*Fabric Structures in Architecture* J Llorens, 2015-03-28 *Fabric Structures in Architecture* covers the varying ways textiles and their properties are used in building construction with particular focus given to tensile structures. The text begins with the fundamental principles of textiles including the origins of fabric architecture then progressing to a discussion of the modern textiles of today. It covers relevant textile materials and their properties including coatings and membranes. In addition, a range of design considerations are discussed with detailed information on installation and failure modes. A series of case studies from around the world accompany the discussion illustrating the applications of textiles in architecture. Offers key coverage of the fundamental principles from the origins of fabric architecture to modern textile. Provides analysis of relevant textile materials and their properties including coatings and membranes. Contains expert insights in to the applications of textiles in architecture presenting a series of relevant case studies from around the world. **When Buildings Speak** Anthony Alofsin, 2006 The canonical inventors of International Style have long dominated studies of modern European architecture. But in this text Anthony Alofsin broadens this scope by exploring the rich yet overlooked architecture of the late Austro-Hungarian Empire and its successor states. **Reciprocal Frame Architecture** Olga Popovic Larsen, 2007-12-20 In structural terms reciprocal frame structures are three dimensional assemblies of mutually supporting beams. But behind this definition lie some breathtakingly beautiful and complex structures at the heart of buildings both ancient and modern. This new book explores the principles of these apparently simple structures and demonstrates how they can be used in the context of a modern building. Starting with historic designs by de Honnecourt, Da Vinci and Serlio the book presents the wealth of possible RF morphologies and investigates the geometrical structural and practical design issues of reciprocal frames. The case studies look at stunning examples of reciprocal frame architecture that range from low environmental impact buildings and self built examples in the UK and USA to the fascinating and elegant structures of the Puppet Theatre in Seiwai Tokyo's Spinning House, Sukiya Yu house, The Toyoson Stonemason museum and the Life Sciences Laboratory Torikabuto in Japan. The book is designed to inform and inspire architects and structural engineers alike and brings to life a structural system whose principles have been used for thousands of years. *Information Processing and Management of Uncertainty in Knowledge-Based Systems* Eyke Hüllermeier, Rudolf Kruse, Frank Hoffmann, 2010-06-29 The International Conference on Information Processing and Management of Uncertainty in Knowledge-Based Systems (IPMU) is organized every two years with the aim of bringing together scientists working on methods for the management of uncertainty and aggregation of information in intelligent systems.
