Labyrinths and labyrinthine borders have been around for a very long time In fact they have been used outside of formal religion as a ritual object to express spiritual values for at least 3500 years in countries all over the world including China India the Holy Land Ireland Southern Europe Scandinavia pre Columbian America and England They can be found at Neolithic and Sardinian and Hopi rock art sites in Hindu temples and Taoist shrines bordering Minoan frescoes and in Roman mosaics They have been incorporated into Roman Catholic and Episcopal cathedrals Protestant churches and in New Age retreat centres They have been carved into rocks turf and wood engraved in metal laid out in stones woven in reeds set in tiles painted and drawn In other words the labyrinth is a nearly universal form and comes as close as we can to an archetype An archetype is a symbol that appeals to us at an unconscious level We don t have to struggle with its meaning intellectually Its symbolic meaning is somehow ingrained in us part of our very nature As a result it may appeal to us without our even understanding why It is always risky to talk about the meaning of such an archetypal symbol We know that it must carry a wealth of meaning to appeal to so many different sorts of people over such a long stretch of time But we can tentatively

explore some of its meanings if we stay aware that we can never really plumb all of its riches **Labyrinths** Jorge Luis Borges,1964 Forty short stories and essays have been selected as representative of the Argentine writer's metaphysical narratives *Labyrinths from the Outside In (2nd Edition)* Rev. Dr. Donna Schaper,Rev. Dr. Carole Ann Camp,2013-04-01 The user friendly interfaith guide to making and using labyrinths for meditation prayer and celebration updated revised and expanded A labyrinth is a circuitous path that people have used as a form of prayer and meditation for thousands of years a path that is being rediscovered as a spiritual tool in our own day There are now thousands of labyrinths in North America made of stone cement sunflowers grass or canvas indoors and outdoors in Christian Pagan and even nonreligious settings and adaptable for use by people of all spiritual backgrounds This guide explains how the labyrinth is a symbol that transcends traditions and how walking its path brings us together Here is your entry to the fascinating history and philosophy of the labyrinth walk with directions for making a labyrinth of your own or finding one in your area and guidance on ways to use labyrinths creatively for Prayer Stress reduction Meditation Commemorating personal or family milestones Faith rituals Celebrations of all kinds Labyrinths a twenty first century method of approaching the sacred are a spiritual practice more ancient than Stonehenge or the ruins of Troy This practical and inspiring guide will help you to explore them

Ancient Memory Katharine Mawford,Eleni Ntanou,2021-07-05 Although the recent memory boom has led to increasing interdisciplinary interest there is a significant gap relating to the examination of this topic in Classics In particular there is need for a systematic exploration of ancient memory and its use as a critical and methodological tool for delving into ancient literature The present volume provides just such an approach theorising the use and role of memory in Graeco Roman thought and literature and building on the background of memory studies The volume's contributors apply theoretical models such as memoryscapes civic and cultural memory and memory loss to a range of authors from Homeric epic to Senecan drama and from historiography to Cicero's recollections of performances The chapters are divided into four sections according to the main perspective taken These are 1 the Mechanics of Memory 2 Collective memory 3 Female Memory and 4 Oblivion This modern approach to ancient memory will be useful for scholars working across the range of Greek and Roman literature as well as for students and a broader interdisciplinary audience interested in the intersection of memory studies and Classics Proceedings of the Section of Sciences Koninklijke Nederlandse Akademie van Wetenschappen. Re-imaging the City Somaiyeh Falahat,2013-12-09 Somaiyeh Falahat investigates the spatial and morphological logic of pre modern Middle Eastern and North African cities so called Islamic cities She bases her argument on the fact that the city and consequently its form and structure similar to other human products have deep roots in the thought structure of the people Thus to know such places properly one has to refer to this life world and use it as a structure to observe the city This approach aims at opening new levels of understanding of the city by grasping indigenous concepts and structures it puts forward claims for the possibility of a new method of analysis The author studies the historic city of Isfahan as the case study and suggests that an indigenous term Hezar Too can explain the complexity of the city which has been interpreted as labyrinthine and maze like accounting for the essence of the city and its form in an appropriate way Looking at the city from this new point of view can help in observing it in its context and subsequently in discovering its real character **A**
