inspired parts of Washington Irving's *Sleepy Hollow* and the Easthampton Witch Elizabeth Garlick accused and tried thirty five years before the Salem witch trials. These stories are known locally in the towns where they occurred but have never been collected into one book before.

Medford Dennis McDonald, 2012 Settled by Quakers in the late 1600s Medford was dominated by sawmills and gristmills in the mid 1700s. During the 1800s small Quaker and public schools were scattered throughout the township three of which still survive today. When Medford became a town in 1847 after breaking away from Evesham it had already begun to develop as a community. William Cooper a photographer during the turn of the 20th century captured many of the images featured in *Medford*. Cooper photographed workers at Kirby's Mill loading wagons, baseball players at the Medford Field Club, schoolchildren at Cross Keys School, employees at Braddock's Tavern, staff at the Indian Chief Hotel, glass blowers turning out bottles at Star Glass Company and travelers at the Philadelphia Marlton and Medford train station on Main Street. He also snapped pictures of parades, kids playing in the streets and men playing craps.

Environmental Governance in Taiwan Simona A. Grano, 2015-06-05 Three decades of rapid industrialization until the lifting of martial law in 1987 with little or no concern for the environment have made Taiwan's environmental degradation a serious problem. In the past twenty years Taiwan has seen a surge of environmental organizations which to a certain degree have enjoyed a remarkable success in fighting polluting industries or affecting policies on behalf of the environment. This book aims to analyse environmental governance mechanisms and actors in Taiwan through a multi disciplinary research approach. Based on extensive and original research it includes four different case studies which have all taken place since 2011. It focuses on four major elements of governance specifically norms, actors, processes and outcomes to examine Taiwan's national and local environmental governance in the post 2008 period. The book shows how the painful lessons Taiwan has learned throughout its transition should be of interest to other developing countries illustrating how these positive transformations have managed to bring about a more ecologically friendly mode of economic development. Demonstrating that the battle to further ecological sustainability is also a battle to further democratisation this book will be of interest to students and scholars of Taiwan Studies, Developmental Studies and Environmental Studies.
