book Attempt has been made to follow non technical and simple to understand approach throughout the text The present text also serves as a course and textbook particularly for the papers of Information Technology and Computer Fundamentals of MBA BBA MCA BCA B Sc IT PGDCA M Com etc being run by various colleges and universities **Artificial Intelligence: Methodology, Systems, and Applications** Darina Dicheva,Danail Dochev,2010-09-03 The 14th International Conference on Artificial Intelligence Methodology Systems Applications AIMSA 2010 was held in Varna Bulgaria during September 8 10 2010 The AIMSA conference series has provided a biennial forum for the presen tion of artificial intelligence research and development since 1984 The conference covers the full range of topics in artificial intelligence AI and related disciplines and provides an ideal forum for international scientific exchange between Central Eastern Europe and the rest of the world The 2010 AIMSA edition continued this tradition For AIMSA 2010 we decided to place special emphasis on the application and leverage of AI technologies in the context of knowledge societies where knowledge creation accessing acquiring and sharing empower individuals and communities A number of AI techniques play a key role in responding to these challenges AI is tensively used in the development of systems for effective management and flexible and personalized access to large knowledge bases in the Semantic Web technologies that enable sharing and reuse of and reasoning over semantically annotated resources in the emerging social Semantic Web applications that aid humans to collaboratively build semantics in the construction of intelligent environments for supporting human and agent learning etc In building such intelligent

applications AI techniques are typically combined with results from other disciplines such as the social sciences distributed systems databases digital libraries information retrieval service oriented applications etc **Database and Expert Systems Applications** Sven Hartmann,Hui Ma,Abdelkader Hameurlain,Günther Pernul,Roland R. Wagner,2018-08-20 This two volume set of LNCS 11029 and LNCS 11030 constitutes the refereed proceedings of the 29th International Conference on Database and Expert Systems Applications DEXA 2018 held in Regensburg Germany in September 2018 The 35 revised full papers presented together with 40 short papers were carefully reviewed and selected from 160 submissions The papers of the first volume discuss a range of topics including Big data analytics data integrity and privacy decision support systems data semantics cloud data processing time series data social networks temporal and spatial databases and graph data and road networks The papers of the second volume discuss a range of the following topics Information retrieval uncertain information data warehouses and recommender systems data streams information networks and algorithms database system architecture and performance novel database solutions graph querying and databases learning emerging applications data mining privacy and text processing **Semantic Computing** Phillip Chen-yu Sheu,2017-08-23 As the first volume of World Scientific Encyclopedia with Semantic Computing and Robotic Intelligence this volume is designed to lay the foundation for the understanding of the Semantic Computing SC as a core concept to study Robotic Intelligence in the subsequent volumes This volume aims to provide a reference to the development of Semantic Computing in the terms of meaning context and intention It brings together a series of technical notes in average no longer than 10 pages in length each focuses on one topic in Semantic Computing being review article or research paper to explain the fundamental concepts models or algorithms and possible applications of the technology concerned This volume will address three core areas in Semantic Computing **Oracle Database Foundations** Bob Bryla,2006-07-14 The world of IT is always evolving but in every area there are stable core concepts that anyone just setting out needed to know last year needs to know this year and will still need to know next year The purpose of the Foundations series is to identify these concepts and present them in a way that gives you the strongest possible starting point no matter what your endeavor Oracle Database Foundations provides essential knowledge about installing configuring maintaining and querying Oracle 9i and 10g databases What you learn here will benefit you in the short term as you acquire and practice your skills and in the long term as you use them Topics covered include Basic relational database concepts Reporting and querying using SQL Plus and iSQL Plus Creating and maintaining a database Managing user access and security Understanding Oracle database functions Using multiple tables in a query Restricting sorting and grouping data Optimizing database performance Creating backups Troubleshooting database errors *Database and Expert Systems Applications* Abdelkader Hameurlain,Stephen W. Liddle,Klaus-Dieter Schewe,Xiaofang Zhou,2011-08-19 This book constitutes the refereed proceedings of the 22 International Conference on Database and Expert Systems Applications DEXA 2011 held in Toulouse France August 29 September 2 2011 The 52 revised full papers and 40

short papers presented were carefully reviewed and selected from 207 submissions The papers are organized in topical sections on query processing database semantics skyline queries security and privacy spatial and temporal data semantic web search storage and search web search data integration transactions and optimization and web applications   Database and Expert Systems Applications Pablo García Bringas,Abdelkader Hameurlain,Gerald Quirchmayr,2010-08-13 st We welcome you to the proceedings of the 21 International Conference on Database and Expert Systems Applications held in Bilbao With information and database s tems being a central topic of computer science it was to be expected that the integ tion of knowledge information and data is today contributing to the again rapidly increasing attractiveness of this field for researchers and practitioners Since its foundation in 1990 DEXA has been an annual international conference located in Europe which showcases state of the art research activities in these areas DEXA 2010 continued this tradition and provided a forum for presenting and discu ing research results in the area of database and intelligent systems and advanced search topics applications and practically relevant issues related to these areas It offered attendees the opportunity to extensively discuss requirements problems and solutions in the field in the pleasant atmosphere of the city of Bilbao which is known for its driving industriousness its top cultural venues and its rich and inspiring he tage and lifestyle The University of Deusto with its great educational and research traditions and the hospitality which the university and the city are so famous for set the stage for this year s DEXA conference This volume contains the papers selected for presentation at the DEXA conference

   The Architectural Logic of Database Systems Emmanuel J. Yannakoudakis,2012-12-06 If we look back to pre database systems and the data units which were in use we will establish a hierarchy starting with the concept of field used to build records which were in turn used to build higher data units such as files The file was considered to be the ultimate data unit of information processing and data binding monolith Moreover pre database systems were designed with one or more programming languages in mind and this in effect restricted independent develop ment and modelling of the applications and associated storage structures Database systems came along not to turn the above three units into outmoded concepts but rather to extend them further by establishing a higher logical unit for data description and thereby offer high level data manipulation functions It also becomes possible for computer professionals and other users to view all information processing needs of an organisation through an integrated disciplined and methodical approach So database systems employ the concepts field record and file without necessarily making them transparent to the user who is in effect offered a high level language to define data units and relation ships and another language to manipulate these A major objective of database systems is to allow logical manipulations to be carried out independent of storage manipulations and vice versa

   Database and Expert Systems Applications Mourad Elloumi,Michael Granitzer,Abdelkader Hameurlain,Christin Seifert,Benno Stein,A Min Tjoa,Roland Wagner,2018-08-06 This volume constitutes the refereed proceedings of the three workshops held at the 29th International Conference on Database and Expert Systems Applications DEXA 2018 held in

Regensburg Germany in September 2018 the Third International Workshop on Big Data Management in Cloud Systems BDMICS 2018 the 9th International Workshop on Biological Knowledge Discovery from Data BIOKDD and the 15th International Workshop on Technologies for Information Retrieval TIR The 25 revised full papers were carefully reviewed and selected from 33 submissions The papers discuss a range of topics including parallel data management systems consistency and privacy cloud computing and graph queries web and domain corpora NLP applications social media and personalization

   Rules and Reasoning Christoph Benzmüller,Francesco Ricca,Xavier Parent,Dumitru Roman,2018-08-23 This book constitutes the proceedings of the International Joint Conference on Rules and Reasoning RuleML RR 2018 held in Luxembourg during September 2018 This is the second conference of a new series joining the efforts of two existing conference series namely RuleML International Web Rule Symposium and RR Web Reasoning and Rule Systems The 10 full research papers presented together with 5 long technical communications and 7 short papers were carefully reviewed and selected from 33 submissions   PRIMA 2019: Principles and Practice of Multi-Agent Systems Matteo Baldoni,Mehdi Dastani,Beishui Liao,Yuko Sakurai,Rym Zalila Wenkstern,2019-10-24 This book constitutes the refereed proceedings of the 22nd International Conference on Principles and Practice of Multi Agent Systems PRIMA 2019 held in Turin Italy in October 2019 The 25 full papers presented and 25 short papers were carefully reviewed and selected from 112 submissions The papers presented at the PRIMA 2019 conference focus on the following topics Logic and Reasoning Engineering Multi Agent Systems Agent Based Modeling and Simulation Collaboration and Coordination Economic Paradigms Human Agent Interaction Decentralized Paradigms and Application Domains for Multi Agent Systems   **Reasoning Web. Learning, Uncertainty, Streaming, and Scalability** Claudia d'Amato,Martin Theobald,2018-09-14 This volume contains lecture notes of the 14th Reasoning Web Summer School RW 2018 held in Esch sur Alzette Luxembourg in September 2018 The research areas of Semantic Web Linked Data and Knowledge Graphs have recently received a lot of attention in academia and industry Since its inception in 2001 the Semantic Web has aimed at enriching the existing Web with meta data and processing methods so as to provide Web based systems with intelligent capabilities such as context awareness and decision support The Semantic Web vision has been driving many community efforts which have invested a lot of resources in developing vocabularies and ontologies for annotating their resources semantically Besides ontologies rules have long been a central part of the Semantic Web framework and are available as one of its fundamental representation tools with logic serving as a unifying foundation Linked Data is a related research area which studies how one can makeRDF data available on the Web and interconnect it with other data with the aim of increasing its value for everybody Knowledge Graphs have been shown useful not only for Web search as demonstrated by Google Bing etc but also in many application domains   **Logic Programming** Peter J. Stuckey,2002-07-17 The global environment is changing rapidly under the impact of human activities An important element in this change is related to global climate modification Experts from the natural and social sciences

with a strong interest in history discussed common topics of great interest to society Can the study of climate and history help in devising strategies for coping with this change What might be the type of information most useful in this context What are the pitfalls awaiting the unwary These and similar questions were discussed during a four day workshop The resulting proceedings contain comprehensive papers of broad interest thematic back ground papers and reports of study groups Apart from scientists the papers should interest graduate students and lecturers **Information Technology in Medical Diagnostics II** Waldemar Wójcik,Sergii Pavlov,Maksat Kalimoldayev,2019-02-13 For many centuries mankind has tried to learn about his health Initially during the pre technological period he could only rely on his senses Then there were simple tools to help the senses The breakthrough turned out to be the discovery of X rays which gave insight into the human body Contemporary medical diagnostics are increasingly supported by information technology which for example offers a very thorough analysis of the tissue image or the pathology differentiation It also offers possibilities for very early preventive diagnosis Under the influence of information technology traditional diagnostic techniques and new ones are changing More and more often the same methods can be used for both medical and technical diagnostics In addition methodologies are developed that are inspired by the functioning of living organisms Information Technology in Medical Diagnostics II is the second volume in a series showing the latest advances in information technologies directly or indirectly applied to medical diagnostics Unlike the previous book this volume does not contain closed chapters but rather extended versions of presentations made during two conferences XLVIII International Scientific and Practical Conference Application of Lasers in Medicine and Biology Kharkov Ukraine and the International Scientific Internet conference Computer graphics and image processing Vinnitsa Ukriane both held in May 2018 Information Technology in Medical Diagnostics II links technological issues to medical and biological issues and will be valuable to academics and professionals interested in medical diagnostics and IT   Conceptual Modeling: Foundations and Applications Alex T. Borgida,Vinay Chaudhri,Paolo Giorgini,Eric Yu,2009-07-06 This Festschrift volume published in honor of John Mylopoulos on the occasion of his retirement from the University of Toronto contains 25 high quality papers written by leading scientists in the field of conceptual modeling The volume has been divided into six sections The first section focuses on the foundations of conceptual modeling and contains material on ontologies and knowledge representation The four sections on software and requirements engineering information systems information integration and web and services represent the chief current application domains of conceptual modeling Finally the section on implementations concentrates on projects that build tools to support conceptual modeling With its in depth coverage of diverse topics this book could be a useful companion to a course on conceptual modeling   **The Semantic Web** Andreas Harth,Sabrina Kirrane,Axel-Cyrille Ngonga Ngomo,Heiko Paulheim,Anisa Rula,Anna Lisa Gentile,Peter Haase,Michael Cochez,2020-05-27 This book constitutes the refereed proceedings of the 17th International Semantic Web Conference ESWC 2020 held in Heraklion Crete Greece The 39 revised full papers presented

were carefully reviewed and selected from 166 submissions The papers were submitted to three tracks the research track the resource track and the in use track These tracks showcase research and development activities services and applications and innovative research outcomes making their way into industry The research track caters for both long standing and emerging research topics in the form of the following subtracks ontologies and reasoning natural language processing and information retrieval semantic data management and data infrastructures social and human aspects of the Semantic Web machine learning distribution and decentralization science of science security privacy licensing and trust knowledge graphs and integration services and APIs The conference was held virtually due to the COVID 19 pandemic Chapter Piveau A Large scale Oopen Data Management Platform based on Semantic Web Technologies is available open access under a Creative Commons Attribution 4 0 International License via link springer com *The Semantic Web – ISWC 2019* Chiara Ghidini,Olaf Hartig,Maria Maleshkova,Vojtěch Svátek,Isabel Cruz,Aidan Hogan,Jie Song,Maxime Lefrançois,Fabien Gandon,2019-10-17 The two volume set of LNCS 11778 and 11779 constitutes the refereed proceedings of the 18th International Semantic Web Conference ISWC 2019 held in Auckland New Zealand in October 2019 The ISWC conference is the premier international forum for the Semantic Web Linked Data Community The total of 74 full papers included in this volume was selected from 283 submissions The conference is organized in three tracks for the Research Track 42 full papers were selected from 194 submissions the Resource Track contains 21 full papers selected from 64 submissions and the In Use Track features 11 full papers which were selected from 25 submissions to this track Fragments of First-Order Logic Ian Pratt-Hartmann,2023 Pratt Hartmann considers for which fragments of first order logic there is an effective method for determining satisfiability or finite satisfiability Furthermore he asks if these problems are decidable for some fragment what is their computational complexity **Flexible Query Answering Systems** Henrik Legind Larsen,Maria J.
