Edition Kenneth Womack, 2022-12-15 In *Long and Winding Roads: The Evolving Artistry of the Beatles* Revised Edition Kenneth Womack brings the band's story vividly to life from their salad days as a Liverpool Skiffle group and their apprenticeship in the nightclubs and mean streets of Hamburg through their early triumphs at the legendary Cavern Club and the massive onslaught of Beatlemania itself. By mapping the group's development as an artistic fusion, Womack traces the Beatles' creative arc from their first primitive recordings through Abbey Road and the twilight of their career. In this revised edition, Womack addresses new insights in Beatles-related scholarship since the original publication of *Long and Winding Roads* along with hundreds of the group's outtakes released in the intervening years. The updated edition also affords attention to the Beatles' musical debt to Rhythm and Blues as well as to key recent discoveries that vastly shift our understanding of formative events in the band's timeless story.

Long History, Deep Time Ann McGrath, Mary Anne Jebb, 2015-08-17 The vast shape-shifting continent of Australia enables us to take a long view of history. We consider ways to cross the great divide between the deep past and the present. Australia's human past is not a short past so we need to enlarge the scale and scope of history beyond 1788. In ways not so distant, these deeper times happened in the same places where we walk today. Yet they were not the same places, having different surfaces, ecologies, and peoples. Contributors to this volume show how the earth and its past peoples can wake us up to a sense of place as history, as a site of both change and continuity. This book ignites the possibilities of what the spaces and expanses of history might be. Its authors reflect upon the need for appropriate, feasible timescales for history, pointing out some of the obstacles encountered in earlier efforts to slice human time into thematic categories. Time and history are considered from the perspective of physics, archaeology, literature, western and Indigenous philosophy. Ultimately, this collection argues for imaginative new approaches to collaborative histories of deep time that are better suited to the challenges of the Anthropocene. Contributors to this volume, including many leading figures in their respective disciplines, consider history's temporality and ask how history might expand to accommodate a chronology of deep time. Long histories that incorporate humanities, science, and Indigenous knowledge may produce deeper meanings of the worlds in which we live.

From Paris to Pompeii Göran Blix, 2013-09-04 In the early nineteenth century, as amateur archaeologists excavated Pompeii, Egypt, Assyria, and the first prehistoric sites, a myth arose of archaeology as a magical science capable of unearthing and reconstructing worlds thought to be irretrievably lost. This timely myth provided an urgent antidote to the French anxiety of amnesia that undermined faith in progress, and it armed writers from Chateaubriand and Hugo to Michelet and Renan with the intellectual tools needed to affirm the indestructible character of the past. *From Paris to Pompeii* reveals how the nascent science of archaeology lay at the core of the romantic experience of history and shaped the way historians, novelists, artists, and the public at large sought to cope with the relentless change that relegated every new present to history. In postrevolutionary France, the widespread desire to claim that no being, city, culture, or language was ever definitively erased ran much deeper than mere nostalgic and reactionary impulses. Göran Blix contends that this desire was
