USSR. ,1961-07 **This New Ocean** William E. Burrows,2010-09-29 It was all part of man's greatest adventure landing men on the Moon and sending a rover to Mars finally seeing the edge of the universe and the birth of stars and launching planetary explorers across the solar system to Neptune and beyond The ancient dream of breaking gravity's hold and taking to space became a reality only because of the intense cold war rivalry between the superpowers with towering geniuses like Wernher von Braun and Sergei Korolyov shelving dreams of space travel and instead developing rockets for ballistic missiles and space spectacles Now that Russian archives are open and thousands of formerly top secret U S documents are declassified an often startling new picture of the space age emerges the frantic effort by the Soviet Union to beat the United States to the Moon was doomed from the beginning by gross inefficiency and by infighting so treacherous that Winston Churchill likened it to dogs fighting under a carpet there was more than science behind the United States suggestion that satellites be launched during the International Geophysical Year and in one crucial respect Sputnik was a godsend to Washington the hundred odd German V 2s that provided the vital start to the U S missile and space programs legally belonged to the Soviet Union and were spirited to the United States in a derring do operation worthy of a spy thriller despite NASA's claim that it was a civilian agency it had an intimate relationship with the military at the outset and still does a distinction the Soviet Union never pretended to make constant efforts to portray astronauts and cosmonauts as Boy Scouts were often contradicted by reality the Apollo missions to the Moon may have been an unexcelled political triumph and feat of exploration but they also created a headache for the space agency that lingers to this day This New Ocean is based on 175 interviews with Russian and American scientists and engineers on archival documents including formerly top secret National Intelligence Estimates and spy satellite pictures and on nearly three decades of reporting The impressive result is this fascinating story the first comprehensive account of the space age Here are the strategists and war planners engineers and scientists politicians and industrialists astronauts and cosmonauts science fiction writers and journalists and plain ordinary unabashed dreamers who wanted to transcend gravity's shackles for the ultimate ride The story is written from the perspective of a witness who was present at the beginning and who has seen the conclusion of the first space age and the start of the second
