**The Glass Vessels of Anglo-Saxon England** Rose Broadley, 2019-12-27 This volume combines a comprehensive exploration of all vessel glass from middle and late Anglo Saxon England and a review of the early glass with detailed interpretation of its meaning and place in Anglo Saxon society Analysis of a comprehensive dataset of all known Anglo Saxon vessel glass of middle Anglo Saxon date as a group has enabled the first quantification of form colour and decoration and provided the structure for a new typological chronological and geographical framework The quantification and comparison of the vessel glass fragments and their attributes and the mapping of the national distribution of these characteristics forms colours and decoration types both represent significant developments and create rich opportunities for the future The geographical scope is dictated by the glass fragments which are from settlements located along the coast from Northumbria to Kent and along the south coast to Southampton Seven case studies of intra site glass distribution reveal that the anticipated pattern of peripheral disposal alongside dining waste is widespread although exceptions exist at the monastic sites at Lyminge Kent and Jarrow Tyne and Wear Overall the research themes addressed are the glass corpus and its typology glass vessels in Anglo Saxon society and glass vessels as an economic indicator of trade and exchange Analysis reveals new understandings of both the glass itself and the role of glass vessels in the social and economic mechanisms of early medieval England There is currently no comprehensive work examining early medieval vessel glass particularly the post sixth century fragmentary material from settlements and my monograph will fill that gap The space is particularly noticeable when considering books on archaeological glass from England the early medieval period is the only one with no reference volume no recent through and accessible source of information The British Museum published a monograph entitled *Catalogue of Anglo Saxon Glass in the British Museum* in 2008 but as the title suggests it is a catalogue at heart and of a collection of fifth and sixth century grave goods in a single museum Chronologically a volume on the subject would fill

the space between various books on Roman glass from Britain and Medieval glass vessels found in England c AD 1200 1500 by Rachel Tyson This book on early medieval vessel glass and the contexts from which it came will also make a significant contribution to early medieval settlement studies and the archaeology of trade in this period both are growth areas of scholarship and interest and vessel glass provides a new tool to address key debates in the field

with living responsibly and in harmony with the environment In this learned innovative study Olli Lagerspetz offers a persuasive discussion of dirt and its ramifications across philosophy and culture Writing with wit and grit he argues that questions of dirt and soiling can neither be reduced to hygiene nor to ritual pollution Instead they are integral to almost every human activity As participants in material culture we not only produce things and dispose of them but we also engage with them practically aesthetically and morally Everything in essence comes back to dirt and waste Ranging through subjects and times from Heraclitus of Ephesus to the Renaissance via Heidegger and Mary Douglas from the hygienic products of modernity to abject art Lagerspetz constantly questions current thinking on all subjects most foul Proposing a new view of dirt based on our physical engagement with the world A Philosophy of Dirt is essential reading for all students of philosophy and for anyone who s felt soiled and wants to know why      **Monthly Review; Or, New Literary Journal** Ralph Griffiths,George Edward Griffiths,1790      **The Monthly Review, Or, Literary Journal** ,1790      **The Monthly Review** Ralph Griffiths,George Edward Griffiths,1790
